FY 2025 Initiatives		Progress
With a mind to flexibly and swiftly address business environmental changes in and outside Japan, further conduct focused discussions on enhancing corporate value.	Advance further with capital-conscious, data-driven management. Identify Duskin's competitive advantages, and continue and deepen discussions on optimizing the business portfolio.	- Based on the "Corporate Governance Guidance for Enhancement of Earning Power" published by Japan's Ministry of Economy, Trade and Industry (METI), the Board discussed the Company's future vision, competitive advantages and the value creation process, and made progress in conducting a comprehensive review of its corporate governance. - As a result of the above, Board members shared the understanding that efforts should be accelerated to improve the profitability and productivity of the Direct Selling Group's existing businesses, especially with a focus on the Clean Service businesses, and to create new corporate value through measures such as M&As. - The overall structure of the Company's business portfolio is changing, as the Food Group's market share continues to expand and the Care Service businesses also continue to grow. To optimize the portfolio, further discussions on the Company's future vision are necessary. - With the IT Strategy Management division taking the lead, the Company is in the process of upgrading its mission-critical systems. Progress was made in laying out the foundation for swiftly conducting efficiency-focused business analysis.
Ensure actual implementation of the Medium-Term Business Plan 2028.	Strengthen the monitoring of KPI progress.	To have KPI progress and business performance reported at the Board of Directors's meetings, developments have taken place, such as using the logic tree framework to set budget KPIs for each business.
	Fortify the monitoring of investment projects.	- Investment projects are regularly reported to the Board. On such occasions, the gap between the report and the original plan is also identified and shared among members. - Regarding new investment projects, progress was made in deliberations centered around growth potential, cash allocation and future stock price.
	Deepen the discussions of core strategies.	The oversight and execution roles were clarified and the Board's authority was further delegated to the execution side to enhance the Board's decision-making power and to facilitate its discussions from a broader and strategic perspective.
