Forward-looking statements in this script are not guarantees of future results or performance. Such forward-looking statements involve known and unknown risks and uncertainties that could cause actual future results and financial condition to differ materially from any future results or outcome expressed or implied by such forward-looking statements. Factors that could cause actual results to differ materially from those described in these statements include, but are not limited to, changes in national and international economic conditions and trends in the industries in which we operate. This transcription has been prepared for informational purposes only. It is not intended as an offer to sell or a solicitation of an offer to buy any securities in Japan, the United States or elsewhere.

First, we will explain our Business Overview.

Construction investment is expected to expand from 68 trillion yen in FY2025 to 84 trillion yen in FY2035. This is driven by urban redevelopment, infrastructure development, and national resilience. Demand is clearly on an increasing trend.

On the other hand, the workforce will decrease. The number of skilled workers required in 2035 is 3.93 million. In contrast, the forecasted number of workers is 2.64 million. It is estimated that there will be a shortage of 1.29 million workers.

Demand will grow, but there are not enough people. There is no way to fill this structural gap other than improving productivity at the site. We expect that our business opportunity is exactly this gap itself.

To address these challenges in the construction industry, we offer three services: site management software (SaaS), BPO services that handle site operations, and professional services providing customized development and consulting.

These services consist of approaches that we expect to be essential for solving challenges in the construction industry, featuring our ability to provide comprehensive solutions to industry issues.

Growth Strategy

Deeply penetrating customers' business processes, starting from the site

© SpiderPlus & Co. Securities Code :4192

5

The core of our growth strategy is the concept described in the document as the "Penetration Cycle."

The core is "SPIDER+Workspace," a group of integrated site management software that aggregates industry knowledge. We are expanding software and functions from the three perspectives of "Human resource," "Quality," and "Materials & Equipment," which are important areas at the site.

With "SPIDER+Workspace" at the core, our growth strategy is to create a penetration cycle within customers and the industry by combining it with BPO services and professional services.

Management Policy

Medium-term Strategy

From a SaaS company to an "infrastructure company" that broadly solves site issues

- Advance new software development to build growth with a CAGR of 20% and above by FY2028, aiming for Net Sales of 2.0 billion yen in the solution area through BPO, professional services, etc., and a consolidated Operating profit margin of 10% and above

FY2026 Key Measure 1

Promotion of the "Workspace Concept" and focused investment in the product foundation

- Resolve constraints on improvement speed and scalability caused by the accumulation of added functions (changed development policy at the end of 2024)
- Concentrate investment in new feature development based on the "Workspace Concept," the product foundation, and new apps
- Gradually revise pricing and plan structures in line with the enhancement of provided value

FY2026 Key Measure 2

Expanded the business portfolio by strengthening the solution area

- Accelerate growth in the solution area by expanding the structure for BPO and professional services
- Expand service areas by promoting alliances and M&A (Capital and business alliance with Infomart Corporation in May 2026)

Here is our management policy.

First, as our medium-term strategy, we aim to transition "from a SaaS company to an infrastructure company that broadly solves site issues."

As our medium-term financial targets, we aim to build a growth trajectory with a CAGR of 20% or more by FY2028, targeting Net Sales of 2 billion yen in the solution domain through BPO and professional services, and achieving high profitability with a consolidated operating profit margin of 10% or more.

On that basis, there are two key initiatives for FY2026.

The first key initiative is promoting the "Workspace Concept" and making concentrated investments in our product foundation.

To resolve constraints on speed of improvement and scalability caused by the cumulative addition of functions, we changed our development policy at the end of 2024. Currently, we are concentrating on developing new features based on the Workspace Concept and investing in our product foundation and new apps. At the same time, we are proceeding with a gradual revision of our pricing and plan structure in line with the increased value provided.

The second key initiative is expanding our business portfolio by strengthening the solution domain. In addition to expanding our structure for BPO and professional services, we will broaden our service domain through alliances and M&A. The capital and business alliance concluded with Infomart in May of this year is also based on this policy.

FY2026.Q2 Financial Results Overview

Now, let's move on to the overview of the financial results for FY2026 Q2.

SpiderPlus & Co.

FY2026.Q2 Highlights

Quarterly Net Sales / Operating profit	ARR (YoY Growth)
1,374 million yen / 84 million yen - Net Sales: YoY +15%, cumulative 2,642 million yen (progress rate 45% / full-year forecast 5,900 million yen) - Operating profit: Cumulative 89 million yen, exceeding the full-year forecast of 50 million yen (profitability improvement through investment control and AI utilization) - Performance forecast: Unchanged. We will assess the costs associated with investment in the product base in the second half, order status, etc., and revise as necessary.	5,205 million yen (+8%) - Net ARR growth: Negotiations accumulated since the second half of the previous year have progressed steadily, expanding the net ARR growth from current customers. - Price revision: Revised some prices in July 2026 (increased server prices). - July standalone: Exceeded YoY +10%^{*1} due to the transition to the new plan and price revision, expecting acceleration toward the fiscal year-end.
Business Topics - Jointly developed the "Finishing Inspection Voice Input AI Function" with Konoike Construction, a large enterprise general contractor. - Developed a "Workflow Function" for the information sharing service "S+Collabo" to digitize approval requests and authorization operations. - Concluded a capital and business alliance with Infomart, and started providing services in the new order and receipt management area. - Decided to suspend operations based on the business progress of the Vietnam subsidiary; Overseas business will continue as a growth strategy from a long-term perspective^{*2}.	

*1: Preliminary monthly financial results before the accounting audit.
*2: Notice Regarding Suspension of Business at Consolidated Subsidiary (Vietnam Subsidiary) (Japanese only) (Disclosed on May 27, 2026)
<https://contents.xj-storage.jp/contents/AS81382/6963aa92/d6ec/48cc/abc2/657ea086656c/140120260526548550.pdf>

© SpiderPlus & Co. Securities Code:4192
8

For the Q2 of FY2026, Net Sales were 1,374 million yen, and Operating profit was 84 million yen for the quarter. For the first half cumulatively, Net Sales were 2,642 million yen, and Operating profit was 89 million yen.

Regarding the progress against the forecast, Net Sales are progressing as usual, and Operating profit for the cumulative Q2 period has exceeded the forecast of 50 million yen.

On the other hand, we have left the forecast unchanged as of Q2. This is to carefully assess the expenses associated with the investment in the product foundation in the second half, as well as the order status. We plan to revise the forecast as necessary, taking into account the progress of the product foundation investment and other factors.

The SaaS ARR, which is our KGI, was 5,205 million yen, and the growth rate was +8% YoY.

In addition, as part of a partial revision of our pricing and plan structure in July of this year, we revised our server prices. Due to the effects of the transition to the new plan and the price revision, the ARR growth rate for the single month of July has recovered to over 10% YoY. Please note in advance that this figure is a preliminary figure aggregated on an internal managerial accounting basis and is not a finalized figure (We will also add that it is a figure prior to audit and review by an auditing firm). We expect this to accelerate further toward the end of the fiscal year.

There are four business topics: the joint development of the "Finishing Inspection Voice Input AI Function" with Konoike Construction Co., Ltd., a major general contractor; the development of the "Workflow Function" for the information sharing service "S+Collabo"; the capital and business alliance with Infomart and the launch of services in the ordering and receiving management domain; and the decision to suspend the business of our Vietnam subsidiary.

Furthermore, we plan to continue Overseas business itself as a medium-to long-term growth strategy.

This is regarding the trends in Net Sales and Operating profit.

Regarding Net Sales, in addition to ARR growth, contract development projects in professional services contributed, with the growth rate rising to +15% YoY.

Regarding Operating profit, profitability improved due to the effects of investment control and AI utilization.

ARR increased mainly due to ARR growth from existing customers, driven by progress in business negotiations that had accumulated through the previous quarter.

ARR for FY2026 Q2 reached 5,205 million yen, up +8% YoY, representing a net increase of 171 million yen from 5,033 million yen at the end of the previous quarter.

Regarding the breakdown: the ARR increase from existing customers was 165 million yen, the increase from new customer acquisition was 62 million yen, and the decrease due to churn was 56 million yen, making growth from existing customers the primary driver for the expansion of the net increase.

This is the result of major negotiations accumulated since the second half of the previous year sequentially closing as upsells.

As mentioned earlier, in terms of results for the single month of July (preliminary figures on a managerial accounting basis), the ARR growth rate has re-accelerated to over 10%. The figure of +8% for the FY2026 Q2 ARR growth rate reflects results strictly as of the end of June.

As a trend, signs of change are already visible. Confirming this re-acceleration of ARR growth is the most important point we wish to convey in these financial results.

ARPA

SpiderPlus & Co.

ARPA increased for both Large enterprises and SMBs due to the progress of accumulated negotiations. ARPA growth is expected from the second half onwards, driven by the transition to the new plan and the July price revision.

*1: ARPA is calculated by dividing the ARR at the end of each quarter by the number of contracted companies at the end of the same quarter.
*2: Large enterprises and SMBs are classified based on our customer management standards, such as having 300 or more employees.
© SpiderPlus & Co. Securities Code:4192

11

Regarding ARPA.

ARPA was 188 thousand yen, +2% YoY. This was an increase of 5 thousand yen from 183 thousand yen in the previous quarter.

Looking by company size, Large enterprise was 744 thousand yen, an increase of 47 thousand yen from 697 thousand yen in the previous quarter. SMB was 82 thousand yen, which also increased by 3 thousand yen from the previous quarter. ARPA has increased for both Large enterprise and SMB, showing that the progress of accumulated business negotiations is also reflected in the unit price.

For the second half and beyond, we expect further growth in ARPA based on the progress of the transition to the new plan and the server price revision implemented in July.

Contracted Company

SpiderPlus & Co.

Number of New contracted companies and churn rate progressed at the same level YoY.

© SpiderPlus & Co. Securities Code: 4192

12

The number of contracted companies was 2,297, +6% YoY. New contracted companies in FY2026 Q2 were 119, and the acquisition pace of new contracted companies remains at the same level YoY.

The monthly churn rate averaged 1.1% over the past 12 months. This is also at the same level YoY.

Consolidated Balance Sheet

SpiderPlus & Co.

Unit : Millions of yen (rounding down to the nearest unit)	FY2025.Q4 (consolidation)	FY2026.Q2 (consolidation)
Cash and deposits	2,477	2,257
Other current assets	779	780
Current assets	3,257	3,038
Software	373	292
Software in progress	52	283
Other fixed assets	480	464
Fixed assets	905	1,040
Total assets	4,162	4,079
Borrowings	836	757
Other liabilities	663	608
Total liabilities	1,500	1,366
Total net assets	2,662	2,712
Equity ratio	64.0%	66.5%
Reference: Capital stock*1	2,513	13

Cash and deposits

- Decreased compared to the end of the previous fiscal year, primarily due to development investments and the repayment of borrowings

Software in progress

- Increased compared to the end of the previous fiscal year, due to the development of new functions for SPIDER+, etc

Net assets

- Established a stable financial base with an equity ratio of 66.5%
- Completed capital reduction and deficit coverage procedures aimed at ensuring agility and flexibility in capital policy*1

*1: Notice Regarding Reduction in the amount of share capital and legal capital surplus, and transfer of other capital surplus (disclosed on February 12, 2026)
<https://contents.s3.amazonaws.com/contents/4581352/170913440173c44f1a3c5ef50d15009278bc1401207060712557953.pdf>

© SpiderPlus & Co. Securities Code: 4192

14

This is regarding the financial condition.

The balance of cash and deposits is 2,257 million yen. Although operating cash flow is positive, it has decreased from the end of the previous fiscal year due to the execution of development investments and the repayment of borrowings.

Software in progress is 283 million yen, an increase from 52 million yen at the end of the previous fiscal year. This is due to the capitalization of investments in the development of new features for SPIDER+, especially the product foundation, which is exactly the preparation for growth in the second half and beyond.

Net assets are 2,712 million yen, and the equity ratio is 66.5%. We maintain a stable financial foundation.

Furthermore, procedures for capital reduction and deficit disposition aimed at ensuring the agility and flexibility of our capital policy have been completed. This broadens our options for future capital policies.

Consolidated Statements of profit and loss				SpiderPlus & Co.		
Unit: Millions of yen (rounding down to the nearest unit)	FY2026.Q1 Accounting period (consolidation)	FY2026.Q2 Accounting period (consolidation)	QoQ	FY2025.Q2 Cumulative period (consolidation)	FY2026.Q2 Cumulative period (consolidation)	YoY
Net sales	1,268	1,374	+8.4%	2,360	2,642	+12.0%
Stock Net Sales	1,249	1,284	+2.8%	2,334	2,533	+8.6%
Spot Net Sales	19	89	+366.3%	26	108	+315.8%
Gross profit	939	994	+5.9%	1,723	1,934	+12.2%
Gross profit margin	74.1%	72.4%	-1.7pt	73.0%	73.2%	+0.2pt
SG&A expenses	934	910	-2.6%	1,752	1,845	+5.3%
SG&A expenses ratio	73.7%	66.2%	-7.5pt	74.3%	69.8%	-4.4pt
Operating profit	5	84	+1,563.9%	-29	89	-
Operating profit margin	0.4%	6.2%	+5.8pt	-1.2%	3.4%	+4.6pt
Ordinary profit	5	83	+1,436.7%	-33	89	-
Extraordinary loss ^{*1}	-	38	-	-	38	-
Profit before income taxes	5	44	+725.6%	-33	50	-
Net income	1	39	+2,243.7%	-38	41	-
EBITDA^{*2}	54	133	+146.2%	53	188	+254.4%
EBITDA margin	4.3%	9.7%	+5.5pt	2.3%	7.1%	+4.9pt

Net sales

- In addition to recurring Net Sales growth driven by ARR growth, spot Net Sales also contributed to growth along with the progress of joint development through professional services

Gross profit

- In FY2026 Q2, the gross profit margin decreased due to the recording of Net Sales from a specific contract development project with a relatively low profit margin
- The impact of this project is temporary, aiming to secure the planned level (gross profit margin of 73% and above) for the full year

SG&A expenses

- The SG&A ratio improved due to Net Sales growth, investment control, etc

Extraordinary loss

- Recorded an impairment loss for some functions due to revising development priorities, etc., accompanying the concentration of investment in the product base^{*1}

*1: Notice Regarding the Recording of Extraordinary Loss (disclosed on August 12, 2026) <https://contents.sj-storage.jp/contents/AS61362/155a7932/4043/4287/9597/45e8d62e83cw140120260811517475.pdf>

*2: EBITDA is calculated as operating profit plus depreciation and amortization.

© SpiderPlus & Co. Securities Code:4192

We will explain four key points regarding the statement of income.

First is Net Sales. For the quarter, Net Sales were 1,374 million yen, +8.4% QoQ. In addition to the growth in recurring revenue driven by ARR growth, spot sales grew significantly to 89 million yen due to progress in contract development through professional services. As spot sales were 19 million yen in the previous quarter, this was a quarter with a significant contribution from spot sales.

Second is the gross profit margin. The quarterly gross profit margin was 72.4%, -1.7 percentage points QoQ. The reason for this was the recognition of sales from specific

contract development projects with relatively low profit margins. Although profit margins for contract development vary by project, we select projects with a target gross profit margin of 73% or higher, including the SaaS business. Even in the expansion phase of the solution domain, we will continue to manage our portfolio to maintain this level.

Third is SG&A expenses. Quarterly SG&A expenses were 910 million yen, -2.6% QoQ. The SG&A ratio was 66.2%, an improvement of 7.5 percentage points from the previous quarter. This is the result of revenue growth and effective investment control.

Fourth is extraordinary loss.

During the cumulative quarter period, an impairment loss of 38 million yen was recorded as an extraordinary loss.

There are two main reasons. First, we carried out a revision of the scope of initiatives for projects promoted to streamline operations. Second, while advancing development investments in the product foundation, the expected usability for certain features under development decreased. As a result, a portion of the investment amount was no longer expected to be recovered, so the book value of the relevant assets was reduced to the recoverable amount.

[Reference] Notice Regarding the Recording of Extraordinary Loss

<https://contents.xj-storage.jp/xcontents/AS81382/155b7832/4043/4287/9f97/45e8d62e83ca/140120260811517475.pdf>

In addition, cumulative EBITDA was 188 million yen and the EBITDA margin significantly improved to 7.1%.

This is regarding gross profit.

Although the quarterly gross profit margin for FY2026 Q2 declined compared to the previous quarter due to the impact of specific contract development projects, progress for the cumulative period is at the planned level. The marginal profit ratio remains at a high level of 83.0%.

This is regarding SG&A expenses.

We are also working on internal operational efficiency using AI. As the effects of improved productivity are emerging in our results, we are implementing a revision and optimization of our hiring plan. ARR per employee reached 19.9 million yen, rising to a record high level.

Regarding recruitment, we plan to continue necessary growth investments—such as positions and departments to be selectively strengthened—while increasing productivity. After increasing productivity, we will concentrate personnel allocation where investment is needed. Please understand that we are switching to this operation.

Consolidated Statements of Cash Flows

SpiderPlus & Co.

Unit : Millions of yen (rounding down to the nearest unit)	FY2025.Q2 (consolidation)	FY2026.Q2 (consolidation)
Cash Flows from operating activities	-13	97
Investment Cash Flow	-16	-246
Free Cash Flow	-29	-149
Financial Cash Flow	-67	-71
Effect of exchange rate changes on cash and cash equivalents	-0	2
Net increase (decrease) in cash and cash equivalents	-96	-219
Cash and cash equivalents at beginning of year	2,740	2,477
Cash and cash equivalents at end of year	2,644	2,257

Operating Cash Flow

- Increase primarily due to recurring Net Sales growth driven by ARR growth

Cash flows from investing activities

- Executed development investments for SPIDER+ with self-funding, without relying on capital increases or additional borrowings
- Started from the product strategy update at the end of 2024, announced the SPIDER+ Workspace concept in 2025, and sequentially launched functions from November of the same year
- Concentrated development investment on the product base supporting the Workspace concept in the first half of 2026

Cash flows from financing activities

- The main component of cash flows from financing activities was expenditure from the scheduled repayment of borrowings

19

This is regarding cash flows.

Operating cash flow was 97 million yen, turning positive from -13 million yen in the same period of the previous year, mainly driven by the growth in recurring revenue due to ARR growth.

Investing cash flow was -246 million yen, mainly due to expenditures for development investments in the product foundation. These investments were executed using internal funds, without relying on capital increases or new borrowings.

Financing cash flow was -71 million yen, mainly due to expenditures for scheduled repayments of borrowings.

FY2026.Q2 Business Topics

© SpiderPlus & Co. Securities Code:4192

20

Here are our business topics.

Development of "Workflow Function" for Information Sharing Service "S+Collabo"^{*1,2} SpiderPlus & Co.

A new function to centrally manage on-site application and approval processes.

Based on the Workspace concept^{*3}, positioning S+Collabo as the operational platform for on-site communication.

*1: S+Collabo service introduction page <https://spider-plus.com/functions/s-collabo/>

*2: Development of "Workflow Function" for Information Sharing Service "S+Collabo" (Disclosed on July 28, 2026) <https://contents.s-storage.jp/contents/AS81382/4/6e9d5c5e574972a1044a3696192cc14012026072850988.pdf>

*3: Sequential launch of the integrated platform "SPIDERPLUS Workspace" (Disclosed on July 8, 2025)(Japanese only) <https://contents.s-storage.jp/contents/AS81382/2/a85510/876d418d81e1af50d9e1b43381401120250708509876.pdf>

© SpiderPlus & Co. Securities Code:4192

21

First is the development of the "Workflow Function" for the information sharing service "S+Collabo".

S+Collabo is a service that centrally manages on-site communication, from Partner Companies to craftsmen. It supports communication unique to construction sites, such as

broadcast announcements to the site via chat, as well as instructions and reports through drawings and photos.

The workflow function developed this time centrally manages on-site application and approval processes. A key feature is its ability to manage approval requests not only internally, but also including those with Partner Companies.

Based on the Workspace Concept, this is an initiative to elevate S+Collabo into an operational foundation for on-site communication more than ever before.

Going forward, we will continue to advance the development of new features and services, aiming to become an integrated site platform.

Jointly develops "Finishing Inspection Voice Input AI Function" with Konoike Construction ^{*1} SpiderPlus & Co.

Professional services to enhance the value provided by SPIDER+ and accelerate the promotion of utilization and the expansion of introduction.

Address increasingly sophisticated DX needs with professional services

Enhance the provided value of SPIDER+ and achieve deep penetration into business processes

SPIDER+ Finishing inspection function × Voice input × AI

*1: SpiderPlus & Co. jointly develops "Finishing Inspection Voice Input AI Function" with Konoike Construction (disclosed on June 15, 2026)
<https://contents.s-spiderplus.jp/contents/6581352b718fb3e7b034ee0b1eaf22aa17f5aa24140120260517266926.pdf>
© SpiderPlus & Co. Securities Code:4192

Next is the joint development of the "Finishing Inspection Voice Input AI Function" with Konoike Construction Co., Ltd., a major general contractor. This combines voice input and AI with SPIDER+'s finishing inspection function.

There are two strategic aims for this initiative. The first is to enhance the value provided by SPIDER+ itself and deepen its penetration into operational processes. The second is to create revenue opportunities in the solution domain by responding to sophisticated DX needs through professional services.

In addition, because the finishing inspection function is sold as an optional function, we aim to have it utilized in the future as an optional function not only by Konoike Construction Co., Ltd., but also by many other users.

Please understand this as a good example of expanding our business portfolio—one of the key initiatives mentioned earlier—progressing as a concrete project.

Concluded a capital and business alliance with Infomart Corporation^{*1}

SpiderPlus & Co.

Provide Infomart's order and receipt management platform to our customers.
Jointly create business opportunities through mutual customer referrals and system integration of both services, etc.

Overview of the capital and business alliance

Strongly promote the expansion of provided value and the creation of an opportunity for growth through the mutual utilization and collaboration of the customer base and services based on capital ties.

Expansion of provided value

Comprehensively covers everything from site operations to back-office operations, becoming an infrastructure/platform that solves all site issues.

^{*1}: For details of the capital and business alliance agreement, please refer to the "Notice regarding Conclusion of Capital and Business Alliance Agreement with Infomart Corporation, Secondary Offering of Shares by Representative Director, and Change in Controlling Shareholder" (disclosed on May 27, 2026) (Japanese only)

<https://contents.xj-storage.jp/xcontents/AS81382/76b66324/3783/47ed/9c1c/1ad65a7a7a25/140120260526548520.pdf>

^{*2}: With a view to further strengthening the future alliance between the two companies, it has been agreed under this share transfer agreement with Kenji Ito, Representative Director and President of the Company, to grant Infomart the right to acquire additional common shares of the Company held by Kenji Ito (call option, right of first refusal). (For details, please refer to the timely disclosure above.)

© SpiderPlus & Co. Securities Code:4192

23

At the end of the business topics for FY2026 Q2, we will explain the capital and business alliance with Infomart.

First, regarding the structure of the alliance. Kenji Ito, our President and Representative Director, transferred a portion of his shares, bringing Infomart's shareholding ratio to 5%. At the same time, we have concluded a capital and business alliance agreement. For details of the capital and business alliance, please refer to the timely disclosure.

[Reference] Notice Concerning Conclusion of Capital and Business Alliance Agreement with Infomart Corporation, Secondary Offering of Shares by Representative Director, and Change in Controlling Shareholder (Japanese Only)
<https://contents.xj-storage.jp/xcontents/AS81382/76b66324/3783/47ed/9c1c/1ad65a7a7a25/140120260526548520.pdf>

We will explain the significance in terms of business. Our SPIDER+ has covered site operations such as site management, photo management, drawing management, and Quality Management. On the other hand, Infomart's "BtoB Platform TRADE" covers back-office operations such as order management, contracts, and billing.

In the construction industry, these two areas have been fragmented, although they should inherently be connected. The information that an inspection is completed at the site directly leads to billing for the completed work. We expect the value of connecting this series of flows with data to be very significant.

We hope you will recognize this alliance as a major step forward toward the "site infrastructure" we aim for.

BtoB Platform TRADE**An order management platform that streamlines paperwork**

"BtoB Platform TRADE" is a platform that enables centralized online management of estimation, ordering, order receipt, delivery, inspection, and billing operations. Orders, conventionally processed via paper, PDF, email, or phone, can now be created, sent, and managed digitally. By fundamentally improving conventional operations, it eliminates duplicate work and person-dependent tasks, creating an environment where all workers can focus on "work that only humans can do."

**Benefits of B to B Platform TRADE****01**

Automatic creation of purchase orders and progress billings

02

Easy integration with business partners through a platform used by 1 million companies

03

Centralized management of project statuses, preventing missed responses and billing

04

Automatic compliance with various laws and legal revisions related to the construction industry

05

Integration with Cost Management and accounting systems for the construction industry

^{*1}: BtoB Platform TRADE service site: <https://www.infomart.co.jp/trade/>

© SpiderPlus & Co. Securities Code:4192

We will briefly introduce BtoB Platform TRADE.

As explained earlier, it is a back-office platform that manages order placement and receiving operations. In particular, its key features include automatic compliance with various laws and legal revisions related to the construction industry, as well as integration with Cost Management and accounting systems for the construction industry.

FY2026.Q2 Summary**Business progress**

- Promoting development investment in the product base, such as new mobile apps, based on the "Workspace concept"
- Accumulated negotiations progressed steadily, confirming a re-acceleration of ARR growth in the standalone results for July
- Expansion of the business portfolio, a key measure, is progressing through the enhancement of professional services and the execution of a capital and business alliance

Performance progress

- Net Sales of 1.37 billion yen (+15% YoY); Net Sales growth accelerated due to the growth of professional services
- Cumulative Operating profit of 89 million yen, exceeding the full-year forecast (50 million yen). Profitability improved through investment control and AI utilization
- The performance forecast remains unchanged, but the policy is to assess costs associated with the investment in the product base in the second half, order status, etc., and revise as necessary

This is a summary of the FY2026 Q2 financial results.

We will explain business progress and financial performance progress respectively.

Regarding business progress, based on the "Workspace Concept," we are promoting development investments in product foundations such as a new mobile application. In addition, accumulated business negotiations have steadily progressed, and in the single-month results for July (preliminary figures on a managerial accounting basis), we confirmed a re-acceleration of ARR growth. Furthermore, the expansion of our business portfolio—a key initiative including the enhancement of professional services and the execution of the capital and business alliance—is making progress.

Regarding financial performance progress, Net Sales were 1,374 million yen, up 15% YoY. Driven by the growth of professional services, sales growth is accelerating. Cumulative Operating profit reached 89 million yen, exceeding the full-year forecast of 50 million yen. Profitability has improved through investment control and the utilization of AI.

Finally, regarding the financial forecast.

We have kept the full-year forecast unchanged, even though Operating profit for the first half exceeded the full-year forecast. The reason for maintaining the forecast is that, considering investments in product foundations, we believe it is still a stage where we need to carefully assess post-launch expenses as well as second-half orders based on development progress. We will monitor progress and promptly make a disclosure if necessary.

The first half was a period for laying the foundation. In the second half, we will make it a period to prove that foundation through growth.
