<sup>\*</sup>We will perform a stock split with effect from January 1, 2026 whereby each common stock will be divided into 15 shares. The impact of the stock split is considered for EPS and Dividend per share.

#### 2. Reason for the revision

In the overall manufacturing dispatch business, the labor shortage has been continuing due to the tight supply/demand balance, while the recruitment has become more difficult due to a rise in hiring unit cost and the intensified competition for human resources. In this situation, hiring was sluggish at UT Group and the number of technical employees on a consolidated basis fell short of the plan.

Additionally, in the Motor & Energy Business, which provides human resource services in the automotive-related industry, we had anticipated a recovery in temporary staffing demand. However, due to the impact of U.S. tariff policies, staffing demand has remained flat compared to the previous year.

As a result, net sales for FY3/2026 are expected to remain at the same level as the previous fiscal year and to fall below the initial plan. Each level of profit is also expected to fall below the initial plan due to the revision in sales.

### 3. Revision of dividend forecast

Regarding dividends, we are maintaining the initial plan values from the perspective of continuing stable shareholder returns. Furthermore, we plan to implement the previously undetermined third quarter-end and year-end dividend forecasts as follows.

|                                     | Dividend per share (yen) |        |        |         |          |  |  |
