In appropriating profits, the Company gives consideration to all aspects, including returns of profits to shareholders, investments and loans to accelerate further growth and expansion, and allocations to research and development, etc. for creating new and innovative technology.

With regard to shareholder returns, the Company targets a total return ratio, which is the ratio of combined dividends and share buybacks to net income attributable to owners of the parent, of 40% or higher, and targets a dividend on equity ratio (DOE) attributable to owners of the parent, of 3.0% or higher.

After giving comprehensive consideration to various matters including performance results for the fiscal year under review and the outlook for the future business environment, the Company proposes that the year-end dividend be as follows.

(1) Type of dividend property

Cash

(2) Allocation of dividend property and total amount thereof

We propose a year-end dividend of ¥37.5 per share. The total amount of dividends are projected to be ¥13,803,722,738.

(3) Effective date of dividends from surplus

June 25, 2026

Reference:

<Transition in total return ratio>

(Reference) Total return ratio = (Total shareholder dividends + Total share buybacks) / Net income attributable to owners of the parent
 DOE = Total shareholder dividends / Equity attributable to owners of the parent

* Effective January 1, 2026, the Company conducted a two-for-one stock split of its common stock. In the above graph of dividends by year, the dividend per share is calculated on the assumption that the stock split was conducted at the beginning of fiscal year 2021.
