ESG Data Book 2025

Our company is committed to pursuing “the true essence of the insurance business” and sincerely striving to protect our customers' precious lives through insurance. Since our founding, we have actively engaged in community-focused hiring and business activities, delivering “peace of mind” to our customers through financial planning. Additionally, as part of our business, we are dedicated to financial education, believing this contributes to improving financial literacy and promoting uniform knowledge nationwide.

Going forward, we will continue to engage in our business activities with sincerity, providing peace of mind to all our customers, including the children who will shape the future of Japan. Furthermore, we will strive to sustainably enhance our corporate value and contribute to the realization of a sustainable society that enables economically prosperous lives.

As part of these efforts, we have compiled the “ESG Data Book 2025,” which summarizes our non-financial information from an ESG (environmental, social, and governance) perspective, and released it today.

In response to the growing global interest in sustainability, we are continuing to publish this document following 2024.
