Based on recent performance trends, Mebuki Financial Group Inc. announces that it has revised the consolidated earnings forecast and the year-end and annual dividends forecast for the fiscal year ending March 31, 2026, which were announced on November 10, 2025.

### 1. Revision of consolidated earnings forecast for FY2025 (From April 1, 2025 to March 31, 2026)

### (2) Reason for the revision

We expect that net income attributable to owners of the parent for the fiscal year ending March 31, 2026 will exceed the previously announced forecast. Therefore, based on our shareholder returns policy (We aim to fundamentally achieve a stable and sustainable increase in dividends per share through profit growth, and target a Dividend Payout Ratio of 40% or more by fiscal year 2027) we determined to increase the year-end dividend by ¥ 2.0 to ¥ 16.0 per share (the annual dividends are estimated to be ¥28.0 per share, an increase of ¥ 2.0).
