Kanamic Network Co., Ltd.
Representative Director and President,
Takuma Yamamoto
(Securities code: 3939 Tosho Prime)

Selected for the Ministry of Internal Affairs and Communications'
"Demonstration contract for the development of a medical, nursing care and
health information sharing system in Singapore" project

Kanamic Network Co., Ltd. (Head office: Shibuya-ku, Tokyo; CEO: Takuma Yamamoto; hereinafter referred to as "the Company") is pleased to announce that its proposal has been selected for the Ministry of Internal Affairs and Communications' publicly solicited project to "Contract for Demonstration of the Deployment of a Medical, Nursing Care, and Health Information Sharing System in Singapore."

The scale of this project (contract amount) is 113,865,386 yen (tax included), and in addition to surveys and research in Singapore, the work includes demonstration and verification of the cloud system operation in the local environment.

This project aims to verify the usefulness of Japan's information sharing system for health, medical care, and nursing care in Singapore, where the population is rapidly aging, with the aim of overseas expansion and securing an international competitive advantage. Singapore has launched the Healthier SG in July 2023, a preventive medical initiative for citizens aged 60 and over, and this demonstration is expected to contribute to this initiative.

In this project, the company will promote the demonstration by leveraging the following strengths:

- Extensive implementation track record and expertise: Our Kanamic Cloud Service is a multi-disciplinary collaboration cloud service that supports Japan's community-based integrated care system and has been implemented in over 1,300 regions and more than 50,000 businesses nationwide, providing us with many years of operational experience and specialized know-how in medical and nursing care collaboration.
- Strong local relationships: Our group has an IT consulting subsidiary in Singapore, The World Management Pte. Ltd. (hereinafter "TWM"), which has deep local knowledge since its founding in 1980, speaks English and Chinese, is highly adaptable to cultural backgrounds, and has a client base that includes hospitals, clinics, and nursing homes. Our representative director and president, Takuma Yamamoto, also serves as the representative of TWM, enabling us to act quickly and effectively.
- Reliability and advanced technical capabilities: As a company listed on the Tokyo Stock Exchange Prime Market, we have established a strict compliance system and are proud of our advanced information security environment and quality control system, having obtained the "Internal Control Assurance Report for Contracted Services (SOC1® Type 2 Report)," the first in the nursing care software industry, as well as the Privacy Mark certification and the ASPIC Information Disclosure Certification System for the Safety and Reliability of Medical Information ASP/SaaS. We also have a strong track record of participating in government projects, including those of the Ministry of Internal Affairs and Communications.

| In Japan, the "prevention area and mild nursing care needs" are covered by the government and nursing care providers. | | | | | |
|---|---------|---|--|--|---|
| In Singapore, this is handled by medical care (GP clinics) as part of the "HealthierSG" initiative. | | | | | |
| Kanamic's area of expertise falls under the "medical area," so it has a very high affinity. | | | | | |
| Country | Field | Health Level and Stages of Life | | | |
| | | Healthy Phase | Mild Nursing Care Phase | Moderate to Severe Nursing Care Phase | Terminal Phase |
|  Japan | Medical |  |  Treatment Hospitals and Clinics | |  Terminal Care Hospitals/clinics Nursing facilities, care facilities |
| | Nursing |  Preventive Care Government and nursing care offices |  Nursing Care Required Nursing care facility | | |
|  Singapore | Medical |  Preventive Medicine Government/Clinic (HealthierSG※) (Family clinic (GP)) | |  Treatment Hospital and Clinics (Family clinic(GP)・Specialist(SP)) |  Terminal Care Hospitals/clinics Nursing facilities, care facilities |
| | Nursing |  |  |  Nursing Care Required Nursing care facility | |

Fig1. Differences in the DX business field between Japan and Singapore

Through this business, we will verify that Japan's advanced DX model in the fields of medical care, nursing care, and health is applicable and useful in Singapore, and in the future aim to expand this model to the entire ASEAN region (Malaysia, Thailand, Vietnam, etc.) from Singapore as a base. This will contribute to resolving social issues faced by ASEAN countries, such as a shortage of medical and nursing care personnel and rising medical costs in their super-aging societies, and will achieve both "social contribution and economic profit," while also contributing to strengthening the international competitiveness of Japan's medical and nursing care industry.

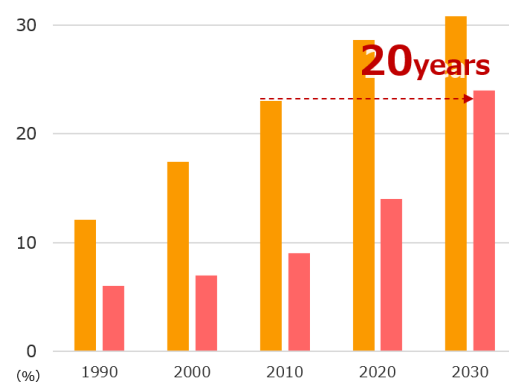

Singapore is experiencing a similar aging trend to Japan, lagging about 20 years behind.

In major ASEAN countries and India, life expectancy is increasing due to factors such as rising economic standards and advances in medical systems. Meanwhile, when looking at Singapore's total fertility rate, it is significantly lower than that of Japan, where a declining birthrate and aging population are becoming a social issue, meaning there will be fewer citizens to support society in the future. However, the population itself continues to grow due to the influx of foreigners. Looking at the social security systems of Southeast Asian countries, only Singapore has a nursing care insurance system. As the aging population becomes more serious in the future, it is expected that there will be increased efforts to improve social security, and this is expected to accelerate in Singapore and Thailand, where the problem is particularly severe.

Comparison of the situation in Japan and Singapore

| | Japan | Singapore |
|--|------------------------|------------------|
| Population (2023) | 125 Million | 6.0 Million |
| GDP per Capita (2023) | USD33,806 | USD84,734 |
| Total Fertility Rate | 1.30 | 1.02 |
| Average Life Expectancy | 84.8 | 82.8 |
| Aging Rate (Year 2021→2050) | 30% → 38% | 14% → 34% |
| Number of working adults supporting one elderly (Year 2021→2050) | 2.0 → 1.4 | 5.2 → 1.6 |
| Social Security System | Medical Insurance | ○ |
| | Pension Insurance | ○ |
| | Nursing Care Insurance | ○ |

■ Aging trends in each country

■Future Outlook

Our company will be executing a contract for the Ministry of Internal Affairs and Communications' FY2025 project "Contract for Demonstration of the Deployment of a Medical, Nursing Care, and Health Information Sharing System in Singapore." However, the impact on our business performance is not expected until next fiscal year.

■About Kanamic Cloud Service

This is a regional collaboration cloud service that enables multi-professional collaboration between local governments, medical associations, and nursing care service providers, in order to contribute to the realization of a "community-based comprehensive care system" required in a super-aging society. We provide an information sharing system aimed at collaboration between multi-professional organizations and other corporations, as well as a business system for nursing care providers.

■About The World Management Pte Ltd.

A Singapore-based IT consulting company established on January 2, 1980, providing implementation consulting and maintenance services for back-end systems such as sales management, inventory management, and accounting management.
