**2. Reason**

Our company recognizes that providing stable and appropriate returns to our shareholders is an important management issue, and we determine dividend levels from a comprehensive perspective, including balancing with internal reserves that enable appropriate investments to enhance competitiveness and profitability.

In the financial results for the fiscal year ending March 2025 disclosed today, sales increased for the 13th consecutive year and reached a record high for the 6th consecutive year. Ordinary profit increased for the 16th consecutive year and reached a record high for the 14th consecutive year. In addition, profit attributable to owners of the parent also increased compared to the previous year, which no longer included the impact of the special gain from the brand sale recorded two years ago. Given these steady business results, we have determined that we can continue to provide higher returns to our shareholders and have decided to increase the total of interim and year-end dividends by 0.50 yen compared to the previous fiscal year.

This dividend level remains unchanged from the dividend forecast announced by our company on March 21.

This marks our 16th consecutive year of dividend increases.
