**Announcement of a Presentation at an International Symposium
Regarding PPMX-T003**

Regarding our anti-TfR1 antibody PPMX-T003, which is currently under development, Prof. Ai Kotani of Division of Cellular and Molecular Biology, Department of Regulation of Infectious Cancer, Research Institute for Microbial Diseases, Osaka University, is scheduled to present at the 1st International Symposium on CAEBV.

Title of presentation :

Anti-Transferrin Antibodies Against ANKL and CAEBV Proliferating in Hepatic Sinusoids

Event details :

Date : Friday, March 20 – Saturday, March 21, 2026

Venue : Institute of Science Tokyo (1-5-45 Yushima, Bunkyo-ku, Tokyo)

Symposium Chair : Ayako Arai, Professor and Chair, Department of Hematology and Oncology, St Marianna University

Additional information :

About CAEBV (Chronic Active Epstein-Barr Virus infection) :

CAEBV is a rare intractable disease in which Epstein-Barr virus infects and proliferates in T cells and NK cells, causing fever, liver dysfunction, and severe complications (including hematological malignancies).
