FY2025

Financial Summary

- Regarding net sales during FY2025, while the Fine Carbon business saw a YoY increase due to factors such as the consolidation of U.S.-based subsidiaries and a recovery in demand for memory semiconductors, consolidated net sales decreased YoY mainly due to the divestment of the German site of the Graphite Electrodes business and declined sales prices / sales volumes in the Carbon Black business.
- Operating income increased YoY, driven by the significant turnaround to profitability in both the Graphite Electrodes and the Smelting and Lining businesses. This was primarily due to the structural reform in the Graphite Electrodes business and the prior-year impairment loss recorded in the Smelting and Lining business, in addition to ongoing contributions from improved production efficiency and cost reduction measures, despite non-recurring losses recorded in the Carbon Black business in the fourth quarter.
- While EBITDA decreased YoY, EBITDA margin improved, securing the upper 10% range.
- Net income attributable to owners of the parent company significantly increased and turned positive mainly due to the prior-year costs of structural reform and impairment losses have run their course, in addition to the gain on sale of investment securities aimed at improving capital efficiency.
- Net sales, operating income, ordinary income, and net income significantly exceeded the full-year earnings forecast announced on November 6, 2025, amid external environments changing significantly beyond initial anticipations, including U.S. tariff policies and global trade frictions.
- Strategic investments and capital investments necessary for future growth, exemplified by the consolidation of Bridgestone Corporation's carbon black manufacturing and sales subsidiary in Thailand, were carefully selected and continued. While interest-bearing debts increased slightly, an optimal capital structure was maintained through appropriate leverage and financial soundness and liquidity were maintained at a high level. The credit ratings have been maintained, with JCR: A+ (outlook stable) and R&I: A (outlook stable).
- The year-end dividend of JPY15 (no changes), the annual dividend of JPY30 (payout ratio of 31.9%)

Summary of Consolidated Results

5

- Consolidated results saw YoY decreases in net sales, and increase in operating income
- Net sales JPY322.9 b (-7.8%), operating income JPY25.8 b (+33.3%), ROS 8.0% (+2.5points)
- EBITDA JPY58.4 b (-4.4%), EBITDA margin 18.1% (+0.6points)
- Net income significantly increased from a loss of JPY56.4 b in the prior fiscal year to JPY20.0 b, including the gain on sale of investment securities of JPY 4.1 b.

Net Sales, Operating Income and EBITDA by Segment

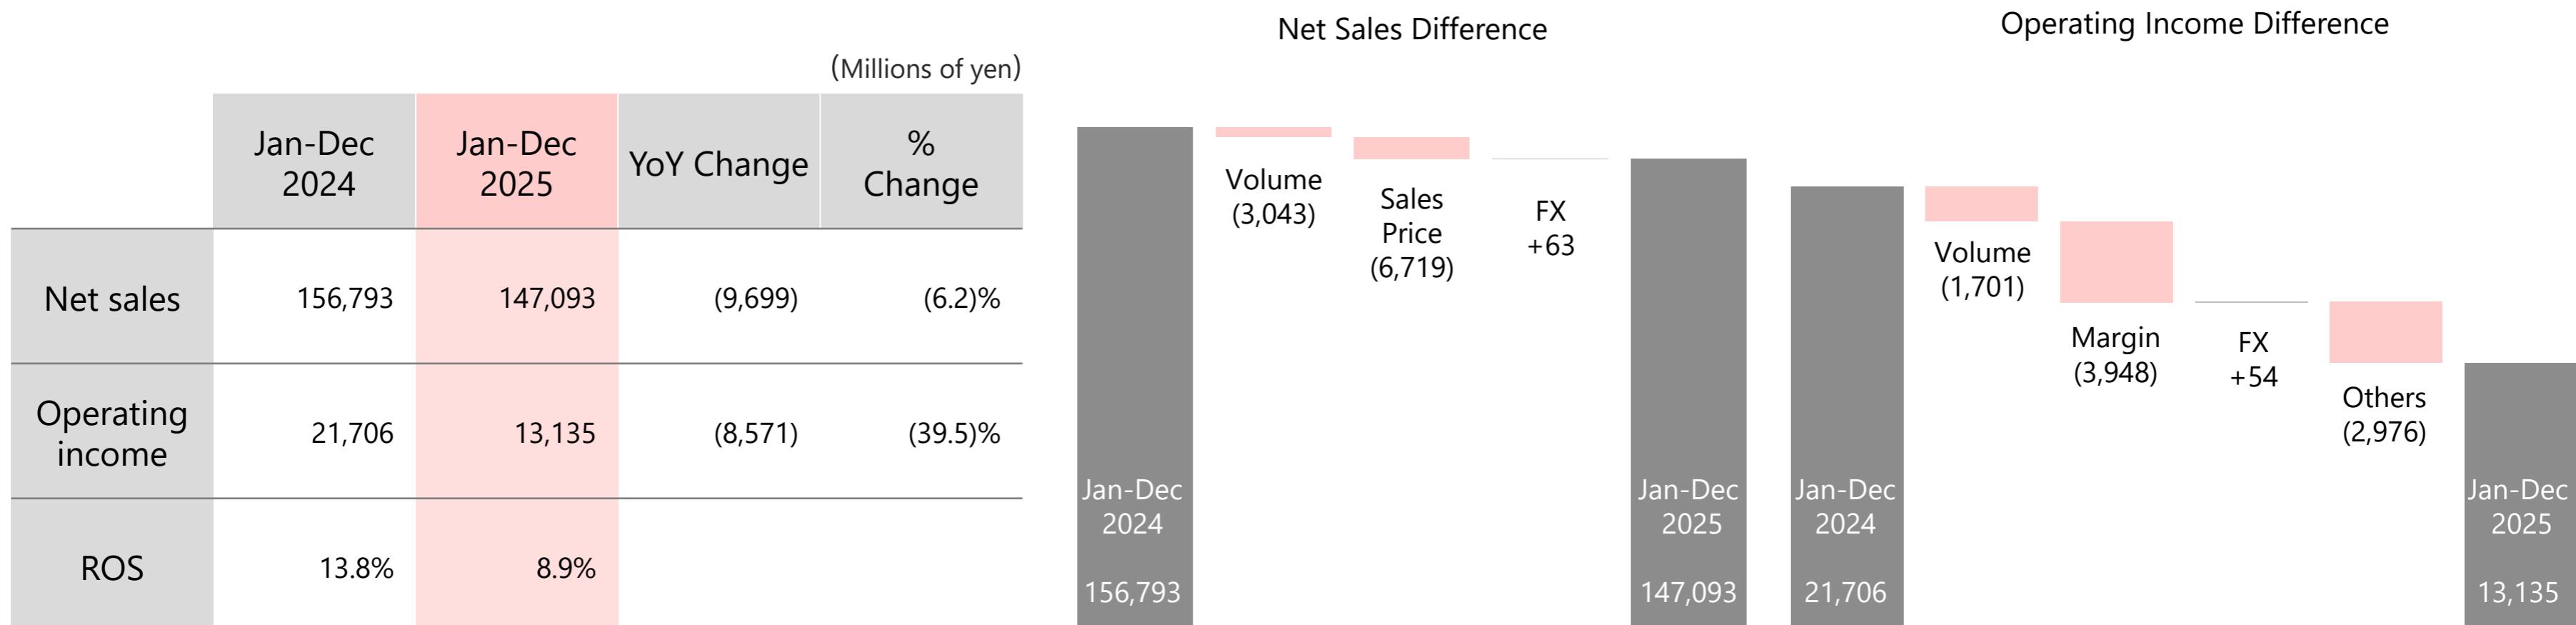

6

- Operating income significantly increased YoY for the Smelting and Lining and the Graphite Electrodes businesses, accompanied by an EBITDA increase, due to factors including the non-recurring impairment losses recorded in the prior fiscal year and the effect of cost reduction measures.
- Meanwhile, the Carbon Black and Fine Carbon businesses, our core businesses, that drove growth in the prior fiscal year faced challenges.

Return on sales	—	—	—	5.5%	8.0%	+2.5pt	17.5%	18.1%	+0.6pt

- Net sales decreased YoY due to declined sales volumes resulting from production adjustments among tire manufacturers, and declined sales prices.
- Operating income decreased YoY primarily due to declining margins and non-recurring losses resulting from the consolidation of Bridgestone Corporation's carbon black manufacturing and sales subsidiary in Thailand (consolidated from the fourth quarter of FY2025).

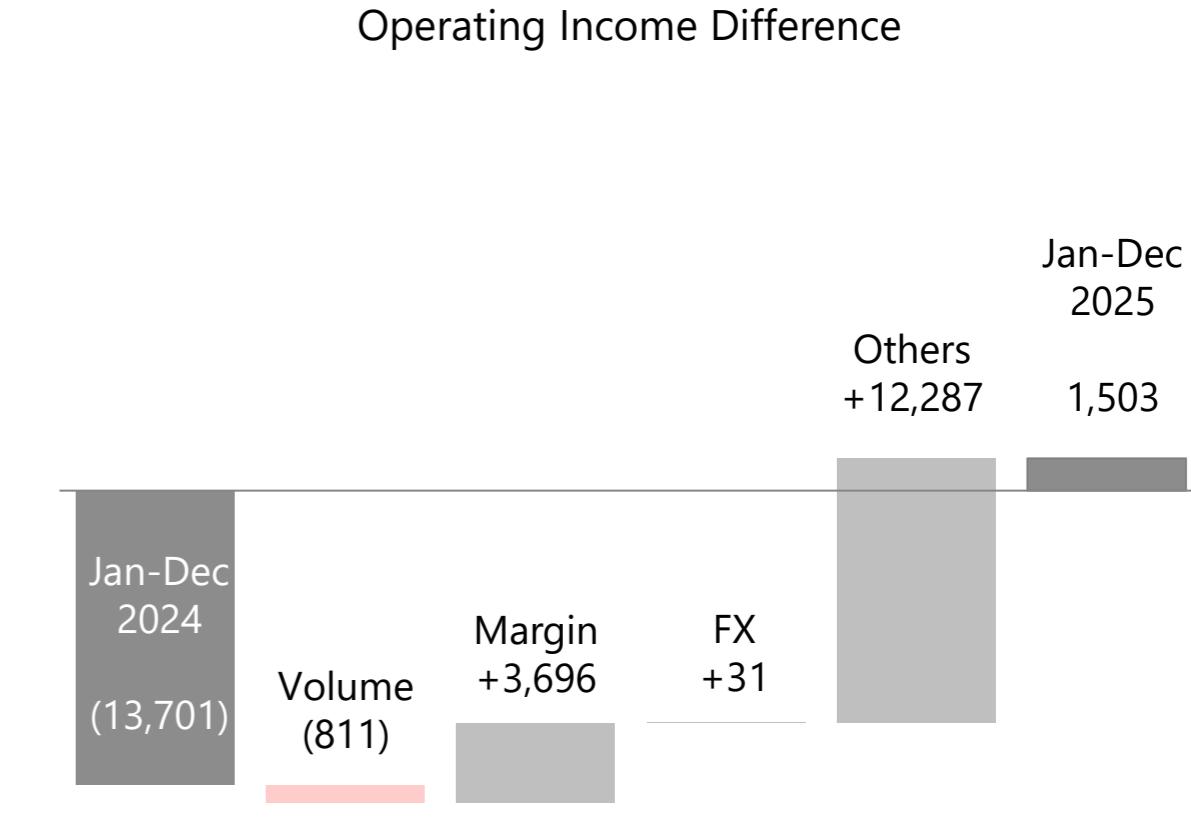

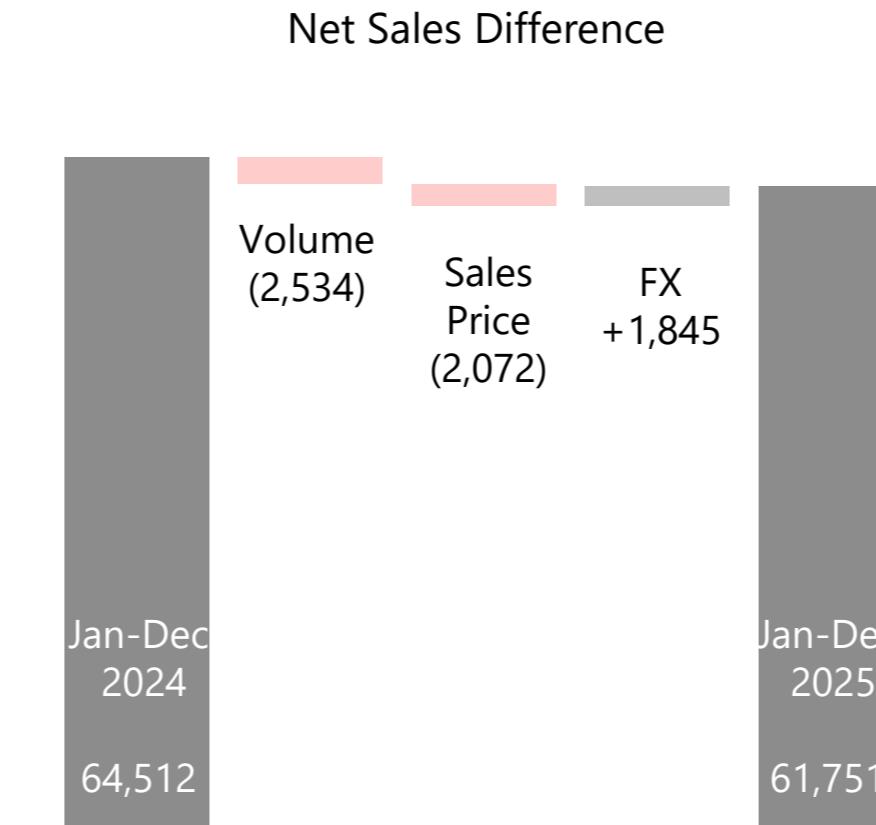

- Increased sales volume of Solid SiC focus rings, our core product, in line with the recovery of demand for memory semiconductors, and the consolidation of U.S.-based subsidiaries, contributed to YoY increase in net sales.
- Operating income decreased YoY due to factors such as the decelerated growth of the SiC power semiconductor market (driven by the global slowdown in EV growth), intensified competition in the Chinese market, etc.

	Jan-Dec 2024	Jan-Dec 2025	YoY Change	% Change
Net sales	53,890	55,969	+2,078	+3.9%
Operating income	12,437	7,704	(4,732)	(38.1)%
ROS	23.1%	13.8%		

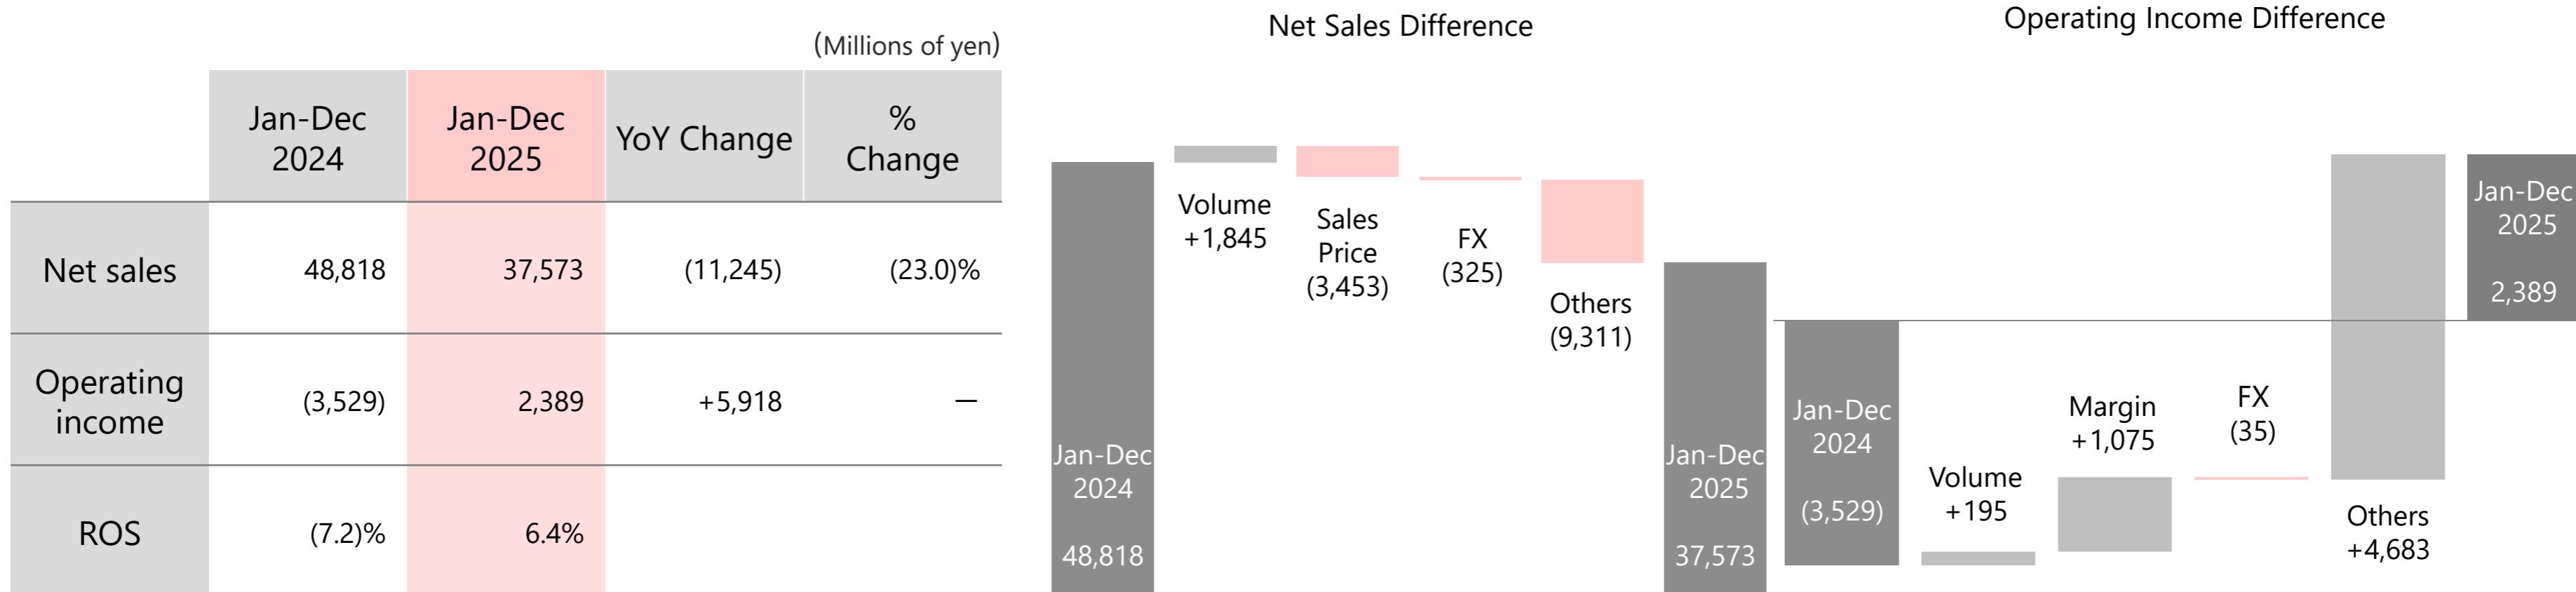

- Net sales decreased YoY due to a delay in the recovery of demand for relining of aluminum smelting furnaces and intensified competition with industry peers.
- Operating income significantly improved and turned positive due to cost reductions and decreased depreciation and amortization resulting from impairment losses on goodwill, etc. recorded in the prior fiscal year.
- Excluding the effect of decreased depreciation and amortization on goodwill, etc., the profit level stood at JPY+2.8 b YoY, indicating improved profitability.

	Jan-Dec 2024	Jan-Dec 2025	YoY Change	(Millions of yen)
	Jan-Dec 2024	Jan-Dec 2025	YoY Change	% Change
Net sales	64,512	61,751	(2,761)	(4.3)%
Operating income	(13,701)	1,503	+15,204	—
ROS	(21.2)%	2.4%		

- Net sales decreased YoY due to sluggish electrode market conditions resulting from the stagnant steel market and excessive exports of steel products from China, in addition to the divestment of the German subsidiary (excluded from the scope of consolidation from the second quarter of FY2025).
- Operating income turned positive due to reduced production costs resulting from decline in raw material prices and the effects of structural reforms, including the accelerated realization of production consolidation effects in Japan and the divestment of the German subsidiary.

- Demand for CAPEX in the electronic device industries, the core markets for industrial furnaces and heating elements, remained sluggish due to the globally decelerated growth of the LiB market and a delay in the recovery of the MLCC market.
- Both net sales and operating income decreased YoY due mainly to declined sales volumes, influenced by factors such as delivery delays stemming from customer circumstances.

Earnings Forecast

Consolidated Earnings Forecast FY2026

15

- Net sales are projected to increase, except for the Graphite Electrodes business. Consolidated net sales are projected to increase by 7.4%.
- Operating income is projected to decline in the Carbon Black business due to an increase in depreciation associated with the commencement of full-scale operations at the new site in Thailand, and in the Fine Carbon business in anticipation of the decelerated growth of the power semiconductor market, while increases are expected in the Smelting and Lining and the Industrial Furnaces and Related Products businesses. Consolidated operating income is projected to remain almost flat, reflecting heightened global uncertainty.
- Dividend forecast: year-end dividend of JPY15, annual dividend of JPY30
