

Securities ID code:6859

ESPEC CORP.

Financial Results for Q1 of FY2025 (Fiscal Year Ending March 31, 2026)

August 22, 2025 ESPEC CORP.

FY2025 First Quarter Financial Summary

- Demand for testing of electronic components and electronic devices related to generative AI increased, development demand related to EVs continued, and investment in satellite communications in North America progressed steadily, resulting in record-high orders.
- On the other hand, many long-lead-time projects such as large-scale products and bulk multiple-unit orders led to net sales and profit falling below the previous year.
- Strong performance centered on target markets of the medium-term management plan, with no revisions to first-half and full-year forecasts.

	Year on Year	Comparison with Forecasts
Orders Received	All businesses increased, particularly environmental test chambers, semiconductor equipment in the Equipment Business, and the Other Business.	Above forecast in the Equipment Business (environmental test chambers, semiconductor equipment) and the Other Business. In the Service Business, laboratory testing services declined, but after-sales service, and engineering increased.
Net Sales	In the Equipment Business (environmental test chambers), sales decreased significantly due to many long-lead-time projects such as large-scale products and bulk multiple-unit orders. The Service Business and the Other Business increased.	In the Equipment Business (environmental test chambers), sales fell below expectations due to an increase in long-lead-time projects and delays caused by customer circumstances. In the Service Business, laboratory testing services fell below expectations.
Operating Profit	➤ Decreased mainly due to decrease in net sales	➤ Fell below mainly due to net sales shortfall
Profit Attributable to Owners of Parent	➤ Decreased due to decrease in operating profit	➤ Fell below due to operating profit shortfall

Summary of Profits and Losses

(Millions of yen)

	FY2024 1Q Results	FY2025 1Q Results	Year on Year
Orders Received	16,988	18,921	+11.4%
Net Sales	13,691	12,323	-10.0%
Cost of Net Sales Cost of Sales Ratio	8,890 64.9%	8,125 65.9%	-8.6% 1.0pt deterioration
Gross Profit	4,800	4,197	-12.6%
SG&A	3,878	3,862	-0.4%
Operating Profit Profit Ratio	922 6.7%	335 2.7%	-63.7% 4.0pt deterioration
Ordinary Profit	1,114	344	-69.1%

Total	Net Sales	13,691	12,323	-10.0%
	Operating Profit	922	335	-63.7%

Analysis of Operating Profit Increase and Decrease Factors

Decline in profit due to reduced sales in the Equipment Business, along with increased depreciation expenses for expansion and worsening cost of sales ratio from increased personnel in the Service Business. Efforts are underway to improve from Q2 onward.

^{*} Totals have been calculated using the gross profit margin.

Equipment Business

(Millions of yen)

	FY2024 1Q Results	FY2025 1Q Results	Year on Year
Orders Received	14,510	15,755	+8.6%
Net Sales	11,827	10,344	-12.5%
Operating Profit	810	418	-48.4%
Profit Ratio	6.9%	4.0%	-2.9pt

Environmental Test Chambers

- Domestically, orders received for both versatile standardized products and customized products increased year on year. Net sales decreased as there were many orders with long lead times such as large-scale products and bulk orders of multiple units.
- Overseas, orders increased year-on-year in North America, Southeast Asia, and Taiwan.

 Net sales decreased mainly in Europe and China, and in North America also declined due to an increase in long-lead-time projects and delays caused by customer circumstances.

Energy Device Equipment

Investment in bulk EV battery projects ran its course, leading to declines in both orders and net sales year-on-year.

Semiconductor Equipment

■ There were communications- and automotive-related projects, both orders received and net sales increased significantly year on year.

Service Business

(Millions of yen)

	FY2024 1Q Results	FY2025 1Q Results	Year on Year
Orders Received	2,186	2,266	+3.6%
Net Sales	1,767	1,832	+3.6%
Operating Profit	147	-41	
Profit Ratio	8.3%	-2.3%	-

After-Sales Service and Engineering

Orders received and net sales both increased year on year as preventative maintenance services and repair services remained solid.

Laboratory Testing Services and Facility Rentals

■ Laboratory testing services progressed steadily, with both orders and net sales remaining on par with the previous year.

Other Business

(Millions of yen)

	FY2024 1Q Results	FY2025 1Q Results	Year on Year
Orders Received	421	1,025	+143.1%
Net Sales	207	256	+23.3%
Operating Profit Profit Ratio	-34 -16.7%	-41 -16.4%	-

Environmental Conservation, Plant Production Systems

■ Reforestation (Tree planting) progressed steadily, and large-scale orders received for plant research devices and plant factories.

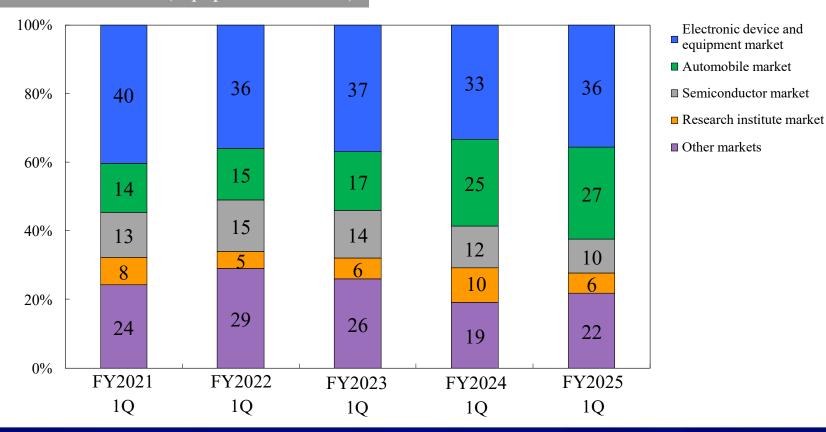

Orders and net sales both increased year-on-year.

Sales by Market

In the electronic device and equipment market, demand for testing related to generative AI increased, raising its share of sales.

In the automobile market, sales composition increased due to recognition of EV and battery-related sales.

Non-Consolidated (Equipment Business)

Sales by Region

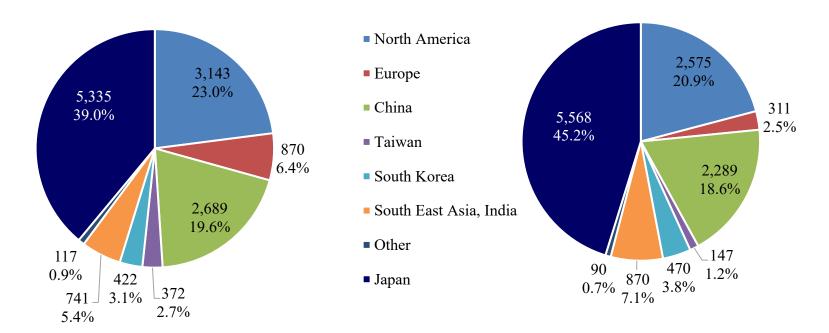

Net sales increased particularly in Japan, while in North America orders were strong but sales decreased due to many long-lead-time projects, net sales in China also decreased.

FY2024 1Q

Overseas sales ratio: 61.0%

FY2025 1Q

Overseas sales ratio: 54.8%

Total: ¥ 13,691 million

Overseas sales: ¥ 8,356 million

Total: ¥ 12,323 million

Overseas sales: ¥ 6,754 million

Forecasts for FY2025

■ Orders exceeded both the previous period and forecasts, progressing ahead of plan, with no revisions to first-half or full-year forecasts.

Shareholder Return Policy and FY2025 Dividend Forecast

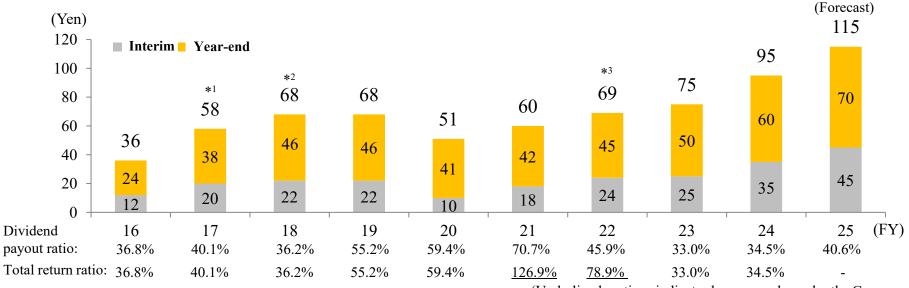

Shareholder Return Policy

Set the consolidated dividend payout ratio at 40% or more, and flexibly carry out acquisition of treasury shares.

During the period of the Medium-Term Management Plan PROGRESSIVE PLUS 2027 (FY2025–2027), the total return ratio cumulative over the three-year period will be 50% or more, and no dividend reductions will be made.

Dividend per Share and Dividend Payout Ratio/Total Return Ratio

For FY2025, we are forecasting an annual ¥115 and a dividend payout ratio of 40.6%.

(Underlined sections indicate share repurchases by the Company)

^{*1.} Includes a dividend of \(\frac{\pmathbf{Y}}{2}\) (interim dividend of \(\frac{\pmathbf{Y}}{1}\) and year-end dividend of \(\frac{\pmathbf{Y}}{1}\)) to commemorate the 70th anniversary of our foundation in FY2017.

^{*2.} FY2018 was an irregular 15-month fiscal period for overseas consolidated subsidiaries. The dividend payout ratio for a 12-month period is 39% (reference).

^{*3.} Includes a dividend of ¥4 (interim dividend of ¥2 and year-end dividend of ¥2) to commemorate the 75th anniversary of our foundation in FY2022.

Main Initiatives in FY2025

Equipment Business

- Digesting order backlog, and shortening product lead times by expanding in-house production
- Development and expanded sales of high value-added products that meet testing needs in target markets

Service Business

After-sales service: Expansion of sales of the "super support service plan" and maintenance contract services

Laboratory testing services: Expansion of sales at "Aichi Next-Generation Mobility Test Lab"

Area Strategy

Japan: Strengthen sales activities in the AI semiconductor and autonomous driving fields, acquisition of replacement demand

U.S.: Expand sales in the satellite communications and AI semiconductors fields

China: Expand sales in advanced technology fields such as semiconductors and communications

Main ESG Initiatives in FY2025

- **E** (Environment)
- Promote the 8th Medium-Term Plan on the Environment (FY2022–2025)
- Global warming countermeasure:
 Reduce CO₂ emissions in business activities such as change to low-GWP refrigerant and manufacturing
- Biodiversity conservation activities:

 Contribute through environmental conservation projects, promote conservation activities through the management of "ESPEC's 50-Year Forest"
- S (Society)
- Development of human capital strategy, human resource development
- Promote internal communication, enhance employee health and safety, implement engagement surveys
- Develop female managers, promote and retain employment of persons with disabilities
- G (Governance)
- Reconstruction of BCP
- Formulate human rights policy

TOPICS 1

Start of "Aichi Next-Generation Mobility Test Lab" service Responding to testing demand for automotive batteries and EV/automation modules

■ Aichi xEV Battery Safety Test & Certification Center

- Opened in February 2025 as one of Japan's largest dedicated automotive battery testing facilities
- Equipped with state-of-the-art testing systems to support larger and higher-capacity automotive batteries
- Supports various testing standards such as the UN ECE-R100 regulation for safety testing

SSOEC

Aichi xEV Battery Safety Test & Certification Center

■ Toyota Test Center

- Expanded functions of the Toyota Testing Center, the Company's largest integrated test center (service began in April 2025)
- Supports the larger size of test samples such as e-Axles, PCUs, and ECUs
- Newly enhanced services to recreate usage environments for EV/automation modules under operating conditions for evaluation and measurement

Toyota Test Center

TOPICS 2

Responding to testing demand in AI and autonomous driving fields Rapid-Rate Thermal Cycle Chamber

- In April 2025, a high-performance model capable of controlling specimen temperature at 20 K/min was added to the lineup of rapid-rate thermal cycle chambers
- Complies with international standards such as semiconductor package reliability test standards and standards for electronics and automotive markets, and comes standard with low-GWP* refrigerant "R-449A"

Rapid-Rate Thermal Cycle Chamber (TCC-151W-20)

Launched low temperature (& humidity) chambers Platinous J Series ECO Type with low-GWP refrigerant

- In November 2024, launched the ECO Type in the Platinous J Series, the global standard model for environmental test chambers
- Proprietary refrigeration technology reduces power consumption by up to 70% compared to conventional models, contributing to the reduction of greenhouse gas emissions by adopting low-GWP* refrigerant "R-449A"

low temperature (& humidity) chambers Platinous J Series ECO Type

^{*} Metric for expressing the warming potential of greenhouse gases relative to carbon dioxide. The smaller the value, the lower the environmental impact.

TOPICS 3

-70°C Ultra-Low Temperature Shock Freezer for delicious rapid freezing

- In April 2025, launched the "Ultra-Low Temperature Shock Freezer" capable of freezing food rapidly at -70°C, preserving freshness even for perishable items
- Enables freezing in a low airflow environment, preventing food from drying out, and allows a seamless process from freezing to thawing and reheating in a single unit

Ultra-Low Temperature Shock Freezer

First domestic launch by COSMOPIA HIGHTECH of a rapid temperature change device using low-GWP refrigerant

- In October 2024, COSMOPIA HIGHTECH, part of our Group, launched the first domestic rapid temperature change device equipped with low-GWP* refrigerant "R-473A"
- Complies with international test standards and contributes to the reduction of greenhouse gas emissions

Rapid Temperature Change Device Premium Excellent Series (EC-28PXHH)

* Metric for expressing the warming potential of greenhouse gases relative to carbon dioxide. The smaller the value, the lower the environmental impact.

External Recognition

ESG-Related Evaluations

- Included in the ESG index "FTSE Blossom Japan Sector Relative Index"
- Rated "B" score for the fifth consecutive year in the CDP Climate Change Survey, "B-" score for Water Security
 - Selected as Supplier Engagement Leader for three consecutive years, the Top Rank in the Supplier Engagement Ratings
- Selected for the second consecutive year as an Asia-Pacific Climate Leader by the Financial Times in the UK and German data provider Statista
- Received a 3.5-star rating in the NIKKEI Sustainable Management Survey, SDGs Edition
- Received a 3-star rating in the NIKKEI Sustainable Management Survey, Smart Work Edition

IR Website Evaluations

- Selected as a Commendation Award of the Internet IR Award of Daiwa IR
- Selected as a "GRADE AAA" company website in the Nikko Investor Relations' All-Japanese Listed Companies' Website Ranking
- Awarded a Bronze Prize in the Gomez IR Website Ranking (17th in its industry)
- Awarded as an excellent company in the Gomez ESG Website Ranking

History of Environmental Test

What is Environmental Test

Test to analyze and evaluate effects of environmental factors such as temperature, humidity, pressure, and vibration on various industrial products like electronic components in order to ensure product quality.

1950s

The environmental test was JISstandardized in Japan for consumer products.

1970s-1990s

"Reliability" and "quality control" became important issues in product development. Demand increased dramatically due to a rapid shift toward computerization and the use of electronic components.

Present

Demand is expanding in the development fields of IoT and next-generation automobiles against the backdrop of digitalization and decarbonization.

Consecutively selected as a winner of Ministry of Economy, Trade and Industry (METI) "Global Niche Top Companies Selection 100" (FY 2013, FY 2020)

Global Structure

Share of Environmental Test Chambers:

Over 30% worldwide, Over 60% domestic (ESPEC estimates)

First in Japan to develop environmental test chambers, rapidly established a brand in Japan and overseas and have held the top market share for many years

- •Developed a variety of products with high quality and meeting customer requirements
- Production technology capabilities that enable high-mix, low-volume production
- Total solutions for environmental tests, including products, laboratory testing services and technical support, and after-sales service capabilities

Provide products globally that comply with the needs of respective countries through an extensive global network

- Consolidated subsidiaries: 13 (9 overseas, 4 domestic)
- •Overseas production bases: North America 1 company,

China 2 companies, South Korea 1 company

• Overseas network: 50 locations (countries or territories), 44 companies

Equipment Business: Usage Case with Environmental Test Chambers

Ensure reliability of new technologies and new products by repeatedly testing each component, module and finished product

Equipment Business: Main New Products

Release Date	Name of product	Features
Apr. 2025	Ultra-Low-Temperature Shock Freezer	 Preservation of perishable food freshness through rapid freezing to an ultra-low temperature of -70° C Automatically completes the entire process of food freezing, storing, defrosting and reheating
Apr. 2025	Rapid-Rate Thermal Cycle Chamber High-Performance Model	•Capable of specimen temperature ramp control at a rate of 20K/min •Complies with semiconductor package reliability test standards and international standards for electronics and automotive markets, among others
Jan. 2025	Expansion of Commissioned Measurement Services (Thermal Dependent Warpage Measurement Service / Thermal Image Analysis Service)	 Thermal Dependent Warpage Measurement System: Supports reflow oven temperature environment (up to 260°C) and large substrate sizes Thermal Image Analysis System: High-speed, high-precision thermal image analysis
Nov. 2024	Low Temperature (& Humidity) Chamber Featuring R-449A low GWP* refrigerant Platinous J Series ECO Type	•Offers up to a 70% reduction in power consumption compared to current models through proprietary refrigeration technology.
Oct. 2024	Rapid-Rate Thermal Cycle Chamber Premium Excellent Series (EC-28PXHH) Featuring R-473A, R449A Low GWP* Refrigerant	 Launched by COSMOPIA HIGHTECH CORP., a group company. Capable of rapid temperature change testing in compliance with international testing standards.
Jan. 2024	Thermal Dependent Warpage Measurement System	 Visualize the warpage deformation of semiconductor packages and mounting substrates in a thermal environment. Contributes to solving bonding defect issues in mounting substrates caused by increased power consumption or heat generation.

*GWP: Global Warming Potential. The smaller the value, the less environmental impact.

Equipment Business: New Product Introduction 1

For the automotive fields

Walk-In Type
Temperature (& Humidity) Chamber
for High-Power Series

Feature:

- Compliant with IEC International Standards and German Automotive industry standard LV124 (Can perform rapid temperature change testing at 3K/minute with the specimens inside.)
- •Low GWP coolant (R-449A) as standard equipment

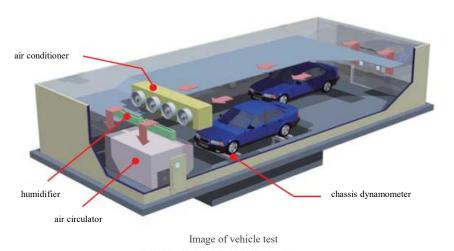

Walk-In Type Temperature (& Humidity) Chamber for High-Power Series

(Released in Feb. 2020)

Walk-In Type
Temperature (& Humidity) Chamber
for Drive-In Series

Features:

- •Closely recreates various weather environments in a large space of approximately 500 m³ accommodating two vehicles to perform actual vehicle testing
- •Multiple environmental factors can be recreated simultaneously, including temperature and humidity, sunlight, rain, snow, fog, and wind

Walk-In Type Temperature (& Humidity) Chamber for Drive-In Series

Equipment Business: New Product Introduction 2

For the semiconductor and electronic component fields

(Expansion in Jan. 2025)

Commissioned Measurement Services

Contribute to improving the accuracy of thermal analysis CAE and heat dissipation design of semiconductor packages, mounting substrates, etc.

- Thermal Dependent Warpage Measurement Service
 - Visualize the warpage deformation of semiconductor packages and mounting substrates
 - •Supports reflow oven temperature environment (-40°C to +260 °C)
 - Supports large substrate sizes up to 300 mm
- ●Thermal Image Analysis Service
 - Visualize the temperature distribution of specimens under constant temperature environment (-40 °C to +100 °C)

Thermal Dependent Warpage
Measurement Service

(Released in Mar. 2023)

Burn-In Chamber Support for High Heat Generation Load

- •Expanded the Burn-In Chamber which has permissible heat generation load by four times (compared to the Company's existing devices) under temperatures from -20 °C to 150 °C.
- •Enables precise temperature control even when semiconductors are in a state of high heat.
- Inspection volumes increased significantly, contributes to shorter inspection times.

Burn-In Chamber Support for High Heat Generation Load

Equipment Business: Examples of Products Delivered 1

(Delivered in Jul. 2018)

■ Walk-in Type Temperature (& Humidity) Chamber, for building materials

Uses:

Reproduce the environment inside apartments (temperature and humidity) and outdoors (weather such as rain, snow, and sunlight), conduct performance evaluations and durability tests of building materials for sash, balcony, etc.

Walk-in Type Temperature (& Humidity) Chambers, for use for building materials

Temperature (& Humidity) Chambers are movable so that building materials for testing can be easily changed

Furnished with irradiation equipment and watering (rain) equipment, to reproduce an outdoor weather environment

Equipment Business: Examples of Products Delivered 2

(Delivered in Mar. 2016)

Smart System Research Facility,
Fukushima Renewable Energy Institute, AIST
(Koriyama city, Fukushima)

Product delivered:

Large Walk-in Type Temperature & Humidity Chamber

Uses:

Performance and safety evaluation for large power conditioners for solar power generation Supports heat generation loads of 100 kw and large weights (21 tons)

Large Walk-in Type Temperature & Humidity Chamber

National Laboratory for advanced energy storage technologies (NLAB), National Institute of Technology and Evaluation (Nanko, Osaka City)

Product delivered:

- 1. Walk-in Type Temperature & Humidity Chamber for chargedischarge testing
- 2.External short-circuit testing equipment (energy devices equipment)

Uses:

- 1.Evaluate the performance of storage batteries by repeatedly charging and discharging them
- 2. Evaluate safety by confirming that storage batteries will not catch fire or rupture if they short circuit

Walk-in Type Temperature & Humidity Chamber for charge-discharge testing

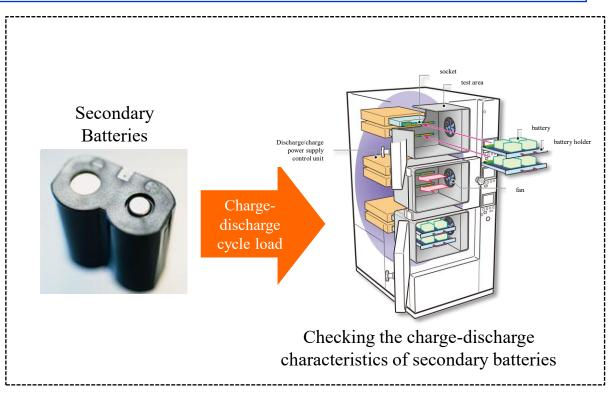

Equipment Business: Usage Case with Energy Device Equipment

Charge-discharge Cycle Evaluation Equipment

Equipment for ensuring the reliability and safety of lithium-ion secondary batteries for next-generation vehicles (e.g., hybrid and electric vehicles)

Secondary Battery Charge-Discharge Evaluation System

Evaluating the performance and life of secondary batteries

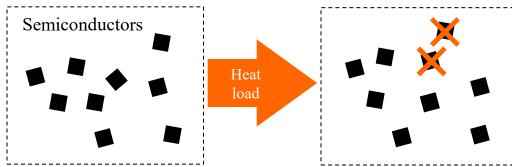

Equipment Business: Usage Case with Semiconductor Equipment

Screening

Eliminate defective products to maintain initial-period quality at the final inspection stage of semiconductor device manufacturing

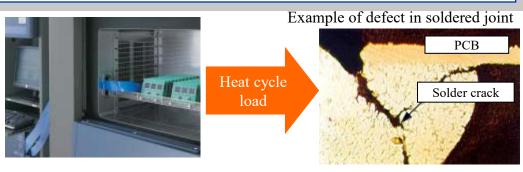

Elimination of latent early failures

Reliability Evaluation

Used to evaluate basic failure patterns to ensure reliability in the development of new technologies

Conductor Resistance Evaluation System

Electrical evaluation of reliability of joints in electronic parts

Service Business

After–Sales Service and Engineering

Preventive maintenance of products, maintenance service, and the upgrading/improvement and installation/relocation of products

- Speedy response via one of the most extensive networks in Japan
- Launching services by utilizing the network function mounted in the equipment

Laboratory Testing Services and Facility Rentals

Laboratory testing, analysis, and evaluation; consulting; equipment rental; sales of used products; calibration of test equipment, etc.

- The company has Five laboratory testing centers in Japan, one in Thailand, two in China. (Japan: Utsunomiya, Toyota, Kariya, Tokoname and Kobe, Thailand, China: Shanghai, Suzhou)
- The centers are also recognized as official calibration facilities under the Japan Calibration Service System (JCSS).
- xEV Battery Safety Test & Certification Center provides one-stop testing and certification service for automotive secondary battery safety compliant with United Nations regulations

Tochigi xEV Battery Safety Test & Certification Center (within the Utsunomiya Technocomplex)

- In October 2014, entered into business alliance with TÜV SÜD Japan Ltd., a third-party certification agency
- In September 2015, opened in Utsunomiya City, Tochigi Prefecture, and in February 2025, opened in Tokoname City, Aichi Prefecture
- Acquire ISO/IEC 17025* test facility certification in the three fields of automobiles, trains and airplanes.
- ■First in Japan The Toyota Test Center addressing all test items set forth by the LV124 German Automotive Manufacturer Testing Standards.

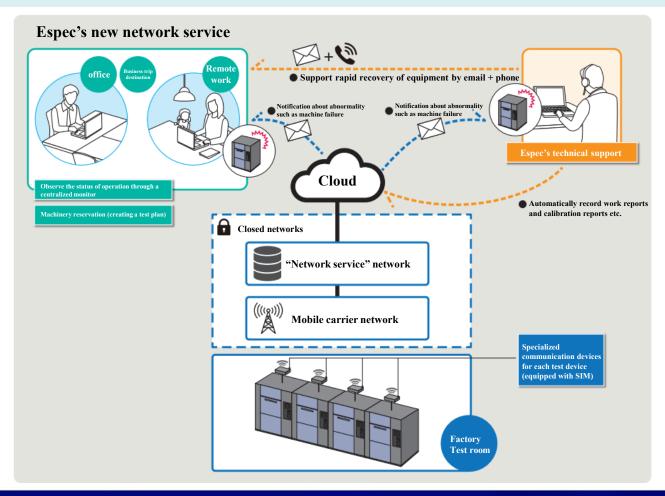

^{*} ISO/IEC 17025: An international standard in which an authoritative third-party organization certifies whether a test facility or calibration organization is capable of producing accurate measurements or calibration results.

Service Business: After-Sales Service

(Started in Apr. 2022)

"Network service" utilizing mobile communications and cloud computing.

Eases the burden on customers' tests and machinery management, and reduces equipment downtime.

Service Business: Laboratory Testing Services

First Compliant with United Nations
Regulations in the World
Tochigi xEV Battery Safety Test &
Certification Center

- •In September 2015, opened in Utsunomiya Technocomplex.
- •Provide a one-stop service to support the implementation of 9 safety tests and applications for certification by agencies, as stipulated by UN ECE R100-2. Part II, a United Nations regulation.

Aichi xEV Battery Safety Test & Certification Center, One of Japan's Largest Dedicated Automotive Rechargeable Battery Testing Centers

- •Opened in February 2025 at the Tokoname site of Aichi Next Generation Mobility Test Lab.
- •Supports larger and higher capacity automotive rechargeable batteries with cutting-edge testing facilities.

Crush Testing Equipment (No. 1 Safety Test Room)

No. 2 Safety Test Room

A safety testing room that can accommodate one car

Service Business: Laboratory Testing Services

Supporting testing of a wide range of in-vehicle electrical components including automation modules

- •In September 2019, Toyota Test Center became compatible with all test items set forth by the LV124 German Automotive Manufacturer Testing Standards.
- •In April 2025, functions were expanded to simulate the usage environment while EV and automation modules are in operation, and services were newly enhanced for conducting evaluation and measurement.

Toyota Test Center

First Commissioned Testing Service in Japan Powered 100% by Renewable Energies

- •Since April 2021, commissioned testing services at five test centers across Japan (Utsunomiya, Toyota, Kariya, Kobe, Tochigi xEV Battery Safety Test & Certification Center and Aichi xEV Battery Safety Test & Certification Center) have been provided using renewable energies.
- Contributing to the reduction of CO2 emissions in customers' supply chains.

Test reports from tests conducted at ESPEC's testing centers receive the Green Power logo to clearly indicate zero CO2 emissions during testing.

Other Business

Environmental Preservation

Reforestation (Tree planting)

Recovery of local forest by selecting species and planting out seedlings using potential natural vegetation data.

Waterfront biotope restoration

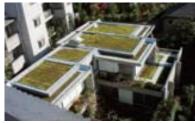

Reconstruction of natural environment, development of vegetative revetments, and water quality improvement using aquatic plants.

■ Urban greening

Provision of roof and wall greening systems that use moss to effectively alleviate heat island effect.

Plant Production Systems

Provision of various cultivation environments employing advanced environmental control technologies to control light, temperature, humidity, carbon dioxide, etc.

Plant factory

Phyto-toron

Other Business: Plant Production Systems

Joint Development with NARO Cultivation Environment Emulator

- •Obtained a patent jointly with the National Agriculture and Food Research Organization (NARO) and others in October 2022.
- Precisely reproduces seasonal carbon dioxide concentration, temperature, humidity, etc.
- Contributes to development of crop production technologies adapted to climate change.

Cultivation Environment Emulator

Produced a high value-added vegetables using deep sea water

•Production and sales of vegetables high in minerals with the use of deep sea water at a plant factory near Haneda Airport.

Interior of the plant factory and factory-produced vegetables "mineraleaf"

^{*} ESPEC MIC Corp. jointly obtained the patent with the National Agriculture and Food Research Organization (NARO), Riken and the Agri Open Innovation Institute.

Other Business: Environmental Preservation/ Plant Production Systems

At Expo 2025 Osaka-Kansai cooperating in venue greening and aquaponics exhibitions

- Provision of planted mats and seedlings at the venue
- Supplying mats planted with Japanese native cogon grass and seedlings of silver grass for the "Grand Ring", and wild grasses and aquatic plants to border the pond's edge in the "Forest of Tranquility".
- Also supplying for the EXPO National Day Hall, Hungary Pavilion, Kuwait Pavilion, Signature Pavilions, etc.

The Grand Ring

- Cooperation in exhibitions at the Osaka Healthcare Pavilion
- Collaboration with the Osaka Metropolitan University R&D
 Center for the Plant Factory to support aquaponics exhibits.
- Provision of vegetable cultivation technologies and expertise.

What is aquaponics?

A recycling production system that combines hydroponics and land-based cultivation. Bodily waste from fish is decomposed by microorganisms and used as a source of nutrients needed to grow plants. This enables vegetables to be grown either without using chemical fertilizers or reducing the amount of their use.

Aquaponics "Cradle of Life"

Other Business: Examples of Products Delivered

Arid Land Research Center, Tottori University

(Delivered in Mar. 2016)

Products delivered:

Experimental System for Analyzing Responses of Dryland plants to Climate Changes (2 units) (Simulates the climates of arid lands, including high temperature, low humidity, strong sunlight, and high winds)

Uses:

Plant cultivation experiments and experiments to develop efficient water-usage technologies in arid lands, research to solve issues facing arid lands

Experimental System for Analyzing Responses of Dryland plants to Climate Changes

Experiment in progress (Testing wheat for drought stress)

Introduction to ESPEC's All Weather Simulation Chamber (in the Kobe R&D Center)

(Mar. 2021)

Opened the world's first All Weather Simulation Chamber Encouraging open innovation and strengthening environmental creation technology

Replicates dynamic climate environments with high-precision control and variation of seven environmental factors (temperature, humidity, snow, fog, rain, sunlight and wind)

All Weather Simulation Chamber

Examples of tests in dynamic environments

(1)Tests to replicate the change from sleet to snow

Snow with different amounts of water content can be replicated, including snowfall at temperatures around 0°C, which is close to snowfall in a natural environment. By controlling the snow quality and temperature, the laboratory replicates the change from sleet to snow. The laboratory can confirm the performance of automated driving sensors for which snow accretion has become a problem.

Test chamber: Width 6 m x Depth 9 m x Height 3 m
A black coating is applied to suppress
the diffuse reflection of light.

(2)Experiment to replicate the change from rain to fog

The laboratory controls the thickness, temperature and humidity of fog and replicates the change from rain to fog. The laboratory can confirm the performance of automated driving sensors in response to the effects of fog.

Securities ID code:6859

Sustainability Initiatives

ESPEC CORP. August 22, 2025

About ESPEC's Sustainability

Guided by our corporate philosophy,

"THE ESPEC MIND," ESPEC will help to solve social and
environmental issues through businesses centered on
environmental creation technology, with the aim of achieving
sustainable growth.

Corporate Philosophy

Our important values that have been passed on since our inception "THE ESPEC MIND" (Excerpt)

The Origin

Aim for better value exchange as a public institution

Mission

Provide more certain Seikankyo (living environment) via environmental creation technology

Style

Progressive, Reliable, Open, Fair

Declaration

What ESPEC promises society

"compliance," "culture," "human rights," "the environment," "education/enlightenment."

Sustainability Policy and Materiality

Looking toward sustainable growth, we formulated a sustainability policy, and identified materiality (important issues) that must be addressed in order to produce social and economic value.

Sustainability Policy

- By putting our corporate philosophy (THE ESPEC MIND) into practice, we are working to create and improve both social value and economic value.
- By maintaining a good exchange of value with our stakeholders, we are aiming for continuing growth.
- Based on ESPEC Vision 2025, we will contribute to solutions for the global environment and social issues through our business activities, centering on Environmental Creation Technology.
- We will engage in active disclosure of information related to sustainability.

Materiality

- Solve social challenges through global business
- •Provide products and services with responsibility
- •Be environmentally friendly

- Securing and cultivating diverse human resources
- •Enhancement of group governance

Corporate Value Creation Process

Invested capital

Financial capital

Manufactured capital

Intellectual capital

Human capital

Our Business Activities

Equipment Business

- Environmental Test Chambers
- Energy devices equipment
- The semiconductor equipment

Service Business

- The after-sales service and engineering
- Laboratory testing services and facility rentals

Other Business

- The environmental preservation
- Plant production systems

Mission and significance of existence

- Provide more certain Seikankyo (living environment) via environmental creation technology
- Aim for better value exchange

Value to offer

Contributes to safety/peace of mind in cutting-edge technology

Repay stakeholder trust

Provide employees with "diverse growth support" and "opportunities to shine"

Contribute to the global environment

ESPEC's Business

Equipment Business

Contribute to the development of advanced technologies through the supply of products and services leveraging environmental creation technology

• Supply products and services that contribute to the development of advanced technologies to solve social and environmental issues

Environmental Test Chamber

Supply environmental test chambers that artificially replicate environmental factors such as temperature and humidity, thereby ensuring the reliability of products

Energy Device Equipment

Supply evaluation systems for secondary batteries and fuel cells installed in eco cars

Semiconductor Equipment

Supply products such as burn-in chambers and systems for semiconductor inspection and measurement and evaluation systems

Temperature & Humidity Chamber
"Platinous J series"

Drive-In Chamber for Vehicle Testing

Burn-In chamber for semiconductor inspection

Secondary Battery Charge-Discharge Evaluation System

ESPEC's Business

Service Business

Contribute to the development of advanced technologies through the supply of products and services leveraging environmental creation technology

• Supply products and services that contribute to the development of advanced technologies to solve social and environmental issues

After-sales Service and Engineering

Conduct product maintenance and preventive maintenance so that customers can use systems with peace of mind.

Laboratory Testing Services

Provide laboratory testing services based on technologies and testing expertise developed through environmental tests.

Technical support using IT

Capable of performing various safety tests for secondary batteries compliant with United Nations regulations and other standards

Battery Safety Testing Center

ESPEC's Business

Environmental Conservation Business

Contribute to biodiversity conservation

Environmental conservation business to restore the natural environment, including reforestation (tree planting) that contributes to biodiversity and CO2 fixation, waterfront biotope restoration to restore natural rivers, and grassland creation using native species.

A forest restored along the approach to Rinno-ji Temple in Sendai

Waterfront biotope restoration on the Sumida River Terrace in Tokyo

Plant Production Systems Business

Contribute to a stable food supply to address global warming and extreme weather

Provide plant factories and research devices that can efficiently produce vegetables by controlling temperature, light, and other factors, as well as systems such as aquaponics that circulate water and nutrients to grow vegetables and fish together.

Plant factory using deep sea water Produce and sell vegetables high in minerals

Experimental System for Analyzing
Responses of Dryland Plants to Climate Change
(Arid Land Research Center, Tottori University)

Products and Services that Contribute to Resolving Environmental and Energy Issues

Product lineup to evaluate the performance and durability of secondary batteries, fuel cells, solar batteries and power devices

Secondary Battery Charge-Discharge Evaluation System

Fuel Cells Evaluation System

Temperature Cycle Test System for Solar Battery Modules

Power Cycle Test System for Power Device

- xEV Battery Safety Test & Certification Center compliant with United Nations regulations on the safety of automotive secondary batteries
- In October 2014, entered into business alliance with TÜV SÜD Japan Ltd., a third-party certification agency
- In September 2015, opened in Utsunomiya City, Tochigi Prefecture, and in February 2025, opened in Tokoname City, Aichi Prefecture

Tochigi xEV Battery Safety Test & Certification Center

Laboratory testing services using 100% renewable energies (domestic)

Environment Targets / Mid-term Plan on the Environment

Environment Targets for FY2030

Reduce greenhouse gas emissions

by 60% for SCOPE 1+2, 30% for SCOPE 3 (compared with FY2019 levels)

In July 2023, received Science Based Targets (SBT) certification from the international SBT Initiative*

*SBT Initiative

An international initiative that encourages firms to set scientifically-grounded targets for reducing greenhouse gas emissions so that the goals of the Paris Agreement may be achieved. Jointly managed by CDP, which is an NGO involved in environmental information disclosure, UNGC (United Nations Global Compact), WRI (World Resources Institute), and WWF (World Wide Fund for Nature).

DRIVING AMBITIOUS CORPORATE CLIMATE ACTION

The 8th Mid-Term Plan on the Environment (FY2022-FY2025)

Basic Policy: "Contributing through business with customers involved with developing green technologies" Strengthening efforts toward combating global warming and conserving biodiversity

- Environment Targets for FY2025
- •Reduce greenhouse gas emissions by 55% for SCOPE 1+2 and 10% for SCOPE 3 (compared with FY2019 levels)
- Contribution of 95t (total) of carbon fixation through 50,000 trees planted by ESPEC MIC Corp.
- •Biodiversity conservation activities through the "ESPEC's 50-Year Forest" in Sanda City, Hyogo Prefecture

Biodiversity Preservation Initiatives (1)

Kobe R&D Center, a hub for biodiversity preservation activities ESPEC Bambi-no-Sato Certified as a "Natural Symbiosis Site" by the Ministry of the Environment

The site has a forest of approximately 30,000 trees comprising native plant species, planted and grown by employees; rooftop green space using plant species native to the northern Rokko region on the roof of the technology development building; and a biotope made up of two ponds and a stream. Certified as "Natural Symbiosis Site" an Other Effective area-based Conservation Measures (OECM) site by the Ministry of the Environment in October 2023.

Received 2024 Minister of Economy, Trade and Industry Award, at the National Award for Greenery Factory sponsored by METI.

Acquired the FY 2022 ABINC Certification of the Association for Business Innovation in harmony with Nature and Community (ABINC)*.

Biodiversity Preservation Initiatives (2)

Biodiversity conservation activities "ESPEC's 50-Year Forest"

- •In November 2022, started the forest creation for "ESPEC's 50-Year Forest" using the "corporate forests" system under the Ministry of Agriculture, Forestry and Fisheries in Sanda City, Hyogo Prefecture
- •Held a total of three tree-planting festivals by April 2024.
- Approximately 400 employees and others participated in planting a total of 12,000 trees over the past two years

The 3rd Tree-Planting Festival
Seeds were selected based on carbon fixation and
biodiversity functions.

ESPEC Foundation for Earth Environment Research and Technologies

- Provides funding support every year for research, technology development on global environmental conservation
- Grants totaling ¥164.9 million have been provided to a total of 327 groups over the past 26 years since the Foundation was established in 1977

27th award ceremony

Initiatives to Maximize Human Resources

Improving the quality of corporate culture and organizational management

- Round-up Training Course, Direct Communication sessions, Compay-wide event, 1 on 1 meetings, address people with "san" rather than their job titles
- Engagement surveys, personnel assessments, and 360° Surveys
- A performance evaluation system that fosters ambition and growth

Individual growth support

- Career training
- Support for language study
- Recurrent education
- Remote learning

Company

- Diverse growth support
- Providing opportunities to shine

Enhancing corporate value

Sharing the joy of growth Employees and management joining together in vigorous activity

Employees

- Independent growth
- Work satisfaction

Management strategy-linked human resources development

- Training of next-generation management
- Global human resources
- DX personnel and digital personnel

Diversity and inclusion Ensuring employee health and safety

- Promoting the utilization of women and senior citizen employees
- Health promotion, mental healthcare
- Increasing the rate of disability hires
- Implementation of human rights and harassment education

Contributions to Society

ESPEC Smile Club: a donation system featuring employee participation

- Donated to an organization that conducts CSR activities related to children and medical care through the matching gift system in which the Company matches donations made by employees.
- In April 2025, We donated a total of 907,700 yen to Save the Children Japan's "Gaza Strip, Palestinian Authority Emergency Assistance" and "2024 Noto Peninsula Earthquake Emergency Child Support".

Vegetables harvested at a plantation staffed by workers with disabilities were donated to children's cafeterias

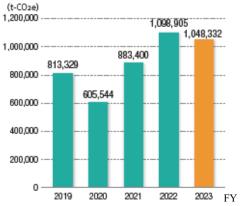

- Periodically donated vegetables harvested at ESPEC Smile Farm*, a plantation staffed by workers with disabilities, to local children's cafeterias
- * Opened in November 2021 in a rental farm operated by a company that supports employment of people with disabilities. 4 individuals were hired to work at ESPEC Smile Farm, specifically 3 staff members with disabilities and 1 farm foreman.

Employees picked vegetables as a team

Non-Financial Data (1)

Greenhouse gas emissions

^{*1} The number of employees is as of the end of each fiscal year.

^{*2} Retirees are excluded.

^{*3} The Company has transitioned from a company with an Audit & Supervisory Board to a company with an Audit & Supervisory Committee in June 2022.

^{*4} The number of female directors (including executive officers) is as of the end of June of each fiscal year.

External Recognition

ESG-Related Evaluations

- Included in the ESG index "FTSE Blossom Japan Sector Relative Index"
- Rated "B" score for the fifth consecutive year in the CDP Climate Change Survey, "B-" score for Water Security
 - Selected as Supplier Engagement Leader for three consecutive years, the Top Rank in the Supplier Engagement Ratings
- Selected for the second consecutive year as an Asia-Pacific Climate Leader by the Financial Times in the UK and German data provider Statista
- Received a 3.5-star rating in the NIKKEI Sustainable Management Survey, SDGs Edition
- Received a 3-star rating in the NIKKEI Sustainable Management Survey, Smart Work Edition

IR Website Evaluations

- Selected as a Commendation Award of the Internet IR Award of Daiwa IR
- Selected as a "GRADE AAA" company website in the Nikko Investor Relations' All-Japanese Listed Companies' Website Ranking
- Awarded a Bronze Prize in the Gomez IR Website Ranking (17th in its industry)
- Awarded as an excellent company in the Gomez ESG Website Ranking
