Consolidated Results for the First Quarter of FY2026/3

Market environment in the fire protection industry remained strong

Outlook for the Japanese economy as a whole remained uncertain due to policy developments in the U.S. and other factors, but the market environment surrounding the fire protection industry continued to be strong. Orders received exceeded the quarterly record-high of the same period of the previous fiscal year.

Net sales increased due to the high order backlog

Net sales reached a record first-quarter high while the order backlog at the beginning of the fiscal year was at a record level.

Order backlog at the end of the first quarter increased by approximately ¥9 billion year-on-year, maintaining a high level.

Although profits fell in the first quarter, aiming for record-high full-year profits for the second consecutive year

Our earnings tend to be weighted more in the second half of the fiscal year (particularly in the fourth quarter), when many properties are completed.

Although the profit level in the first quarter is the lowest in the fiscal year, which highlighted the impact of unprofitable large-scale properties and an increase in personnel expenses, we expect to achieve record-high full-year profits for the second consecutive fiscal year.
