SecuAvail Launches “AI-SOC for M365” Solution Partner Program, Welcomes First Partner

Since its founding, SecuAvail has been providing security operation services, with a primary focus on security perspectives in log analysis and alert evaluation for Microsoft 365. To further enhance log analysis and alerts from the practical viewpoint of users, SecuAvail has released the Solution Partner Program, enabling collaboration with vendors that provide Microsoft 365 implementation, operation, and customization. Through such collaboration, the program aims to expand the functionality of the AI-SOC service and promote joint business development.

The Partner Program provides a portal that allows participating companies to analyze the Microsoft 365 logs of their own users, under the conditions of improving AI capabilities, expanding reporting, and creating new business opportunities. By utilizing this portal, partners can advance their own original operation services, support services, monthly reports, consulting, and other business initiatives.

With the launch of the program, SecuAvail has begun inviting vendor companies engaged in Microsoft 365-related businesses to participate. SecuAvail is pleased to announce that SG Plus Co., Ltd. (Representative: Noriaki Okada; Headquarters: Kasuga City, Fukuoka Prefecture) has joined the program as its first solution partner.

About SG Plus Co., Ltd.

Established in 2020 Head Office: 4-11 Kasugabaru Minami-machi, Kasuga City, Fukuoka Prefecture

Since its establishment, SG Plus has been providing consulting services for customers utilizing Microsoft 365, as well as marketing support services for companies offering Microsoft 365-related solutions. In addition, by leveraging its proprietary web part "Service Gate," which is not included in the standard features of SharePoint, the company offers portal site development services designed to enhance usability for end users.

About SecuAvail Inc.

Founded in 2001, SecuAvail Inc. is one of the few Japan-based companies exclusively dedicated to network security, offering long-term operational support for corporate and organizational information systems. To ensure robust system security and uninterrupted business continuity, the company provides services that are both highly secure and practically applicable.

For over two decades, SecuAvail has offered NetStare, an integrated security operations service that uniquely combines the capabilities of both a Security Operation Center (SOC) and a Network Operation Center (NOC).

Through NetStare, the company monitors more than 11,000 client network devices in real time, collecting approximately 2.5 billion log entries per day. This enables rapid detection of equipment failures, communication outages, and cyberattacks—24 hours a day, 365 days a year.

【Explanation of Terms】

AI-SOC

Since its founding, SecuAvail has been providing 24/7/365 SOC (Security Operation Center) services for network operations monitoring of enterprises and other organizations. Building on this operational foundation, the company has released the AI-SOC series—monitoring software that leverages its expertise and experience in log analysis and alert management through the use of AI.

Microsoft 365 (M365)

Microsoft 365 is a subscription service (available on a monthly or annual basis) that bundles Office applications such as Word, Excel, and PowerPoint together with Teams (for meetings and chat), OneDrive (cloud storage), and security features. Delivered via the cloud, it provides users with access to the latest versions of these tools anytime, anywhere. By integrating with Azure (Microsoft's cloud platform) and other services, M365 can enhance the value of medical information—for example, in healthcare, it enables the linkage of electronic medical records used by healthcare professionals with patients' daily lifestyle and health data.
