1. Overview of operating results and others

(1) Overview of operating results for the nine months

During the third quarter of the consolidated fiscal period, the global economy continued to show limited signs of recovery, with uncertainty persisting due to factors such as U.S. tariff policies. In Europe, one of our key markets, economic recovery remained subdued, while the Chinese economy also exhibited signs of deceleration.

As a “Visual Technology Company” providing premium visual solutions customized to customer needs and centered on proprietary in-house technologies, EIZO delivers reliable, high-performance imaging equipment and integrated system solutions.

In the 8th Mid-Term Business Plan (FY2024-FY2026), with FY2026 as the final fiscal year, EIZO aims to address social issues and expand its business domains by delivering products and services that maximize imaging value. To achieve this, the Company will accelerate initiatives such as strengthening imaging hardware through EIZO’s proprietary visual imaging technologies, as well as expanding EIZO Visual Systems (EVS), thereby driving business growth. In addition, as part of its regional strategy, the company is also expanding operations in high-potential markets such as India and the Middle East, while continuing to strengthen and evolve its business model.

For the third quarter of the consolidated fiscal period, consolidated Net Sales were JPY58,809 million (up 1.2% YoY). In our primary geographical market of Europe, the challenging economic environment persisted. Sales in the Business & Plus (B&P) market remained slow, whereas sales declined YoY, primarily due to subdued sales performance in Germany. In contrast, within the Healthcare market, sales recovered in Europe, North America, and China, resulting in higher sales YoY. Overall, sales in the Vertical & Specific (V&S) market were in line with the previous fiscal year.

On the profit side, Gross Profit was JPY19,097 million (down 0.5% YoY), and the Gross Profit Margin was 32.5% (down 0.5 points YoY). Selling, General and Administrative Expenses were JPY17,777 million (up 4.4% YoY), reflecting wage increases, expenses related to the new technology hub completed during the current fiscal year, and the expansion of sales activities in the India and Middle East regions. As a result, Operating Profit was JPY1,319 million (down 39.1% YoY). Ordinary Profit was JPY2,796 million (down 6.7% YoY), whereas a foreign exchange loss was recorded in the same period of the previous fiscal year, the Company recognized a foreign exchange gain in the current period. As Extraordinary Income, the company recorded Gain on Sale of Investment Securities of JPY1,328 million arising from the sale of policy-holding shares and related assets. Consequently, Net Income Attributable to Owners of the Parent was JPY2,842 million (up 42.6% YoY).

The breakdown of Net Sales by market is as follows:

[B&P]

Net Sales were JPY10,061 million (down 12.6% YoY).

In Europe, EIZO’s primary market, the economic environment remains challenging, and in particular, in Germany, EIZO’s largest market by sales volume, a downturn in the monitor market itself has persisted, resulting in sluggish sales for EIZO compared with the same period of the previous year. Under these circumstances, despite EIZO launching new products with enhanced environmental performance and competitiveness, slower-than-expected inventory reduction of legacy models constrained the pace of transition, limiting their contribution to sales growth through the third quarter.

A recovery in the European market is expected to take some time. In Japan, although sales of the new products delivered some positive results, their overall impact was relatively limited.

[Healthcare]

Net Sales were JPY25,368 million (up 5.8% YoY).

In Diagnostics application, sales showed a recovery trend in Europe and North America, which are EIZO’s primary markets, resulting in higher Net Sales YoY. In contrast, in Japan, capital investment demand declined amid the challenging financial conditions facing medical institutions, and sales were below the level of the same period of the previous fiscal year. In Endoscopy-related application, sales remained solid in Europe and China, and in addition, sales recovered in North America, resulting in higher Net Sales YoY. In Surgical application, overseas sales declined, and Net Sales were below the level of the same period of the previous fiscal year.

[Creative work]

Net Sales were JPY4,062 million (down 5.0% YoY).

In North America and Japan, Net Sales for Media & Entertainment applications were above the level of the same period of the previous fiscal year. In contrast, in Europe, demand recovery has been delayed, and sales remained slow. During the period, EIZO launched new HDR-compatible Reference Monitors and HDR-compatible Color Management Monitors for Media & Entertainment applications, while continuing promotional activities aimed at driving sales growth.

[V&S]

Net Sales were JPY9,031 million (down 0.4% YoY).

In Air Traffic Control applications, Net Sales overseas were below the level of the same period of the previous fiscal year, primarily due to the deferral of projects originally scheduled for implementation. Several projects are expected to ramp up in earnest from the next fiscal year. In Security & Surveillance applications, overseas sales declined. In Maritime applications, sales continued to perform well, supported by demand for new shipbuilding. In Defense applications, sales of Defense monitors and cross-selling of products for other markets performed well. However, due to the impact of the temporary shutdown of U.S. government agencies, sales of graphics boards for Defense applications were deferred, and as a result, overall sales in the Defense segment were in line with the previous fiscal year. In other industrial applications, sales in Japan remained solid.

[Amusement]

Net Sales were JPY 4,889 million (up 2.4% YoY).

The market environment surrounding Amusement continues to be challenging, as the overall industry is shrinking due to a decline in the number of players and a reduction in the number of halls.

[Others]

Net Sales were JPY 5,395 million (up 19.3% YoY), driven by higher sales from contract development of Amusement software.

(2) Overview of financial position for the nine months

Compared with the end of the previous fiscal year, Total Assets increased by JPY 19,010 million to JPY 176,770 million, reflecting an increase in Inventories, Tangible Fixed Assets associated with the construction of a new technology hub building, and Investment Securities due to the rise in the market value of equity securities held. Total Liabilities increased by JPY 8,958 million to JPY 42,361 million, mainly due to an increase in Short-term Borrowings and Deferred Tax Liabilities. Net Assets increased by JPY 10,052 million to JPY 134,408 million, primarily reflecting an increase in Valuation Differences On Available-For-Sale Securities.

(3) Explanation of consolidated financial forecasts and other future forecast information

The full-year performance outlook for the fiscal year ending March 31, 2026 is now expected to fall below the previous forecast for Net Sales, Operating Profit, Ordinary Profit, and Profit Attributable to Owners of the Parent.

In Europe, EIZO's primary market, the economic environment continues to pose challenges owing to an extended period of economic slowdown. In particular, the Germany monitor market declined compared with the previous year, and market conditions in Northern Europe remain severe due to the prolonged impact of the Russian invasion of Ukraine. In China, the outlook has become increasingly uncertain as geopolitical risks heighten amid a generally subdued economic environment.

Under these circumstances, demand in the Business & Plus (B&P) and Creative Work markets is expected to fall below the initial forecast. In the Healthcare market, sales in Europe, North America, and China are showing on a recovery trend and overseas sales are performing steadily. In contrast, in Japan, capital investment demand declined amid the challenging financial conditions facing medical institutions, and sales were below the level of the same period of the previous year. As a result, overall sales in the Healthcare market are expected to fall below the initial forecast. In the Vertical & Specific (V&S) market, Air Traffic Control sales are expected to decline, as projects originally scheduled for this fiscal year have been postponed to next year. Other V&S markets are expected to progress in line with the initial plan. Given these developments, overall Net Sales are projected to be lower than the initial forecast.

On the profitability side, in addition to the impact of the aforementioned decline in Net Sales, we expect to record JPY400 million approx. in inventory write-downs at the end of the period as Cost of Sales for certain legacy models in the B&P market, where inventories have become excessive due to weaker sales in Europe. We will further promote the reduction of legacy inventory and accelerate the transition to more competitive new models.

As Extraordinary income and losses, we expect to record JPY600 million approx. in additional profit during the fourth quarter. This reflects the recognition of JPY 950 million approx. in gains on sale of investment securities as Extraordinary Income, following the reduction of cross-shareholdings.

Meanwhile, the Company decided to discontinue and dispose of the Manufacturing Execution System (MES), which was launched last year to improve manufacturing efficiency, as it has not delivered the expected benefits under prolonged low factory utilization. As a result, it expects to record a loss on disposal of fixed assets of JPY200 million approx. at the end of the period.

In addition, profitability recovery at its European sales subsidiaries has been slower than anticipated, and its carrying amount is expected to exceed its recoverable amount. Consequently, we expect to record Extraordinary Losses of JPY150 million approx. as Impairment Loss.

Accordingly, the company has revised the full-year earnings forecast previously disclosed in the "Consolidated Financial Results for the Fiscal Year Ended March 31, 2025" as follows.

In connection with this revision, the Company has also changed the foreign exchange rates applied for the fourth quarter from EUR 157 to EUR 182, and from USD 143 to USD 158.

For more information, please refer to the "Notification Regarding the Revision of the Full-Year Performance Outlook" announced today (January 30, 2026).
