## **Announcement Regarding the Achievement of “B” Score in the CDP 2025 Climate Change Assessment**

MEC Company Ltd. (the “Company”) is pleased to announce that it has received a “B” score in the Climate Change category of the CDP 2025 assessment conducted by CDP, an international non-profit organization.

A “B” score corresponds to the Management level, indicating that a company recognizes its environmental risks and impacts related to climate change and is taking steps to implement management systems and initiatives to address them.

The Company will proactively work to solve social issues through its business activities based on transparency and integrity. By contributing to the sustainable development of industry through global business expansion and continuing to create value for future generations, the Company will strive to achieve both economic value and social value with the aim of continuously increasing corporate value.

About CDP

CDP is an international non-profit organization that requests companies and governmental bodies to disclose information in order to manage and reduce their environmental impacts. Since its establishment in 2000, CDP has collaborated with institutional investors and financial institutions to evaluate and disclose corporate environmental performance. CDP scores are widely recognized as an important indicator in ESG (Environmental, Social, and Governance) evaluations and are broadly used in investment and procurement decision-making aimed at promoting sustainable economic activities.

CDP Scoring Methodology

CDP scores are assigned across eight levels based on the maturity of a company’s environmental information disclosure and initiatives:

Leadership level (A, A-), Management level (B, B-), Awareness level (C, C-), and Disclosure level (D, D-).
