Notice Regarding Additional Capital Investment (Acquisition of Noncurrent Assets) to Increase Production Capacity

MEC COMPANY LTD. (“the Company”) hereby announces that it has today decided to make capital investments with the aim of strengthening its Business Continuity Plan (BCP) by addressing rising demand, particularly for products related to semiconductor package substrates, and decentralizing its production bases.

This capital investment is the second phase of construction of the Company’s Kitakyushu Factory, which is scheduled to begin operations in December 2026.

1. Reason for the acquisition

In recent years, against the backdrop of rapid progress in generative AI, demand for electronic substrates and components has been expanding. As various AI-related advancements are expected to continue in the future, the Company is moving ahead with the construction of a new factory (the Kitakyushu Factory), scheduled to begin operations in December 2026, in order to take advantage of the opportunities for sustainable growth stemming from the expanding demand.

The Company’s policy was to increase the production capacity of the new factory as necessary while taking into account demand trends. However, against the backdrop of the increased investment related to AI in recent years, demand for products related to semiconductor package substrates is expected to greatly increase, particularly for the Company. In order to respond to these demand trends, the Company has decided to make additional capital investments that go beyond the scope of the original plan in order to meet a wider range of product demands and ensure compliance with relevant laws and regulations.

2. Outline of the capital investment

(1)	Details	In order to meet the expected increase in demand for semiconductor package substrates, the Company will strengthen facilities at its Kitakyushu Factory, which will produce chemical products.
(2)	Investment amount	Approx. ¥2 billion
(3)	Start of operation	FY2028 (planned)
(4)	Financing plan	Own funds and borrowings (planned)

3. Future outlook

The impact on the consolidated financial results for the fiscal year ending December 2026 is immaterial.
