Announcement of Acceptance for Three Poster Presentations at the 4th Annual Meeting of the Japan Antibody Society

We hereby announce that three research topics related to our antibody acquisition technologies have been accepted as poster presentation at the 4th Annual Meeting of the Japan Antibody Society, to be held at Omiya Sonic City from December 1 to 3, 2025.

This acceptance demonstrates our research and development capabilities and technological strengths, and is expected to significantly contribute to our future business growth.

Titles and Authors :

Title : " Development of a novel antibody isolation method combining phage display and next-generation sequencing."

Authors : Yukio Watanabe*, Yoshinori Ukai*, Mariko Kondo*, Kaori Nakazawa*, Makoto Tominaga**

(*Perseus Proteomics Inc., **Public University Corporation Nagoya City University)

Title : " Development of a Common Light Chain Platform for Multispecific Antibody Construction."

Authors : Yoshinori Ukai*, Tomoki Taku*, Mariko Kondo*, Junpei Oya*

(*Perseus Proteomics Inc.)

Title : " Advances in Antibody Sequence Analysis Using Nanopore Long-Read Sequencing."

Authors : Kosuke Yokobori*, Keisuke Ishii*, Hiroaki Iwasa*, Shinji Hagiwara*

(*Perseus Proteomics Inc.)

About the Japan Antibody Society

The Japan Antibody Society was established to promote fundamental and applied research related to antibodies, contribute academically to industries including diagnostics and healthcare, enhance public understanding and dissemination of antibodies, foster human resources, and encourage interaction among domestic and international researchers in this field.
