**Announcement Regarding Recognition for All AWS Certifications
Obtained by Our Consolidated Subsidiary
~SynX Employees Selected as “2026 Japan AWS All Certifications Engineers”~**

We are pleased to announce that employees of our consolidated subsidiary, SynX Inc. (Headquarters: Chiyoda-ku, Tokyo; Representative Director and CEO: Junichiro Nishi; hereinafter “SynX”), have been selected as “2026 Japan AWS All Certifications Engineers” under the AWS Partner Network (hereinafter “APN”), a partner program operated by Amazon Web Services (hereinafter “AWS”).

“Japan All AWS Certifications Engineers” is an award program that recognizes AWS engineers employed by companies participating in the APN who hold all AWS certifications. The certifications span 12 fields, requiring advanced technical expertise and broad knowledge across cloud technologies. Furthermore, with the rapid rise of advanced technologies such as generative AI in recent years, the level of skills required has become even more sophisticated. Notably, this marks the second consecutive year that employees of our group have been selected for this program.

SynX provides IT solutions that comprehensively support companies in advancing their digital transformation (DX) by leveraging cutting-edge technologies such as cloud, AI, and IoT. Moving forward, we will further strengthen the development of engineers with advanced technical skills and continue to create sustainable value through the design, implementation, and operation of optimal cloud environments tailored to our customers’ needs.

Our Group, which holds one of the top market shares in Japan for game QA, has identified the domestic Tech sector—centered on non-game software testing—as one of our key growth areas. While we currently view the impact of this matter on our business performance as minimal, we believe that the objective recognition of our advanced technical capabilities and broad expertise in the cloud domain is expected to contribute to enhancing our Group’s technological advantages and overall competitiveness. We will continue to prioritize the recovery of profitability and renewed growth as our top priority, while striving to enhance corporate value on a sustainable basis.

For further details on this matter, please refer to the attached document.

- Three SynX Engineers Selected for the “2026 Japan All AWS Certifications Engineers”

Three SynX Engineers Selected for the “2026 Japan All AWS Certifications Engineers” Program

SynX Inc. (Representative Director& CEO: Junichiro Nishi; Head Office: Chiyoda-ku, Tokyo; Major Shareholder: Pole To Win Holdings, Inc. 100%; listed on the Tokyo Stock Exchange Prime Market [Stock Code: 3657]; hereinafter “SynX”) is committed to developing its engineers and expanding the number of certified professionals in order to further advance the support it provides for building and operating customer systems using cloud technology.

As part of these efforts, we are proud to announce that three of our engineers have been honored as “2026 Japan All AWS Certifications Engineers.”

“2026 Japan All AWS Certifications Engineers” is an awards program for AWS engineers employed by companies participating in the AWS Partner Network (APN) who hold all AWS certifications. This award was announced by AWS at AWS Summit Japan 2026, held in June 2026, and our employees were honored with this recognition.

We will continue to promote the development of engineers with advanced cloud technology skills and strive to provide ongoing value by supporting the design, construction, and operation of optimal cloud environments tailored to our customers’ needs.

■ About SynX

SynX Inc. is an IT partner that supports companies in solving their challenges through business process improvement, digital transformation (DX), and system development.

Centered around “SynX One,” which provides end-to-end development, QA, IT infrastructure, and security services, we have established a one-stop support system for corporate IT challenges.

In our IT infrastructure services, we flexibly support everything from on-premises to cloud, multi-cloud, and hybrid environments. By providing a comprehensive range of services—from design, construction, and migration to operation and optimization—we ensure stable and efficient support for companies’ IT infrastructure.
