The status of the Company's corporate governance is as follows.

### Basic Policy on Corporate Governance, Capital Structure, Corporate Attributes, and Other Basic Information

#### 1. Basic policy

Our corporate philosophy is "A healthy and prosperous life for all people." Based on this corporate philosophy, we have been striving to maximize medium and long-term corporate value through dialogue with all stakeholders. In addition, we have adopted to become a Company with an Audit & Supervisory Committee in order to strengthen the effectiveness of corporate governance and thereby enhance our corporate value over the medium to long term. We will continue to develop a management control system and a monitoring system for business execution to ensure compliance with laws and regulations, maintain appropriate cooperative relationships with stakeholders, and foster a corporate culture and climate that respects the ethics of sound business activities.

#### [Reasons for not implementing each principle of the Corporate Governance Code] Update

[Supplementary Principle 1-2 (iv): Exercise of rights at the General Meeting of Shareholders]

In order to promote understanding among foreign investors, we have translated the Notice of the General Meeting of Shareholders, etc. into English. On the other hand, the electronic exercise of voting rights is not implemented at this time, but will be considered as necessary, while continuing to closely monitor the composition of shareholders and the ratio of foreign investors.

[Supplementary Principle 2-4 (i)]

The Company's policy is to hire people who sympathize with the Company's mission and can contribute to the enhancement of corporate value, regardless of gender, nationality, etc. The Company is working to create an environment, etc., in which these people can work productively and enthusiastically. The Company does not set target figures for each attribute, as we provide all employees with fair and equal opportunities for evaluation and promotion.

[Supplementary Principle 3-1 (iii)]

The Company's group has two reportable segments: "Healthcare-Big Data" and "Tele-medicine." At this time, however, we do not expect climate change issues or other such factors to have a direct, material impact on our business, and therefore do not make any disclosures under the TCFD.

On the other hand, we acknowledge the importance of consideration for the environment, including measures to deal with climate change issues in order to sustain the lives of people and economic activities. Furthermore, we share the proactive approach of our stakeholders, which are pharmaceutical companies based in Europe, and are taking steps to reduce greenhouse gas emissions, digitize documents and other materials, and thoroughly save energy, as well as providing environmental education and awareness.

In addition, we are taking other specific measures to achieve the SDGs and ESG, such as implementing high-level security for privacy data and investing in human capital, etc. For more information, please see our website (<https://www.jmdc.co.jp/en/esg/>).

Furthermore, as something unique to the company, we are promoting the "BIG DATA FOR CHILDREN" project that utilizes the largest healthcare big data in Japan held by the company to resolve the difficulties in researching the actual conditions of diseases and treatments in children.

In Japan, there are very few development of drugs targeted to children, and in clinical practice, drugs are used off-label and drugs for adults are used with the ingenuity of individual doctors and pharmacists.

In terms of disease burden, there has not been enough detailed research and analysis of the various burdens, such as living and economic burdens, placed on children with diseases.

In addition, basic descriptive epidemiology, such as what diseases children suffer from and to what extent, and how many hospital visits and hospitalizations they have, has not been sufficiently conducted.

By disseminating the results of these analyses and informing society about the realities of children suffering from diseases, we are creating an opportunity to save the children who will build the future of Japan.

[Supplementary Principle 4-1 (ii)]

The Company's group does not formulate and publish a medium-term management plan as we belong to the healthcare field, where business opportunities are expanding exponentially and the business environment changes extremely rapidly, making medium to long-term forecasts difficult.

[Supplementary Principle 4-11 (iii)]

For the purpose of improving the functioning of the Board of Directors and enhancing its corporate value, the Company conducted an analysis and evaluation of the effectiveness of the Board of Directors for the fiscal year 2024. Specifically, we conducted a survey of Directors and Directors who are members of the Audit and Supervisory Committee on general matters related to the Board of Directors, including the composition and operation methods of the Board of Directors, the state of deliberations, and the state of cooperation with Outside Directors. In order to elicit candid opinions from those surveyed, the survey was conducted anonymously, and the collection, tabulation, and analysis of the survey results were contracted to an outside organization.
