Notice Concerning Revision to Forecast for Year-End Dividend (Commencement of Dividend Payments)

PKSHA Technology Inc. (the "Company") hereby announces that, at the meeting of its Board of Directors held on July 31, 2026, it resolved to revise the forecast for dividend per share as set forth below.

1. Reasons for the Revision to the Year-End Dividend Forecast

The PKSHA Technology Group (the "Group") has adopted " giving shape to the software of the future" as its mission and, with a view to realizing the "co-evolution of people and software" works to solve a wide range of social issues and create added value through the social implementation of proprietary algorithms and AI developed in-house. With the aim of achieving this mission at an early stage and maximizing corporate value over the medium to long term, the Company has, since its listing, prioritized allocating the profits it has earned to growth investments, including the advancement of research and development, the acquisition of talented human resources, and M&A aimed at achieving discontinuous growth.

Against this backdrop, the Group's business has continued to expand steadily, and the Group has established a robust earnings base built on continuous and stable recurring revenue, including the provision of AI algorithms and AI SaaS products. In addition, the dramatic evolution of AI technologies, including large language models (LLMs), has led to a rapid increase in demand for the social implementation of AI across virtually all industries. In light of these developments, the Company has determined that it has now established both the financial foundation and the cash-flow generation capabilities necessary to continue securing sufficient internal funds for strong growth investment in the social implementation of AI toward the realization of its mission, while at the same time providing direct returns to shareholders.

Accordingly, in appreciation of shareholders' continued support and with the aim of further enhancing capital efficiency, the Company has decided to commence dividend payments for the first time since its listing, and has revised its forecast for the year-end dividend for the fiscal year ending September 30, 2026 to ¥10.00 per share.

With respect to future profit distribution, amid the extremely rapid pace of technological innovation in the AI field, the Company will continue to prioritize the allocation of funds to growth investment aimed at maximizing corporate value over the medium to long term in order to continue shaping the "software of the future." On this basis, the Company's basic policy will be to comprehensively consider the progress of business results in each fiscal year, future investment plans such as M&A, and the status of cash flows, among other factors, responding flexibly as circumstances require, while striving to implement stable and continuous dividend payments.

2. Details of the Revision

	Annual Dividend per Share, Yen		
	End of 2nd Quarter	Fiscal Year-End	Total
Previous Forecast	-	0.00	0.00
