Announcement of Investment in MetCom, Inc.

ITFOR Inc. (Headquarters: Chiyoda-ku, Tokyo, President and Representative Director: Koji Sakata) has made an investment in MetCom, Inc. (Headquarters: Minato-ku, Tokyo, Representative Director: Yoshioki Chika, hereinafter referred to as "MetCom"), a startup company developing a three-dimensional (3D) positioning infrastructure that enables location tracking even in areas where GPS signals are unavailable, both indoors and outdoors. This investment was made through a third-party allotment of new shares, and the transaction was completed on November 20, 2025.

MetCom is a company committed to the mission of visualizing "what happens, when, and where" with high precision and reliability. They are building a terrestrial infrastructure capable of providing accurate positioning and time information even in environments where GPS signals cannot reach, such as inside buildings or underground spaces. They offer services for governments and public sector organizations—including police, fire departments, disaster response agencies, and emergency medical services—as well as for private-sector clients such as telecom carriers and app developers. Their solutions include the vertical positioning service "Pinnacle," the 3D positioning service "MBS," and a high-precision time synchronization service.

Through this investment, we aim to support the advancement of positioning information utilized as social infrastructure and contribute to society as a company that supports safety and security through social implementation by utilizing our technology, sales channels, and networks.

Our company group will strengthen our core businesses and accelerate the creation and expansion of new businesses for sustainable growth through collaboration with startup companies that possess cutting-edge technologies, innovative products, and outstanding business ideas
