Scroll Corporation Achieves "B" Score in CDP 2025 Climate Change Report

Scroll Corporation (Headquarters: Chuo-ku, Hamamatsu City, Shizuoka Prefecture; President: Tomohisa Tsurumi; hereinafter the "Company") hereby announces that it has received a "B" score in the Climate Change category of the 2025 questionnaire conducted by CDP, a global non-profit organization that runs the world's environmental disclosure system. This was the Company's first time responding to the CDP questionnaire.

The CDP score serves as an indicator of how well the information disclosing company understands and manages its environmental impact. Companies are evaluated on an eight-point scale (A, A-, B, B-, C, C-, D, D-) based on detailed criteria. The "B" score is designated as "Management Level," the third-highest tier. This rating recognizes that the Company has been evaluated as having "recognized the actions to manage environmental issues and results of processes, and is not only understanding them but also putting them into practice."

The Scroll Group has identified materiality (material issues) related to ESG (Environmental, Social, and Governance) to help realize a sustainable society. To address these issues, the Group is promoting initiatives such as reducing CO2 emissions and minimizing the use of plastic materials and paper. The Company believes that the acquisition of this Management Level score is a validation of this series of initiatives.

For details on the Scroll Group's sustainability initiatives, please visit our corporate website:

Moving forward, the Company will continue to address climate change and social issues through

its business activities. We are committed to further enhancing our information disclosure and contributing to the realization of a sustainable society.

■ About CDP

CDP is a global non-profit that runs the world's only independent environmental disclosure system. In 2025, over 22,100 companies disclosed information through CDP, with approximately 20,000 companies receiving a score.
