The details are provided below.

1. Reason for revision to dividend forecasts

The Company aims to stably increase the return of profit by implementing the medium-term business plan and expanding earnings, while maintaining a balance between investments in Japan and abroad to become a “Rice Innovation Company” and the return of profit to its shareholders.

In the update of our medium- to long-term growth strategy in November 2025, the Company announced our aim to achieve progressive dividends with a payout ratio target of 35%. Based on this policy, we have decided to raise dividend forecasts in line with the payout ratio target, and we plan to increase the year-end dividend for the current fiscal year from ¥43 to ¥51 per share.
