## G-Next holds site visit and final talks with Eleveight AI in terms of strategic partnership leveraging Eleveight AI cloud services ~Project draws increasing attention as the most advanced private initiative in Armenia's emerging AI Hub~

---

G-Next Co., Ltd. (Headquarters: Chiyoda-ku, Tokyo; CEO: Minoru Murata; Stock Code: 4179; hereinafter "G-Next") visited the Republic of Armenia to further deepen its strategic business alliance with Eleveight AI (Headquarters: Yerevan, Republic of Armenia; CEO: Arman Aleksanian; hereinafter "Eleveight AI"), a company developing next-generation AI data center infrastructure, announced the formation of the alliance earlier in mid-2025. We confirmed final preparations are underway for the full-scale launch of AI cloud service starting early 2026 as well as conducted a site inspection of the data center infrastructure.

### Overview of Local Discussions and AI Data Center Site Visit

During the site visit, We inspected the datacenter being developed in the village of Gaghar, Republic of Armenia with maximum capacity of 20MW, revised to feature NVIDIA DGX B300 (Blackwell Ultra GPU). Key facilities for operational readiness, including power and communication infrastructure, cooling equipment, uninterrupted power supply etc. were confirmed.

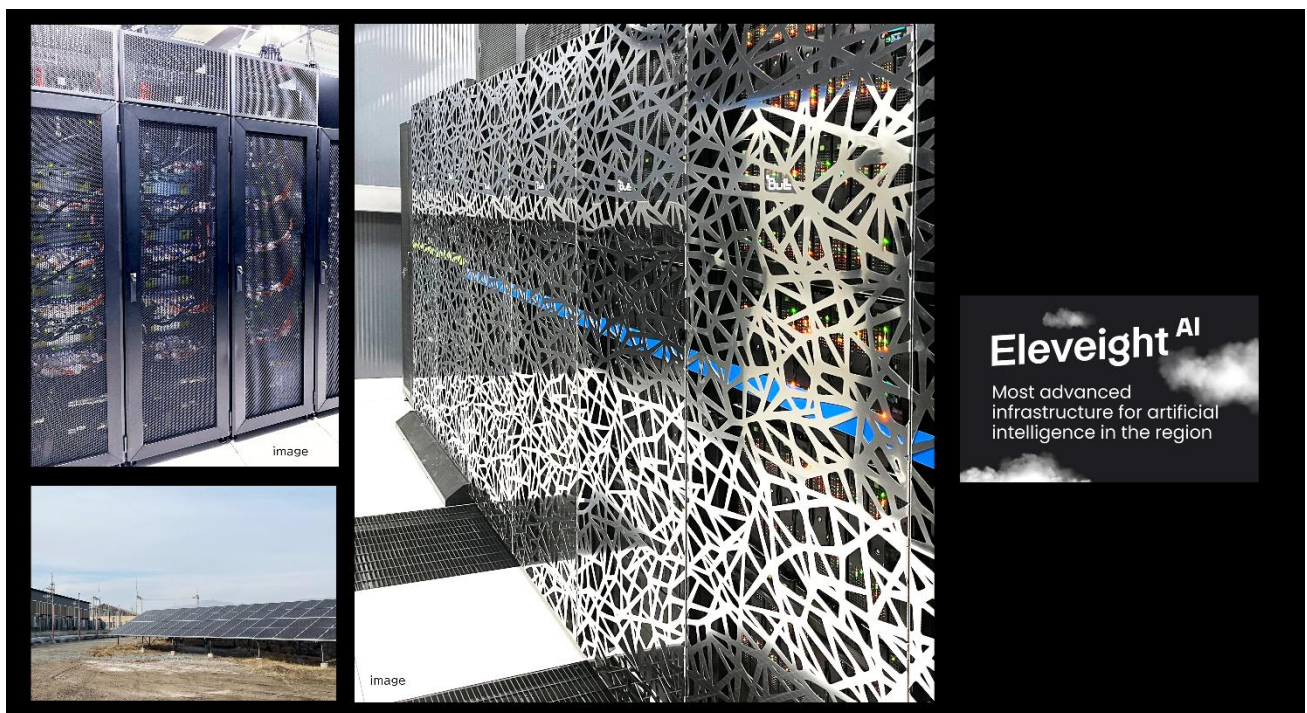

It was verified that finalization is progressing smoothly and is on track to support launch early in 2026.

Following the inspection, discussions with Eleveight AI CEO Arman Aleksanian confirmed the strategy for joint efforts on the following points:

- Final adjustments for commercial launch of AI cloud service (rental services, ready to go products and solutions ) starting early next year.

- Establishment of an AI infrastructure provision model specifically for Japanese companies.
- Utilization of AI computing power to support data analysis platform for G-Next's product, Discoveriez.
- Strengthening joint projects and technological collaboration concerning AI solutions.

Based on this collaboration with Eleveight AI, G-Next will support the advancement of AI adoption and sophisticated data utilization for Japanese companies.

#### International Coverage Confirms Armenia's Rise as an AI Hub

In recent years, Armenia has been accelerating the development of its AI infrastructure as a national strategy, attracting international attention. A report by Eurasianet highlighted that a "large-scale AI data center project is underway after US authorities approved the transfer of NVIDIA chips," confirming through a third party the country's growth as an AI hub.

Amidst this trend, Eleveight AI's project is positioned as the most advanced private initiative that has moved into the actual construction phase.

## OVERVIEW OF ELEVEIGHT AI AND DATA CENTER

### [Eleveight AI]

Company Name : Eleveight AI

Founded : 2025

Head Office : Yerevan, Republic of Armenia

Company Information: Eleveight AI is dedicated data cluster under DIGI Data – the largest colocated data center in Armenia. Leveraging the technological and infrastructural foundation of DIGI Data, the project ensures high reliability, scalability, and full compliance with the most advanced industry standards.

Website : <https://eleveight.ai/>

### [Data Center]

Location : Gagarin Village, Republic of Armenia

Site Area : Approximately 10,000 square meters (including solar power plant)

Building Area : Approximately 2,500 square meters

Building Type : Data center (strategically important facility approved by the Armenian government)

Facility Power : Maximum 20MW

Power Source : Company-owned solar power plant for fully renewable energy operation and electrical substations connected to alternative energy grids.

Completion Date : March 2025

Services : Colocation service (equipped with high-performance NVIDIA DGX B300)

### [G-Next]

Head Office : 3F, HB Hirakawacho Building, 2-8-9 Hirakawacho, Chiyoda-ku, Tokyo

Representative : CEO Minoru Murata

Established : July 2001
