Notification of Acquisition of A– Climate Change Score from CDP

MACNICA HOLDINGS is proud to announce our 2025 scores from the international environmental information disclosure platform CDP. We received an A– score in the Climate Change category and a B in the Water Security category.

CDP is an international initiative for assessing climate change measures and information disclosure transparency at major global corporations. MACNICA HOLDINGS' score of A– in the Climate Change category reflects the strong evaluation of our highly transparent disclosure of greenhouse gas emissions, the establishment of emission reduction targets based on scientific grounds (including the acquisition of near-term SBT certification in 2024), the introduction of renewable energy into operations, and strengthening of governance at the management level.

In the Water Security category, we received a B score based on to our processes of risk and opportunity identification as well as our disclosure of water-related opportunity.

MACNICA HOLDINGS will continue to place a high priority on climate-change and water-security initiatives as part of management practices while reducing environmental impact and further enhancing our efforts to realize a sustainable society and increased corporate value.

We have published the CDP scoring results on our corporate website:

Supplemental Information:

CDP is an international nonprofit organization that assesses information disclosure in environmental fields. Recognized by institutional investors worldwide as an important information disclosure platform, its insights are widely utilized. Companies are assessed based on their responses to a questionnaire covering various categories such as climate change, water security and forests, and assigned one of eight scores ranging from A to D–.
