

## **NEG's Ultra-thin Glass "Dinorex UTG™" Adopted for HONOR's Foldable Smartphone "Magic V Flip2"**

Nippon Electric Glass Co., Ltd. (Head Office: Otsu, Shiga, Japan; President: Akira Kishimoto; "NEG") has announced that its ultra-thin glass sheet designed exclusively for chemical strengthening, Dinorex UTG™, has been adopted for the cover of inner main display of HONOR's latest foldable smartphone, the Magic V Flip2. HONOR is a smart device manufacturer that is rapidly gaining global recognition.

HONOR "Magic V Flip2" (Dinorex UTG™ is used in the inner main display)

HONOR was established in 2013 as a sub-brand of Huawei and became an independent company in 2020. By continuously launching high-performance models, it has secured a strong position in mainland China and expanded into overseas markets, becoming one of the most notable brands worldwide.

For the Magic V Flip2, Nippon Electric Glass's Dinorex UTG™ has been adopted for the cover of inner main display. Despite being thinner than a human's hair, it boasts outstanding reliability, having withstood 200,000 folding tests. The product delivers both durability and display quality indispensable for foldable smartphones.

Recognized internationally for its quality and reliability, Dinorex UTG™ has now been adopted by HONOR following its adoption by Motorola and Xiaomi. Its presence in the foldable smartphone market continues to expand, and Nippon Electric Glass will further contribute to the evolution of next-generation mobile devices through advanced glass materials.

### ■ About Dinorex UTG™

Dinorex UTG™ is ultra-thin glass for chemical strengthening, developed for flexible devices\* such as foldable smartphones. Applying forming technology cultivated in the manufacture of glass for FPDs such as LCD and OLED TVs, it offers the following features.

\*A general term for electronic devices or components that can be bent or folded.

- High surface smoothness and thickness uniformity
- Exceptional flexibility, capable of bending to a radius as small as 1.5 mm (diameter 3 mm), ensuring durability in foldable applications.
- High reliability for repeated folding

These features enable high-precision display quality and high resistance to scratches and impact without compromising the inherent flexibility of the device. Dinorex UTG™ is attracting worldwide attention as a high-performance material essential for next-generation mobile devices such as foldable smartphones.
