Note 1: The figures above are based on preliminary operating data, and may differ from actual results.

Note 2: Existing store sales data is based on stores that have been continuously operating for at least 12 months as of the end of the month; data from stores that closed or temporarily suspended business during the month are not included.

Note 3: JINS also generates revenue from wholesale, e-commerce, and other operations. Sales growth may thus differ from that reported on the income statement.

■Topics

In June, sales across all of the company's eyewear stores in Japan increased 7.6% year on year, while sales at existing stores were broadly unchanged, decreasing 0.1%.

During the month, customer traffic was affected by adverse weather conditions and one fewer holiday compared with the previous year. Nevertheless, overall sales were supported by ongoing promotional campaigns, enhanced customer service at existing stores, solid inbound demand, and continued strength in higher-priced products.

As of the end of June, the total number of eyewear stores in Japan was 582.
