Notice Regarding Construction of Factory 4 in the Philippines

YAMAICHI ELECTRONICS CO., LTD. (the "Company") hereby announces that, at a meeting of the Board of Directors held on September 18, 2026, the Board resolved to construct Factory 4 at Pricon Microelectronics, Inc. (Philippines; hereinafter, "Pricon Microelectronics"), a consolidated subsidiary of the Company, as described below.

1. Purpose of Construction of Factory 4

The Yamaichi Electronics Group is expanding its global production capacity and strengthening its stable supply system in anticipation of medium- to long-term demand growth in markets including semiconductors, automotive, communications (including AI servers), and industrial equipment.

At Pricon Microelectronics, securing additional production space has also become necessary to accommodate future business expansion. Accordingly, the Company has decided to construct a new Factory 4.

2. Overview of Factory 4

Item	Details
Location	Light Industry & Science Park IV (LISP IV), Malvar, Batangas, Philippines
Structure	Three-story building
Total floor area	Approx. 30,000 m ²
Main use	Assembly of semiconductor test sockets, connectors, and other products
Total investment	Approx. JPY 6.5 billion
Start of construction	February 2027 (planned)
Building completion and handover	End of September 2028 (planned)
Start of operations	Second half of FY2028 (planned)

Total investment includes the cost of the building, fixtures and equipment, and other expenses, but excludes costs related to the relocation of existing factories and similar expenses.

3. Key Features of Factory 4

- Improved quality and safety through a layout optimized for production flow
- Further improvements in quality, cost, and delivery (QCD) through expanded in-house production of components
- Improved productivity through equipment automation and robotics
- Use of renewable energy through the installation of solar power generation systems

Through these initiatives, the Company will establish a production system capable of responding flexibly and swiftly to demand fluctuations and customer needs in growth markets, thereby strengthening the Group's foundation for medium- to long-term growth.

4. Impact on Financial Results

Regarding the impact of this project on the Company's consolidated financial results, the Company will promptly disclose any matters requiring disclosure should they arise.

5. Rendering of Completed Factory 4

Rendering of Factory 4 upon completion (adjacent to Factory 3)

Reference: Total floor area of existing factories in the Philippines

Factory 1: 8,951 m² Factory 2: 6,408 m² Factory 3: 7,484 m²
