3. Reasons for Revision

We have revised upward our forecast for the six months ending September 30, 2026 and full-year financial forecast for the fiscal year ending March 31, 2027, as we expect net sales, operating profit, profit before tax and profit attributable to owners of the parent to be higher than our previous forecast, mainly due to strong sales of hematology instruments in Americas region and more pronounced yen depreciation than we had expected in the first three months ending June 30, 2026.

4. Dividend Forecast

Regarding the dividend forecast, there is no change from the forecast announced on May 14, 2026.

Note: The forecasts above were made based on information available on the day of this release. Actual results may therefore differ materially from those described above due to various unforeseen factors and possible events in the future.
