Maxell, Ltd

Selected as a Constituent of ESG Investment Indices “FTSE JPX Blossom Japan Index” and “FTSE JPX Blossom Japan Sector Relative Index”

Maxell, Ltd. (President and Representative Director: Keiji Nakamura / hereinafter “Maxell”) has been selected for the first time as a constituent of the ESG investment index “FTSE JPX Blossom Japan Index,” provided by global index provider FTSE Russell, and has also been selected for the fifth consecutive years as a constituent of “FTSE JPX Blossom Japan Sector Relative Index.”

“FTSE JPX Blossom Japan Index” is designed to reflect the performance of Japanese companies that demonstrate strong Environmental, Social and Governance (ESG) practices, based on FTSE Russell’s proprietary ESG evaluations. The evaluations cover areas such as corporate governance, health & safety, anti-corruption and climate change, and companies are selected based on their ability to meet a variety of ESG-related criteria.

In addition, “FTSE JPX Blossom Japan Sector Relative Index” reflects the performance of Japanese companies that demonstrate relatively strong ESG practices within each sector and adopts a sector-neutral^{*1} design to ensure balanced sector composition. Furthermore, initiatives of companies toward the transition to a low-carbon society are also evaluated. Both indices are adopted by the Government Pension Investment Fund (GPIF) as benchmarks for their ESG investments and are also widely used in the creation and evaluation of sustainable investment funds and other financial products.

Under the mission of “Contribute to a sustainable society by innovating unique, original technologies,” Maxell Group will continue to provide “Maximum Excellence” to all stakeholders, strive to be a company that is always “Within, the future” and engage in ESG activities.

^{*1} Sector-neutral: Sector caps are applied to maintain investability and avoid excessive concentration in specific sectors.
