1. Analysis of Business Results

(1) Overview of Fiscal Year 2024 (April 1, 2024 – March 31, 2025)

Economic Environment

In the year ended March 31, 2025, central banks around the world, except Japan, began to shift from monetary tightening to easing. Meanwhile, geopolitical uncertainties have increased due to factors such as the prolonged Russian invasion of Ukraine, the continued unpredictability in the Middle East, the economic slowdown in China, and, since January 2025, policy changes under the new U.S. administration.

Looking at the regions in which our Group does business, in the United States, the Federal Reserve Board (FRB) implemented three interest rate cuts totaling 1.0% between September and December 2024, bringing the policy interest rate range to 4.25–4.50%. While consumption and employment remain strong, the economic outlook has become increasingly uncertain due to policy changes by the new administration, including tariff policies.

In the EU economic area, personal consumption has remained resilient, but the prolonged slump in the manufacturing sector has kept growth low. In March 2025, the European Central Bank (ECB) lowered interest rates for the fifth consecutive meeting in response to easing inflationary pressures and weaker economic indicators, bringing the policy interest rate to 2.65%.

In China, although sluggish domestic demand and the stagnant real estate market remain key challenges, real GDP growth for January–December 2024 reached around +5.0%, the government's target, supported by monetary easing measures implemented in the second half of the year. Meanwhile, trade friction between the U.S. and China appears to be intensifying, making the outlook uncertain.

In Vietnam, exports to the United States and other countries drove economic growth, resulting in a significant year-on-year increase of +7.09% in real GDP growth for January–December 2024. While exports continue to show an upward trend in early 2025, there are concerns about the potential impact of protectionist policies under the new U.S. administration.

In India, the economy has remained solid, supported by strong private consumption and exports. The current inflation rate remains within the central bank's target range of 2–6%. In February 2025, the central bank lowered the policy interest rate from 6.5% to 6.25% for the first time in about five years, signaling its intention to support economic growth.

In Japan, the Bank of Japan raised interest rates again in January 2025, following a previous hike in July 2024, bringing the policy rate to around 0.5%. While the domestic economy is recovering moderately, the potential impact of policy changes under the new U.S. administration needs to be closely monitored.

3. Management Policies

(1) Fundamental Policy

In accordance with the Sojitz Group Statement and the Sojitz Group Slogan, to create prosperity as in our corporate statement, the Sojitz Group is committed to maximizing two types of value – “value for Sojitz” and “value for society.” “Value for Sojitz” refers to enhancements to its business foundation contributions and to sustained growth. “Value for society” pertains to contributions to the development of local economies, respect for human rights, and environmental preservation.

(Sojitz Group Statement)

The Sojitz Group creates value and prosperity
by connecting the world with a spirit of integrity.

(Sojitz Group Slogan)

New way, New value

(Sojitz's Value Creation Model)

In order to create prosperity and two types of values, Sojitz considers human resources to be our most important management resource, which Sojitz describes as “human assets,” and places them at the center of our value creation model. The source of Sojitz’s value creation is to understand the needs of the world and to enhance our human resource capabilities to create value.

Based on highly effective strategies and robust corporate governance systems, always guided by new ideas, Sojitz exercises our capabilities through trading, investments in interests, and business investments as we quickly expand our business while managing risk based on the uncertainty seen in the operating environment.

Moreover, Sojitz’s sustained growth is supported by the solid operating foundation it has built over the years. This foundation comprises our global network of operating bases and partnerships, as well as the trusting relationships with customers and the brand image we have fostered over the years in each region.

As Sojitz creates “value for society,” Sojitz earns the trust of our stakeholders. Meanwhile, the value we create enhances our business foundation through the development of human resources and the accumulation of business expertise as “Value for Sojitz,” thereby bolstering our competitiveness and granting us access to a wider range of business opportunities.

Based on this corporate statement, we have defined our “vision of Sojitz in 2030” as being a general trading company that constantly cultivates new businesses and human capital, and to pursue this vision, we will continue to fulfill our mission as a general trading company: delivering goods and services where necessary. At the same time, we will seek to increase corporate value by creating business and human resource value that responds to market needs and social issues.
