Notice of Strategic Investment in Frinks AI

UNISOL Holdings Corporation, hereinafter the “Company,” hereby announces that the Company’s consolidated subsidiary, UNISOL Corporation, has entered into an agreement to invest an amount equivalent to 1 million US dollars in Frinks Digital Technologies Private Limited, hereinafter "Frinks AI," a company providing AI-based visual inspection solutions for the manufacturing industry. The details are as follows.

1. Background

Frinks AI is a deep-tech startup established in India in March 2020 by IIT Hyderabad alumni, Mr. Aditya Agrawal, Mr. Dharmgya Sharma, and Mr. Subhra S. Bhattacharjee. The company provides proprietary AI-based visual inspection solutions.

Frinks AI’s core strength lies in its no-code, highly intuitive AI visual inspection software. It has a proven track record of automating inspection processes for major clients across various sectors in India, including automotive, motorcycles, home appliances, building materials, and food industries. Furthermore, the company is experiencing a growing number of inquiries from markets in North America and Southeast Asia, demonstrating its significant potential for global growth.

UNISOL group has decided to invest in Frinks AI to upgrade our engineering business in the global market by leveraging Frinks AI's proprietary technology, and to create new business opportunities by accessing the network within the rapidly growing Indian industrial automation sector.

As part of UNISOL group's ongoing initiatives in the AI domain for the manufacturing industry, this transaction follows the investment in EUREKA ROBOTICS PTE. LTD. (Singapore) announced in December 2024, and the investment in Mowito Robotics Inc. (USA) announced in January 2025.

Through our partnership with Frinks AI, we will continue to grow and develop the Group's business by providing unique and innovative automation solutions that will delight our customers.

The closing of this transaction is subject to certain conditions precedent, including the opening of a Demat account in India and obtaining the required clearances under the Foreign Exchange Management Act (FEMA) of India. The consideration for the investment shall be paid in Indian Rupees equivalent to 1 million US dollars, based on the prevailing market exchange rate on a separately agreed reference date and time.

2. Overview of Frinks AI

- | | |
|--------------------|---|
| (1) Name | Frinks Digital Technologies Private Limited |
