*** Explanation regarding the appropriate use of forecasts of business results and other special instructions**

Forecasts of business results and other forward-looking statements in this document are based on information currently available to the Company and certain assumptions that the Company deems to be reasonable. Actual business results may differ significantly due to a variety of factors about economic trend and exchange rate. For further information on the above-mentioned forecast preconditions and other related matters, please see page 3 “1. Business Performance (1) Analysis of Business Performance”.

1. Business Performance

(1) Analysis of Business Performance

1) Overview

(Unless otherwise stated, all comparisons are with operating results of the same period of the previous fiscal year, from April 1, 2024 to March 31, 2025.)

As for the global economy during this consolidated fiscal year, there has been a situation that requires close monitoring of impacts on economic conditions due to factors such as the U.S. tariff measures and the tensions in the Middle East. In terms of business overview of the Company, sales of primary batteries for medical devices and infrastructure applications and coated separators remained strong. However, there were impacts of surging costs for some raw materials, delays in the recovery of semiconductor related products, and U.S. tariff measures in health and beauty care products.

Under these circumstances, net sales decreased by 0.3% (377 million yen) to 129,429 million yen, due to sales decrease of rechargeable batteries, semiconductor related products and health and beauty care products, although sales for primary batteries and coated separators increased and licensing revenues increased. In terms of profitability, due to decreased sales of semiconductor related products and health and beauty products, together with the impact of surging raw material costs, operating profit decreased by 15.3% (1,427 million yen) to 7,891 million yen, ordinary profit decreased by 12.0% (1,169 million yen) to 8,601 million yen. Profit attributable to owners of parent increased by 102.0% (4,170 million yen) to 8,260 million yen due to record of extraordinary income associated with the transfer of equity interests in a consolidated subsidiary.

The average foreign exchange rate over the year under review was US\$1=151 yen.

Operating results by segment are as follows. The Company has changed the reporting segments from this consolidated fiscal year, and the analysis and comparisons are made based on the new segment.

Energy

Although sales of rechargeable batteries decreased due to the production discontinuation, as sales of primary batteries for medical devices and infrastructure applications were strong, total sales for Energy segment increased by 5 million yen to 42,458 million yen. Operating profit decreased by 13.5% (323 million yen) to 2,065 million yen due to surging costs for some raw materials and increase of development cost for all-solid-state batteries.

Functional Materials

Total sales for Functional Materials segment increased by 2.6% (824 million yen) to 32,614 million yen due to sales increase of adhesive tapes and industrial materials such as coated separators. Operating profit increased by 25.8% (301 million yen) to 1,467 million yen due to sales increase of adhesive tapes and industrial materials.

Optics & Systems

Total sales for Optics & Systems segment increased by 1.3% (481 million yen) to 36,413 million yen due to sales increase of automotive optical components and increase of licensing revenues, although sales of semiconductor related products decreased. Operating profit decreased by 19.9% (879 million yen) to 3,540 million yen due to the impacts of sales decrease of semiconductor related products and valuation loss on inventories.

Value Co-Creation Businesses

As sales of health and beauty care products struggled in the first half due to impact of the U.S. tariff measures, total sales for Value Co-Creation Businesses segment decreased by 8.6% (1,687 million yen) to 17,944 million yen, although sales of hydraulic tools increased mainly in Japan and North America. Operating profit decreased by 39.1% (526 million yen) to 819 million yen due to the impact of sales decrease of health and beauty care products.

2) Future Outlook

In the global economic environment for the fiscal year ending March 2027, uncertainty remains in the international situation, including U.S. tariff measures and geopolitical risks, and there are continuing concerns about the impact on the economy.

In particular, if the current situation in the Middle East continues, the Company predicts the risks such as increased costs due to surges in raw material costs, energy costs, and transportation costs, impacts on production due to shortages of raw materials, production goods and auxiliary materials, and a decrease in orders due to customers' production adjustments and market stagnation.

Under these circumstances, the Company will closely monitor the environment in the key markets and customer trends and respond swiftly to changes.

For the full-year business forecast for the fiscal year ending March 2027, the Company forecasts net sales of 143,000 million yen, operating profit of 10,000 million yen, and profit attributable to owners of parent of 6,700 million yen.

In the fiscal year ending March 2027, which is the final year of the Mid-Term Management Plan MEX26, the Company will improve profitability through the effects of portfolio reform, while achieving profit growth by strengthening growth businesses and securing an early contribution from new businesses centered on all-solid-state batteries on the Company's business performance.

These numbers are based on calculation using the average exchange rate over the fiscal year, 150 yen to the U.S. dollar. For projections of business performance by segment, please refer to the supplementary information on page 5.
