Notice of Large Order Received

Seibu Giken Co., Ltd. (“Seibu Giken”) is pleased to announce that we have received a large order for a semiconductor fabrication plant, as follows:

1. Background of the Orders

Seibu Giken globally manufacture and sell specialized air treatment equipment that is essential to manufacturing processes in advanced industries, including semiconductors and electronic components. In recent years, global investment in advanced semiconductors has expanded, driven by rising demand for data centers amid the rapid adoption of generative AI. In this context, the importance of high-quality air environment control and exhaust gas treatment in semiconductor manufacturing processes is increasing further. In this market environment, our extensive track record and technological expertise in the semiconductor sector—built over many years—have been highly recognized, leading to this order.

2. Order Details

Domestic order

Customers	Taiwanese engineering company
Amount of order received	Approx. JPY 1.58 bn
Details of order received	VOC concentrators for a major Taiwanese foundry
Expected delivery	From Q3 2026 to Q4 2027

We believe this order will support compliance with environmental regulations and cost reduction in advanced semiconductor manufacturing processes. We view the medium- to long-term growth of the semiconductor market as a significant business opportunity and will continue to strengthen our product supply and solution offerings in the semiconductor sector.

Please note that we are unable to disclose the customer’s name, site name, the number of units sold, and other specific details of the new order recipients and end-users from the viewpoint of protecting trade secrets to the recipients and end-users. In addition, there are no capital, personal, or business relationships that should be disclosed between Seibu Giken and the order recipients. In addition, neither of them is our related parties.

3. Impact on Financial Results

The sales of the above order is expected to be recorded in Seibu Giken’s consolidated net sales for the fiscal year ending December 31, 2026 (“FY12/26”) and in the one for the fiscal year ending December 31, 2027. The sales from this order for the FY12/26 has been included in the consolidated forecast for the FY12/26 announced on February 13, 2026.

Appendix

1. About Seibu Giken

With our Purpose " Provide green air solutions for every environment," Seibu Giken develops, manufactures the desiccant dehumidifiers and VOC concentrators, etc., sells these products in more than 50 countries worldwide and provides services including installation and maintenance.

2. About VOC Concentrator

VOC concentrators efficiently treat volatile organic compounds (VOCs) emitted from various manufacturing processes, including semiconductor production, thereby reducing environmental impact and lowering costs. In semiconductor manufacturing in particular, as processes become increasingly advanced, the importance of exhaust gas treatment technologies continues to grow, and our VOC concentration technology is designed to meet these evolving needs.
