"Super-Energy-Saving" Heat Sterilization Equipment

With two heat-recovery tanks, previously unused heat is recovered and reused.

Reduce steam consumption by up to 50% compared to conventional products

Hot water
recovery tank

Water after product heating
Recovery of (approx. 120°C)

Used for product heating in
the next batch

Medium-temperature water
recovery tank

Water after product cooling
Recovery of (approx. 90°C)

Used for product preheating of
next batch
