2. Reasons for the Revision

Since the announcement of its first-quarter financial results, the Company has closely monitored demand trends and the progress of profitability improvement initiatives. As a result of continued solid demand for AI data center-related products, a recovery in demand related to industrial equipment, and progress in sales price revisions in the Electronic Chemicals and Soldering Systems-related Business, among other factors, net sales and profits are expected to exceed the Company’s initial projections.
Based on these factors, the Company has revised upward its consolidated financial forecast for the fiscal year ending March 31, 2027.
Operating profit is expected to exceed the previous record high of JPY5.4 billion recorded in the fiscal year ended March 31, 2018.
