GungHo Online Entertainment, Inc.

Co-op PvE Shooter for Steam® 『 B.L.U.E. NOVA 』 Scheduled for release in 2027!

GungHo Online Entertainment, Inc. (Headquarters: Chiyoda-ku, Tokyo, Representative Director, President and CEO: Kazuya Sakai) today announced the release of the co-op PvE shooter 'B.L.U.E. NOVA' for Steam®. The release is scheduled for 2027.

'B.L.U.E. NOVA' (pronounced: Blue Nova) is a new-generation co-op PvE shooter that fuses an overwhelming bullet hell experience with the fun of multiplayer. On a planet migrated to before the 'impending destruction of Earth in 2200,' players select their favorite 'Hero' and customize them with 'Armor' and other equipment to reclaim the future of humanity stolen by the runaway AI 'EVE,' aiming to destroy the 'Master Tower' of the enemy. Players can descend onto the battlefield alone, join up with allies they meet along the way, and enjoy multiplayer cooperation with up to 30 people.

The greatest appeal of this title is the 'Ring System,' which awakens upon encountering other players. By simply entering a ring with allies on the battlefield, the 'Ring System' instantly activates 'Infinite Attack,' allowing for super-strengthened, unlimited bullet firing, providing users with an exhilarating feeling and a new-generation co-op experience not found in conventional shooting games.

The official website, which opened today, provides an overview of the game's world, the heroes that appear, and the game systems. In addition, we have also decided to exhibit at 'Tokyo Game Show 2026,' which will be held at Makuhari Messe (Chiba City, Chiba Prefecture) from Thursday, September 17, 2026, to Monday, September 21, 2026 (national holiday). On the large monitors in our booth, we will be screening the full version of the teaser PV as well as exclusive bonus footage for Tokyo Game Show 2026.

We at GungHo will strive to create high-quality game contents that can be fully enjoyed by game users around the world and expand our business globally, under the philosophy of 'pursuing business operations to take on challenges and create new products.'
