Notice Regarding Large Order Received by Subsidiary

TESS Holdings Co., Ltd. (the "Company") hereby announces that the Company's consolidated subsidiary, TESS Engineering Co., Ltd., has decided today to accept a large order for EPC (Engineering, Procurement, and Construction) of power storage plants for power grids, as described below.

1. About the order

The Group, under the management philosophy of "Total Energy Savings & Solutions," for realizing a sustainable society, focuses on the areas of "renewable energy as main power source," "energy-efficiency maximization," and "intelligent- energy infrastructure." Based on this, we operate two businesses: (1) the Engineering Segment, which provides EPC services for energy plants and utility equipment, and (2) the Energy Supply Segment, which includes ownership, operation, and electricity sales of renewable energy power plants, operation and maintenance (O&M), electricity retailing, and resource recycling biomass fuel supply. We offer comprehensive solutions to solve the challenges facing various customers in the industrial sector, such as environmental measures, energy conservation, and energy cost reductions. Additionally, as announced in the TESS Group medium-term management plan (2025–2030), titled "TX2030 TESS Transformation 2030" on August 14, 2024, we identified "power-storage system-related business" as a new priority area and have been actively pursuing initiatives such as the "development of power storage plants for power grids" and "FIP conversion of FIT solar power plants + storage battery co-location."

Regarding the large order, the Group was recognized for its extensive track record in EPC services for energy plants and utility equipment that has been built since its founding, in addition to the expertise, etc., gained through the "power-storage system-related business."

2. Details of the order

(1)	Order received from	Komoro Power Storage Plant LLC
(2)	Orders received	EPC of power storage plants for power grids in Komoro-shi, Nagano (Output: approximately 43 MW, Capacity: approximately 171 MWh)
(3)	Amount of orders received	Approximately 6.0 billion yen
(4)	Delivery date	March 2028 (planned)

3. Future outlook

Income from this large order is scheduled to be recorded from the fiscal year ending June 30, 2027 through the fiscal year ending June 30, 2028. Should the impact on consolidated financial results become significant in the future, the relevant information is expected to be disclosed in a timely manner.
