

## **PRESS RELEASE**

April 28, 2026  
BlueMeme Inc.

# **BlueMeme and TDI Enter into Capital and Business Alliance Agreement**

## **Collaborating on Joint Expansion of Low-Code Business, Generative AI-Driven Legacy Migration, and Quantum AI Bioinformatics**

BlueMeme Inc. (Headquarters: Chiyoda-ku, Tokyo; Representative Chairman & President: Masanori Matsuoka; hereinafter "BlueMeme") and TDI Co., Ltd. (Headquarters: Shinjuku-ku, Tokyo; Representative President: Ichiro Miyoshi; hereinafter "TDI") have entered into a capital and business alliance agreement on April 24.

Through this alliance, the two companies will jointly promote mid-to-long-term growth strategies in the DX and advanced technology sectors. This includes expanding existing low-code development businesses, launching a migration business for legacy systems using generative AI, and making new investments in the field of bioinformatics utilizing quantum AI.

### **Background and Objective**

The primary challenge for Japanese companies in promoting digital transformation (DX) is the combination of a worsening shortage of IT talent and the persistence of legacy systems with bloated maintenance and operation costs. Simultaneously, advancements in technologies such as generative AI and quantum computing are fundamentally altering business processes and the potential for new ventures.

BlueMeme possesses a leading domestic track record in supporting in-house development through its "AGILE-DX" methodology, which centers on low-code development platforms. TDI brings years of experience in large-scale system integration, a broad customer base, and strong investment power in advanced technologies, including recent success in low-code development and migration. By leveraging their complementary strengths, the two companies aim to build a new business structure that accelerates DX for clients beyond the scope of traditional contract development.

### **Details of the Alliance**

#### **1. Joint Expansion of Low-Code Business**

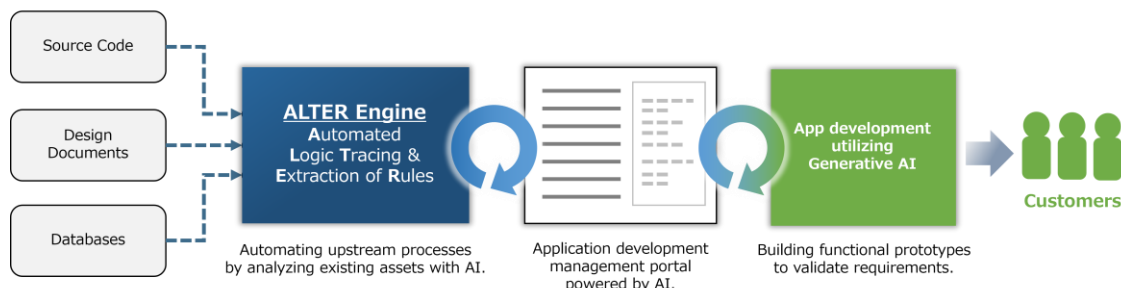

By combining BlueMeme's low-code development methodology and training programs with TDI's extensive customer base and delivery systems, the companies will significantly scale their low-code development services. They will pursue joint project development, mutual engineer training, and joint solution development to establish a solid position in the domestic low-code market.

#### **2. New Generative AI-Driven Legacy Migration Business**

Legacy systems based on COBOL or older frameworks remain a major bottleneck for

DX in many Japanese companies. The two companies will launch a joint business utilizing generative AI to automate legacy code analysis, specification regeneration, and conversion to modern architectures. Combining BlueMeme’s low-code/agile methods with TDI’s large-scale SI experience, they will offer migration services that drastically reduce duration and costs compared to traditional methods.

Accelerating legacy migration by **using AI to analyze business systems** through source code, design documents, and databases.

### 3. New Investment in Quantum AI-Powered Bioinformatics

Bioinformatics—encompassing drug discovery, genomic analysis, and protein structure prediction—requires immense computational resources that challenge the limits of classical computing. The two companies will jointly invest in creating new business opportunities by integrating quantum computing and AI ("Quantum AI"). This is positioned as a key strategic area for mid-to-long-term growth.

#### Future Outlook

Moving forward, BlueMeme and TDI will accelerate their entry into technical domains and business scales that would be difficult to achieve independently. By focusing on low-code, generative AI, and quantum AI, the companies aim to create new value and contribute to the international competitiveness of Japan’s IT industry.

The impact of this alliance on the consolidated earnings forecast for the fiscal year ending March 2026 is expected to be minor. Forecasts for the fiscal year ending March 2027, incorporating the impact of this alliance, will be announced in May during the financial results announcement for FY2026.

#### Company Profiles

##### TDI Co., Ltd.

- **Representative:** Representative President Ichiro Miyoshi
- **Location:** Shinjuku I-Land Tower,6-5-1, Nishi-Shinjuku, Shinjuku-ku, Tokyo
- **Established:** September 1968
- **Capital:** 1.351 billion JPY
- **URL:** <https://www.tdi.co.jp>

##### BlueMeme Inc.

- **Representative:** Representative Chairman & President Masanori Matsuoka
- **Location:** 3-20 Kanda Nishiki-cho, Chiyoda-ku, Tokyo
- **Capital:** 974,707,376 JPY (as of Feb 28, 2026)
- **Business Launched:** August 2009 (Established in December 2006 as an asset

management company; business launched under the current representative)

- **Listed Market:** Tokyo Stock Exchange Growth (Ticker: 4069)
- **URL:** <https://www.bluememe.jp/>

### **Trademarks**

All company and product names mentioned herein are the registered trademarks or trademarks of their respective owners.
