1. Qualitative Information on Financial Results

(1) Operating Results

In the three months ended August 31, 2025, the Japanese economy was expected to continue its gradual recovery, with improving employment and income conditions, and the effects of various measures. On the other hand, it is necessary to pay close attention to the impact on the economy caused by US trade policy trends, downward pressure on personal consumption due to continued price increases, fluctuations in the financial and capital markets, and other factors.

The LIKE Group's businesses are closely related to social issues such as nursery waiting lists, participation of women in the workforce, labor shortages due to population decline and the need for workers to leave their jobs due to childbirth, childcare, and elderly care. In response to these challenges, we aim to build a culture where expressions of gratitude come naturally, and people genuinely feel, "I'm glad it was you. Thank you." Accordingly, based on our Group philosophy of "...planning the future: developing people and creating the future," we will help create a sustainable society by focusing on expanding the working population in an aging society with a declining birthrate while providing high-quality services in each of our businesses, with the aim of becoming a corporate group that is truly indispensable to the world.

In the three months ended August 31, 2025, profitability improved due to the increased amount of deferred subsidies recorded in the Child-Rearing Support Service Business, the acquisition of high-unit-price projects in the Comprehensive Human Resources Service Business, and the promotion of occupancy in the Nursing Care-Related Service Business, net sales reached ¥15,930 million (+11.1% year-on-year), while operating profit was ¥466 million (+47.9% year-on-year). As a result, ordinary profit amounted to ¥437 million (+50.6% year-on-year), and the quarterly profit attributable to owners of parent was ¥265 million (+59.2% year-on-year).

Segment Results

Child-Rearing Support Service Business

According to the Prompt Vital Statistics Report (preliminary data for December 2024) released by the Ministry of Health, Labour and Welfare in June 2025, the number of births in 2024 declined to 686,061 from 727,288 in the previous year, hitting the lowest level since the inception of the survey.

However, the number of children on waiting lists (including latent children those seeking childcare services that do not appear on waiting lists) totaled 66,743 (As of April 2025) and the number of children on waiting lists for after-school clubs stands at 17,013 as of May 1, 2025, which is an decrease of 673 compared to May 1, 2024. This indicates that the waitlist issue remains serious, particularly in the Tokyo metropolitan area. In addition, the rising employment rate of women implies that the demand for childcare services is likely to remain high in major metropolitan areas, making the promotion of various measures to ensure the availability of childcare services a pressing issue. The Japanese government approved the Children's Future Strategy at a Cabinet meeting held in December 2023, toward implementing "unprecedented measures" to tackle the country's declining birthrate. Specifically, the government has been advancing efforts to increase childcare allowances, establish the Nursery for All Children program that allows all parents and guardians to use childcare services regardless of their eligibility (e.g., employment status and the number of working hours), improve staffing standards, and increase compensation for childcare workers. Through these initiatives, the government is working to further bolster countermeasures for the declining birthrate at the national level.

Against this backdrop, in addition to opening private licensed nurseries, consolidated subsidiary LIKE Kids, Inc. has made efforts to improve the availability of childcare from various angles by operating nurseries established by local governments, opening new nurseries in large development projects led by real estate developers, operating after-school clubs and children's centers on behalf of local governments and operating outsourced childcare facilities including company-run nurseries located at hospitals, companies, and universities. At the same time, we have focused on recruiting excellent nursery teachers and staff working in after-school clubs to ensure the quality of our childcare services by working closely with our consolidated subsidiary, LIKE Staffing, Inc.

As a result of these factors, sales in the three months ended August 31, 2025 totaled ¥8,106 million (+12.2% year-on-year), due to an increase in the amount of deferred subsidies recorded during the period and newly opened facilities with a high fill rate in the first fiscal year. Operating profit amounted to ¥110 million (-27.0% year-on-year) due to higher personnel costs and increased food costs resulting from rising prices.

Comprehensive Human Resources Service Business

Securing human resources is an important management issue in our main business domains, which can be described as social infrastructure, as the working population shrinks in Japan due to declining birthrates and an aging population.

Accordingly, consolidated subsidiary LIKE Staffing, Inc. engaged in sales activities to increase working populations in the business domains of mobile phone, logistics and manufacturing, call center, childcare and nursing care, and construction industries.

In the mobile phone industry, we struggled to secure human resources amid increasingly intense competition with other industries for personnel due to society-wide human resource shortages. We promote measures to prevent turnover among existing staff, such as improving working conditions, and aim for business expansion by meeting personnel demand. In the logistics industry, despite lingering impact from some clients shifting to direct employment, short-term staffing demand has expanded due to sales events at major e-commerce clients. In the childcare and nursing care industries, which are seeing increasingly serious human resource shortages, we are reviewing our inhouse sales system and utilizing the facilities management expertise of consolidated subsidiaries LIKE Kids, Inc. and LIKE Care, Inc. with recruitment capabilities to continue to strengthen our dispatch business and introduction business.

In addition, we have continued to work on expanding our employment support services for foreign nationals with the aim of developing them into our next growth driver. Regarding employment support services for foreign nationals, we have actively pursued sales efforts in the nursing care industry facing a labor shortage, and we are also working to create comfortable work environments, including support for daily life, to ensure that more companies will be able to accept these workers effortlessly.

As a result of these factors, sales in the three months ended August 31, 2025, amounted to ¥5,482 million (+9.7% year-on-year) driven by preventing staff turnover in the mobile phone business partly through improved working conditions, as well as by acquiring high-unit-price sales projects in the logistics and manufacturing business. Operating profit was ¥433 million (+33.2% year-on-year).

Nursing Care-Related Service Business

The market surrounding the Nursing Care-Related Service business is characterized by an aging population. The number of elderly people is forecast to grow, particularly those aged 65 and over. This trend is especially in the Tokyo metropolitan area and other major cities. Accordingly, demand for nursing care is expected to grow in these areas. Meanwhile, securing care workers to meet this growing demand remains a major challenge, and a significant shortage of personnel is projected to persist in the future. The domestic workforce alone is unlikely to meet the demand, and the resulting shortage in care workers has become a serious social issue.

Under those circumstances, consolidated subsidiary LIKE Care, Inc. operates assisted-living nursing homes and other nursing care facilities in the metropolitan area of Kanagawa, Tokyo, and Saitama, where large numbers of people aged 65 or older reside. Taking advantage of their partnerships with medical institutions, many of these facilities provide end-of-life care with round-the-clock nursing support, providing living quarters to individuals who are in need of intensive nursing care and for whom providing care at home is prohibitively difficult.

In the three months ended August 31, 2025, the stable operation of existing facilities, including the newly opened Sunrise Villa Kasukabe-Higashi in February 2025, was driven by the steady promotion of occupancy at existing facilities such as Ferie de Kami-igusa, which opened in February 2024.

As a result of these factors, sales totaled ¥2,316 million (+10.4% year-on-year), and operating profit was ¥125 million (+82.6% year-on-year).

(2) Financial Position

As of August 31, 2025, total assets stood at ¥39,573 million, down by ¥873 million from May 31, 2025. Total net assets amounted to ¥17,493 million, down ¥304 million. The equity-to-asset ratio increased 0.2 percentage points from May 31, 2025, to 44.2%.

Current assets

Current assets as of August 31, 2025 came to ¥15,850 million, down by ¥1,381 million from May 31, 2025. This was mainly the result of ¥1,532 million decrease in notes and accounts receivable–trade, and contract assets.

Non-current assets

Non-current assets as of August 31, 2025 amounted to ¥23,722 million, up by ¥508 million from May 31, 2025. This mainly reflected ¥601 million increase in construction in progress.

Current liabilities

As of August 31, 2025, current liabilities stood at ¥13,807 million, up by ¥1,575 million from May 31, 2025. This was primarily due to ¥1,968 million increase in the current portion of long-term borrowings and ¥274 million increase in accrued consumption taxes, partially offset by ¥101 million decrease in provision for shareholder benefit program.

Non-current liabilities

Non-current liabilities as of August 31, 2025 amounted to ¥8,271 million, down by ¥2,144 million from May 31, 2025. This mainly reflected ¥2,211 million decrease in long-term borrowings.

Net assets

As of August 31, 2025, net assets totaled ¥17,493 million, down by ¥304 million from May 31, 2025. This was due primarily to ¥594 million in dividends paid, which was partially offset by the booking of ¥265 million in profit attributable to owners of parent.

(3) Consolidated Earnings Forecast and Other Forward-Looking Statements

We have made no changes to our consolidated earnings forecast for the fiscal year ending May 31, 2026 released on July 15, 2025.

(3) Notes to Quarterly Consolidated Financial Statements

(Adoption of Special Accounting Methods for Preparation of Quarterly Consolidated Financial Statements)

Tax expenses are calculated by multiplying profit before income taxes by an effective tax rate that was reasonably estimated by applying tax-effect accounting to estimated profit before income taxes for the fiscal year ending May 31, 2026, including the three months ended August 31, 2025 under review.

However, in cases where calculating tax expenses using an estimated effective tax rate yields a result that is notably lacking rationality, tax expenses are calculated using the statutory effective tax rate.

(Segment Information)

Segment Information

1. Information on sales, profit, assets, liabilities, and other items for each reportable segment

Three months ended August 31, 2024 (June 1, 2024 to August 31, 2024)

(Thousands of ven)

| Reportable segment | | | | | | | (| Amount recorded in |
|--|--|---------------|----------------------------------|------------|-------------------|------------|-------------------------|--|
| | Comprehensive Human Resources Service | Child-Rearing | Nursing Care- Related Service | Subtotal | Other (Note 1) | Total | Adjustments (Note 2) | consolidate financial statements (Note 3) |
| Sales | | | | | | | | |
| Sales to external customers | 4,997,384 | 7,226,621 | 2,098,453 | 14,322,459 | 22,594 | 14,345,054 | _ | 14,345,054 |
