Regarding the Security Incident at Our Company (Third Report: 4pm, May 23)

Resonac Holdings Corporation (hereinafter referred to as "our company") previously announced on our website the first report on May 20 and the second report on May 21 regarding a security incident that occurred at our company. Our emergency response headquarters has been investigating the scope of the impact and working diligently to restore systems and resume normal operations as soon as possible.

We sincerely apologize for the great concern and inconvenience caused to our business partners and related parties. While it will take some more time to fully understand the scope of the damage and restore operations, we provide the following update on the current situation.

1. Incident Overview

In the early hours of Tuesday, May 20, an external attack was detected on some of our servers and those of our group companies. Subsequently, we confirmed the presence of ransomware. In response, we promptly initiated an investigation with the assistance of external specialists and established an emergency response headquarters to address the situation.

As part of our countermeasures, we implemented network isolation measures, which resulted in partial system unavailability within our company and group, leading to disruptions in business operations.

As of 8am, Wednesday, May 21, we continued measures to prevent further damage, protect and restore our systems, and minimize impact on stakeholders. We also reported the incident to law enforcement and coordinated with relevant government agencies.

2. Current Status and Future Actions

Starting Friday, May 23, we have begun gradually resuming operations for certain businesses where safety has been confirmed. While complete recovery is expected to require additional time, the entire company is working together to expedite the process.

We are still carefully assessing the potential impact of this incident on our business performance. Should it be determined that there will be a significant effect, we will make a prompt disclosure.

Once again, we sincerely apologize for the inconvenience and disruption caused to our business partners and all those concerned.
