### [Monthly comment]

In May, net sales totaled 105.2% for existing stores compared with the previous year and 113.3% for all stores.

In May, despite lingering unstable weather, sales for both all stores and existing stores surpassed the previous year's level. This growth was driven by strong sales of summer apparel tracking higher temperatures, strong performance in home appliances—particularly white goods—and solid sales in general merchandise and hobby products.
