RYODEN CORPORATION

(Code: No. 8084, TSE Prime Market)

President & CEO Katsuyuki Tomizawa,

Contact: Kouzaburo Okamura, General Manager, General Affairs Dept

(Tel: +81-3-5396-6111)

[Updated] Announcement of New Medium- to Long-Term Management Plan (FY2025-FY2029)

RYODEN CORPORATION (hereinafter, the “Company”) are pleased to announce that we have formulated a new medium- to long-term management plan “ONE RYODEN Growth 2029 | 2034” for the five-year period from fiscal 2025 to 2029.

As the previous medium-term management plan will end in FY2024, we have reviewed it and formulated a new medium- to long-term management plan, “ONE RYODEN Growth 2029 | 2034,” based on our recognition of the business environment surrounding our company.

“ONE RYODEN Growth 2029 | 2034” is formulated from the perspective of backcasting from 2047, when the Company will become a 100-year company.

In order to realize our new vision, “An Excellent Company that Co-Creates the Future,” we will work together with all stakeholders to create value and continue to evolve into a world-class company.

For details of the new medium- to long-term management plan, please refer to the attached updated document.

ONE RYODEN Growth 2029 | 2034

- **Key Management Targets and Results**

Review of ICHIGAN 2024: Basic Policy

The Group’s purpose

.....

Giving shape to “Waku-Waku (Excitement)” by connecting people and technology

The Group’s vision

.....

Contribute to the achievement of a sustainable society in terms of the environment, safety, and security

Vision for 2024

.....

Continue to create new value as a business creation company that transcends the bounds of an agency or trading company

Key management targets	Net sales	¥260.0 billion	Net sales in new businesses	¥22.0 billion
	Operating profit	¥10.0 billion	Gross profit margin in new businesses	18%
	Operating profit margin	3.8%	ROE	8.0%
Focused themes	<div><div>1.</div><div>Establish business models for growth businesses and create new, next-generation businesses</div></div> <div><div>2.</div><div>Enhance the productivity in our mainstay core businesses</div></div> <div><div>3.</div><div>Strengthen the foundation for business promotion</div></div>			

Review of ICHIGAN 2024: Progress Assessment of Key Management Targets and Focused Themes

Key management targets	Not achieved	<p>We fell short of the key management targets.</p> <ul style="list-style-type: none"> • Profitability improved, particularly in the mainstay core businesses. Meanwhile, the X-Tech and other new businesses, which were expected to grow, saw sluggish increases in profitability. Additionally, the termination of some contracts in the Electronics business adversely affected performance. • We need to enable innovation to create further added value and transform our business portfolio to enhance earning capacity.
	Partially achieved	<p>1. Establish business models for growth businesses and create new, next-generation businesses</p> <ul style="list-style-type: none"> • Initiatives implemented in various areas, such as smart agriculture and ICT, have yet to lead to profitability. These results reflect the impact of changes in the business environment, which required us to make strategic adjustments and posed certain challenges in formulating and executing an effective strategy. • We need to commercialize and scale these growth drivers.
Focused themes	Achieved	<p>2. Enhance the productivity in our mainstay core businesses</p> <ul style="list-style-type: none"> • Profit margins increased in the Electronics business, driven by automotive-related products, as well as in the FA Systems business, supported by expanded operations in China. External factors, such as currency fluctuations and the global economic recovery after the COVID-19 pandemic, also provided a favorable tailwind. • To further enhance earning capacity, we need to improve our adaptability to market changes for higher productivity and strengthen our ability to deliver solutions, as well as deepening and broadening our existing businesses and exploring new domains.
	Partially achieved	<p>3. Strengthen the foundation for business promotion</p> <ul style="list-style-type: none"> • While the transition to a divisional structure and the establishment of the Strategic Technology Center have strengthened the framework for advancing business strategy, progress has been delayed in developing systems to support structural transformation—such as changes in administrative functions, the cultivation of global talent, and the creation of mechanisms to drive the business portfolio strategy. • To prepare for an uncertain and unpredictable era, we need to establish a robust foundation for business promotion, with the flexibility to adapt to change.

Review of ICHIGAN 2024: Key Management Targets and Results

		ICHIGAN 2024					ICHIGAN 2024 Targets and Results	
	2019	2020	2021	2022	2023	2024	Targets	Achievement Rate
Net sales (Millions of yen)	230,087	196,841	229,126	260,303	259,008	215,790	260,000	83%

RYODEN's Business Portfolio

FY2024 (FY ended March 2025)

| Business Environment Recognition and New Vision

An Excellent Company Co-Creating the Future

We work with all stakeholders to create value and continue evolving into a globally respected company

- Shift to sustainability-oriented management
- Increasing significance of efforts toward corporate social responsibility

Business Environment Recognition (Megatrends) for 2047					
Demographic change	Global power balance change	Climate change	Resource/Energy change	Technology change	Values change
<ul style="list-style-type: none">• Aging society• Low birth rate• Changes in world population• Changes in dynamic balance	<ul style="list-style-type: none">• Destabilized world order• Emergence of new developing countries• Increasingly multipolarized world• Economic bloc shifts	<ul style="list-style-type: none">• Tightened environmental regulations• Abnormal weather conditions• Carbon tax• Response to environmental problems	<ul style="list-style-type: none">• Food shortage• Global water scarcity• Energy security• Surging resource prices• Alternative or new food materials• Recycling technology• Disaster preparedness	<ul style="list-style-type: none">• AI evolution• Singularity• Smart infrastructure• Robotics• Communication technology advancement• Energy generation and storage technology• Development of telemedicine technology• Expanded digital economy• Adoption of digital currency• Regenerative medicine	<ul style="list-style-type: none">• Novel values• Inclusion• Health awareness• Diversity• Well-being• Global talent

Conceptual Diagram of Sustainability Management

In line with our Basic Sustainability Policy, we aim to enhance corporate value in a sustainable manner by harmonizing social and economic value.

RYODEN's Materiality (Material Issues)

Solving social issues through technology and innovation

Creating a safe and secure society and way of life

Living in harmony with the Earth

Growing talent that embodies our purpose and building an environment that supports our growth and success

Building a sustainable circular economy through strategic capital optimization

Advancing corporate governance practices

RYODEN's Core Competencies to Achieve Its Vision

As the megatrends show, the capabilities that customers, local communities, and other stakeholders expect us to deliver are changing. Over the years, we have leveraged our business foundation to build strong customer trust and help solve their challenges. Further enhancing these capabilities, we will develop three new competencies to achieve our vision defined in this management plan and to meet expectations from diverse stakeholders.

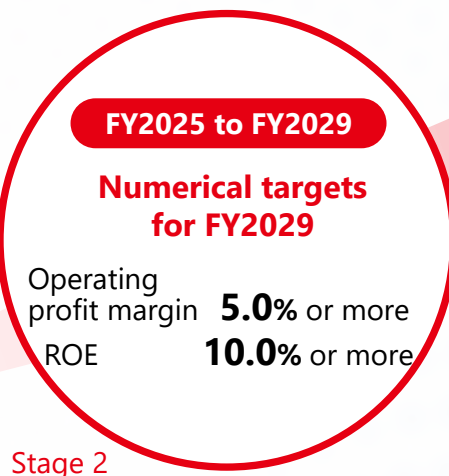

Positioning of the Medium- to Long-term Management Plan

ONE RYODEN Growth 2029 | 2034

Having transformed into a business creation company, we will grow.

We will accelerate growth as a business creation company to sustainably enhance corporate value.

Continue to create new value as a **business creation company** that transcends the bounds of an agency or trading company

Financial/Non-financial Targets, Growth Investment and Shareholder Return Policies

Financial Targets

	FY2024 Results (FY ended March 2025)	FY2029 Targets
Operating profit	¥5.4 billion	¥13.5 billion
Operating profit margin	2.5%	5.0% or more
ROE	5.3%	10.0% or more
Net sales in X-Tech/ new businesses	¥8.6 billion	¥23.5 billion
	FY2029 Targets	
Growth investment	Aim to invest ¥25.0 billion to ¥35.0 billion in five years	
Shareholder returns	Ensure stable and continuous returns with a DOE of 3.5% or a total consolidated payout ratio of 50%	
Capital efficiency improvement	Utilize liabilities maintaining the D/E ratio at 0.3 or less; Sell cross-shareholdings and non-core assets; Develop a framework to optimize investments based on ROIC, etc.	

Non-financial Targets

GHG Reduction	FY2024 Forecasts*1	FY2029 Targets
Scopes 1 and 2 (compared to 2023)	+17%	-36% or more
Scope 3 (compared to 2023)	-16%	-21% or more
Human Capital Investment	FY2024 Results	FY2029 Targets
Engagement score*2 (deviation)	49.2	52 or more
D&I: Proportion of women in management positions	1%	10% or more
Annual development investment per employee	¥130,000	¥200,000 or more

*1: The GHG emissions of Scopes 1, 2, and 3 for FY2024 are preliminary figures as of May 2025.

*2: The engagement score is for work engagement.

| Management Strategies of ONE RYODEN Growth 2029 | 2034

To realize our new medium- to long-term vision, we will implement the following six management strategies and reinforce our three Core Competencies: value creation, value provision, and value cycle.

Innovation strategy

Create new value by expanding and exploiting businesses and by exploring new business domains across three dimensions: product, market, and business model

Human capital strategy

Foster employees who drive co-creation of the future, and build an environment that supports their growth and success

Supply chain strategy

Enhance productivity and operational quality by streamlining processes from procurement to distribution and sales

Stakeholder engagement strategy

Deepen mutual understanding and collaboration with stakeholders

Financial strategy

Drive a virtuous cycle of reinvestment to achieve further growth by making optimal investments in business capital and utilizing it efficiently

Governance strategy

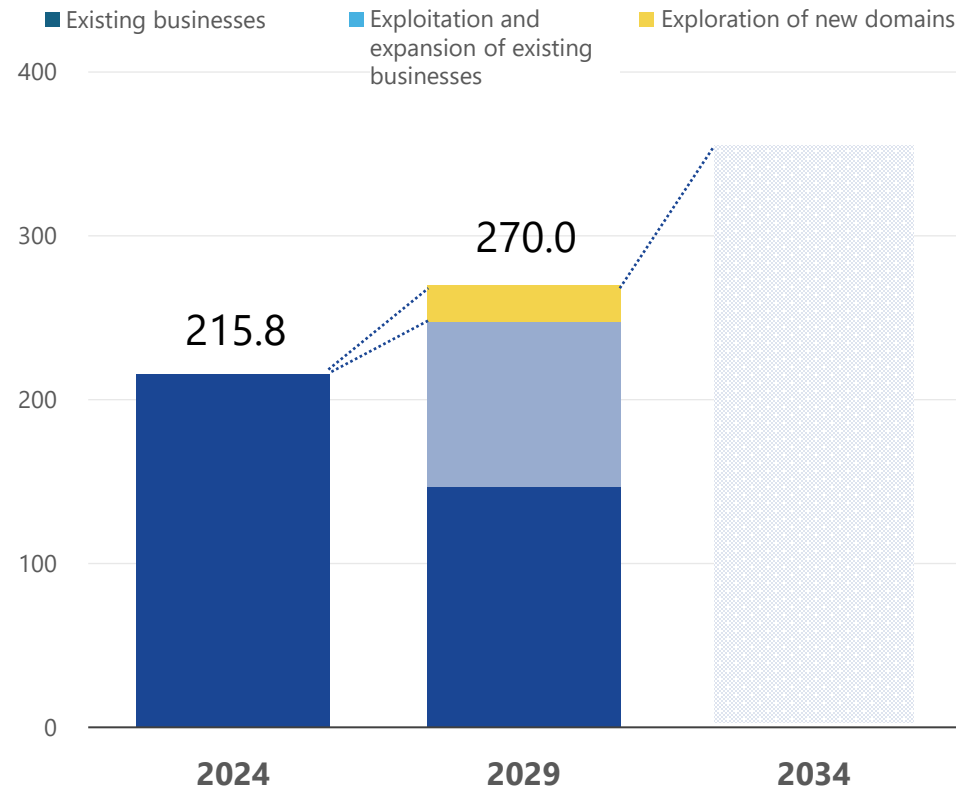

Advance the enhancement of the corporate governance structure to support agile and decisive decision-making

Management Strategy: Expected Growth in Sales and Profit

Target

Net Sales

(Billions of yen)

Operating Profit

(Billions of yen)

* The figures are subject to change.

| Six Management Strategies — Innovation 1

We will exploit and expand existing businesses and explore new domains through three dimensions of innovation to drive value creation.

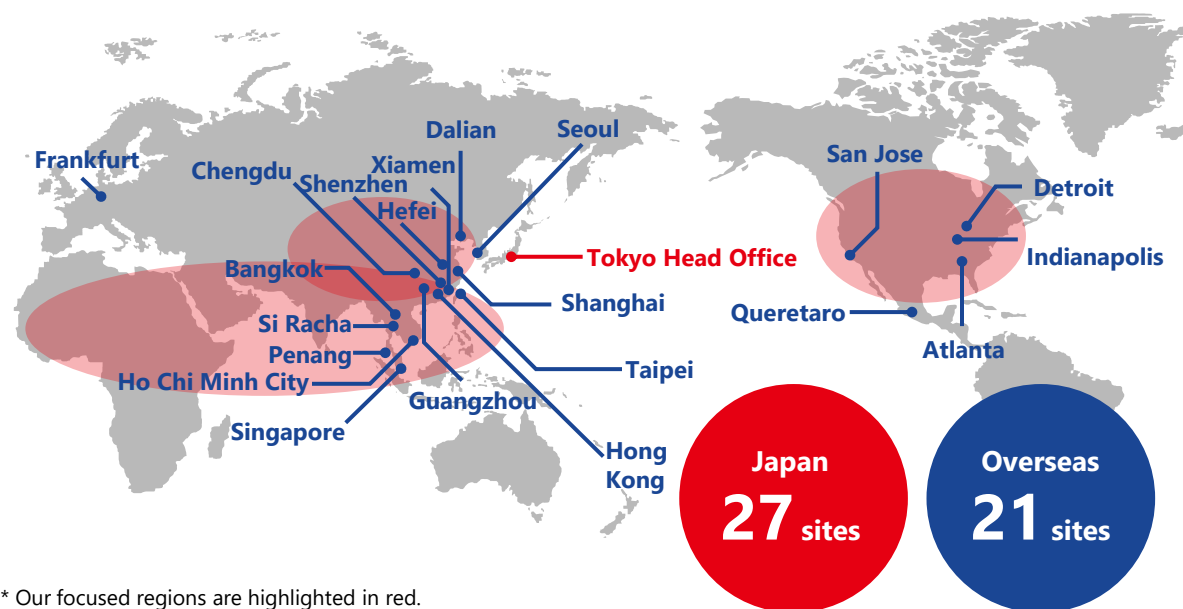

- Bring together expertise from inside and outside the company and drive innovation to make our business unique and effective in addressing social challenges
- Develop high-value-added products and services and provide highly engineering solutions to solve customer and social issues

Expand/exploit existing businesses		Explore new domains
Market innovation	Product innovation	Business model innovation
Leverage the strengths of existing products to expand into new markets or regions	Drive transformation toward new products and unique services to generate high added value	Create added value through business model transformation
<ul style="list-style-type: none">• Market acquisition through strategic investments in Japan and overseas• Regions: Global South, North America, and China• Markets: Smart-X markets, green markets, sustainability markets, etc.	<ul style="list-style-type: none">• Explore and promote new products with strong synergy with core offering• Strengthen the system engineering business.• Expand alliances with overseas products and partners in North America, East Asia, Taiwan, and others	<ul style="list-style-type: none">• Discover highly competitive products and expand our reach into new markets or regions where their strength can be fully leveraged• Leverage our engineering prowess to develop new products and unique services that can generate high added value• Transform our business models to create a high-value-added business in new markets or regions

| Six Management Strategies — Innovation 2

Focused regions for global expansion

- In ONE RYODEN Growth 2029–2034, our overseas business policy shifts from a customer-following expansion to a selective approach focused on key strategic areas.
- Leverage the strengths of existing products to expand into new markets or geographic areas
- Refine our area strategy to focus on high-growth regions and markets:
 - The Global South (rapid demographic changes)
 - China (large market size)
 - North America (fast technological innovation)

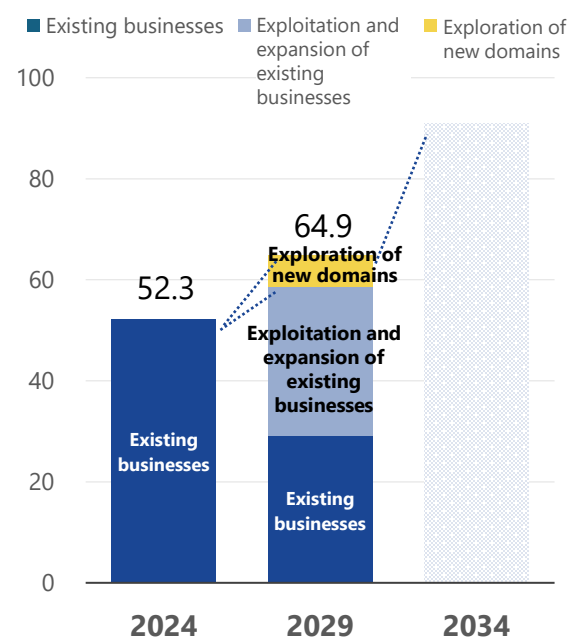

* Our focused regions are highlighted in red.

Targets for overseas subsidiaries and associates

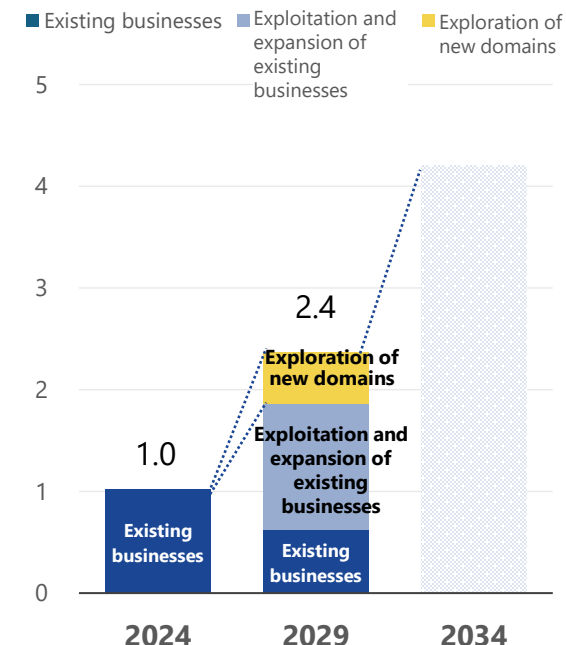

Net Sales

(Billions of yen)

Operating Profit

(Billions of yen)

| Six Management Strategies — Innovation 3

Focused domain: Smart-X markets

- Accelerate expansion to the smart city, smart mobility, and smart factory areas to tackle social challenges
- Explore new smart-X fields

Focused business model: Data-driven recurring model

- Aiming to thrive in smart-X markets, we will intensify our efforts in developing products under our original brand, RYODEN Tii!, to strengthen our presence in the markets and build continuous relationships with customers.
- Develop and promote a data-driven recurring model with a unique platform that helps us effectively use data to enable recurring revenue

| Six Management Strategies — Supply Chain

As a trading company, we need to provide a more robust supply chain. To further strengthen our supply chain as a core function of our trading business, we aim to build a sustainable and competitive supply system by optimizing the entire process—from procurement and distribution to sales—both domestically and internationally, while reducing costs, managing risks, and improving quality.

Strengthen resilience across the supply chain

- **Build a supplier management system and a quality assurance system for our brands**
- **Reform sales/operating processes to improve operational quality and productivity**
 - Environmental adaptation and risk reduction responding to supply and demand changes; value allocation (such as inventory optimization, opportunity loss avoidance, and disaster recovery capabilities)
- **Develop and leverage digital information infrastructure**

Supply Chain Management

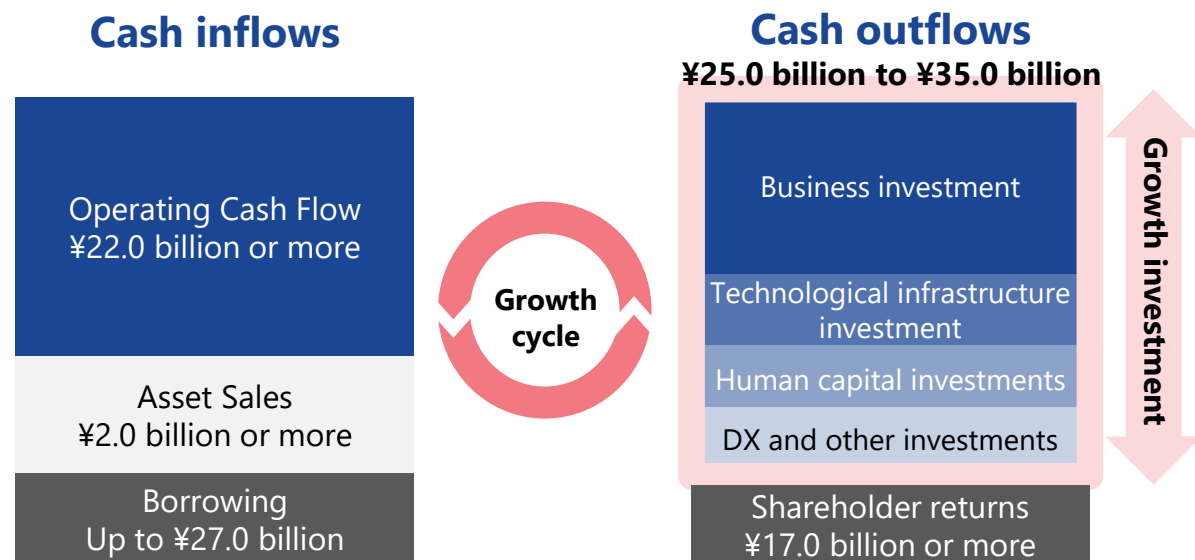

Six Management Strategies — Financial Strategy 1

We enhance corporate value by optimizing investment and efficiently using management capital, creating a virtuous cycle for future growth

Finance	Drive a virtuous cycle of optimal business capital investment and stable shareholder returns	<ul style="list-style-type: none"> Develop and implement a capital allocation strategy to build a growth cycle
	Invest in growth areas to enhance earning capacity (Business portfolio strategy) Drive profitability by executing investments in key growth sectors	<ul style="list-style-type: none"> Proactive Investment in new businesses Pursue growth investments in existing businesses while executing strategic reviews for withdrawal and restructuring (Develop a framework to optimize investments based on ROIC, etc.)
	Evolve risk management framework	<ul style="list-style-type: none"> Strengthen group governance and risk management framework
	Maintain a strong financial foundation	<ul style="list-style-type: none"> Enhance return on capital by optimizing the capital structure

	FY2029 Targets (FY ending March 2030)
Growth investment	Aim to invest ¥25.0 billion to ¥35.0 billion in five years
Shareholder returns	Ensure stable and continuous returns with a DOE of 3.5% or a total consolidated payout ratio of 50%
Capital efficiency improvement	Utilize liabilities maintaining the D/E ratio at 0.3 or less; Sell cross-shareholdings and non-core assets; Develop a framework to optimize investments based on ROIC, etc.

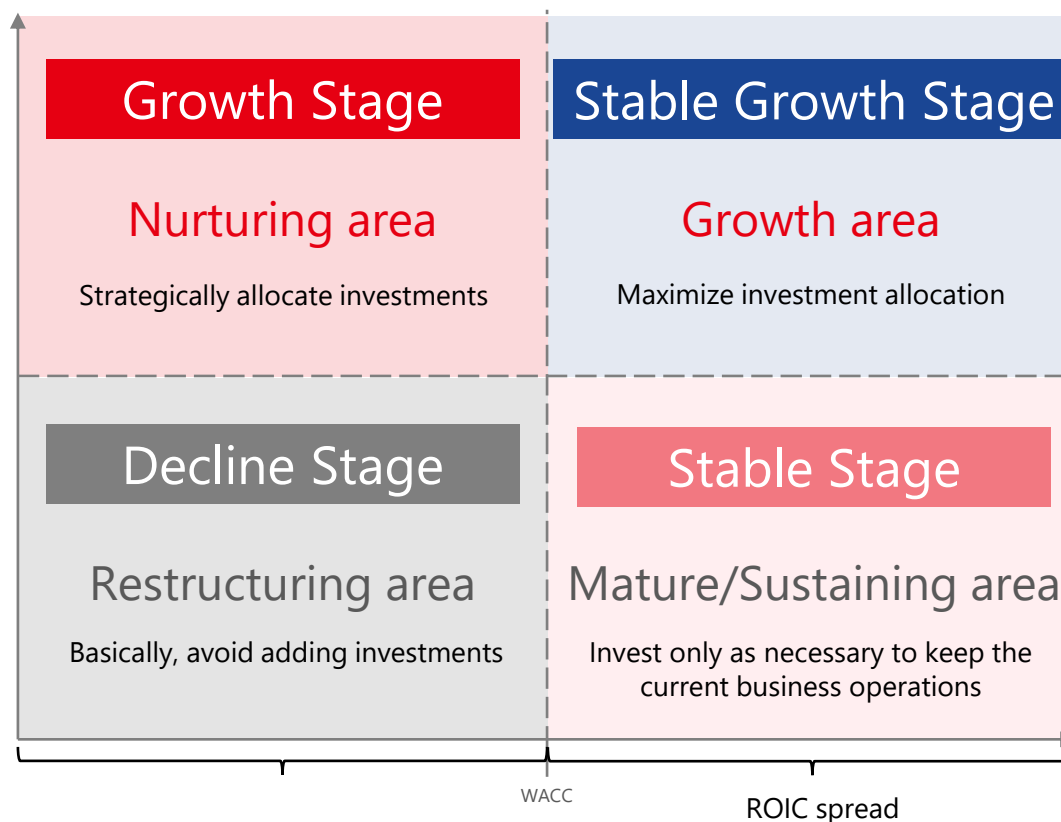

Six Management Strategies — Financial Strategy 2: Growth Investment Policy

Investment activities transforming our business portfolio

- Make appropriate growth investments to transform our business portfolio into the one supporting a growth cycle model

Policy on investment allocation across the business portfolio

Growth stage: ROIC and CAGR

Decline stage: ROIC and restructuring/withdrawal criteria

Six Management Strategies — Financial Strategy 3: Shareholder Return Policy

Dividend payout ratio: Targeting 40% to 60% for stable shareholder returns

New policy on shareholder returns

We have established a new policy to ensure mid- to long-term stable shareholder returns, setting a minimum DOE of 3.5% or a total consolidated payout ratio of 50%, aiming to avoid excessive dividend fluctuations caused by short-term profit volatility

Additionally, as part of our efforts to improve PBR and enhance shareholder return measures, we will strategically repurchase shares in a flexible manner, taking into account our cash and deposit levels as well as stock price trends.

Dividends per share

Payout ratio

DOE of 3.5% or
total consolidated payout
ratio of 50%

Provide stable
shareholder returns at
a ratio of 40-60%

Six Management Strategies — Human Capital

Foster employees who drive co-creation of the future, and build an environment that supports their growth and success		
Human capital	Enhance employee engagement	<ul style="list-style-type: none"> • Foster a corporate culture that embraces enjoying change • Promote diversity and inclusion • Establish a fair and transparent performance evaluation system • Create a comfortable working environment
	Actively invest in human capital that will drive co-creation of the future	<ul style="list-style-type: none"> • Develop and implement a dynamic talent portfolio plan • Train people and optimize organizations to realize our Purpose, Vision, and Values and implement the management strategy • Help employees shape their career by themselves

Human Capital Investment	FY2024 Results (FY ended March 2025)	FY2029 Targets
Engagement score (deviation)	49.2	52 or more
D&I: Proportion of women in management positions	1%	10% or more
Annual investment per employee in talent development	¥130,000	¥200,000 or more

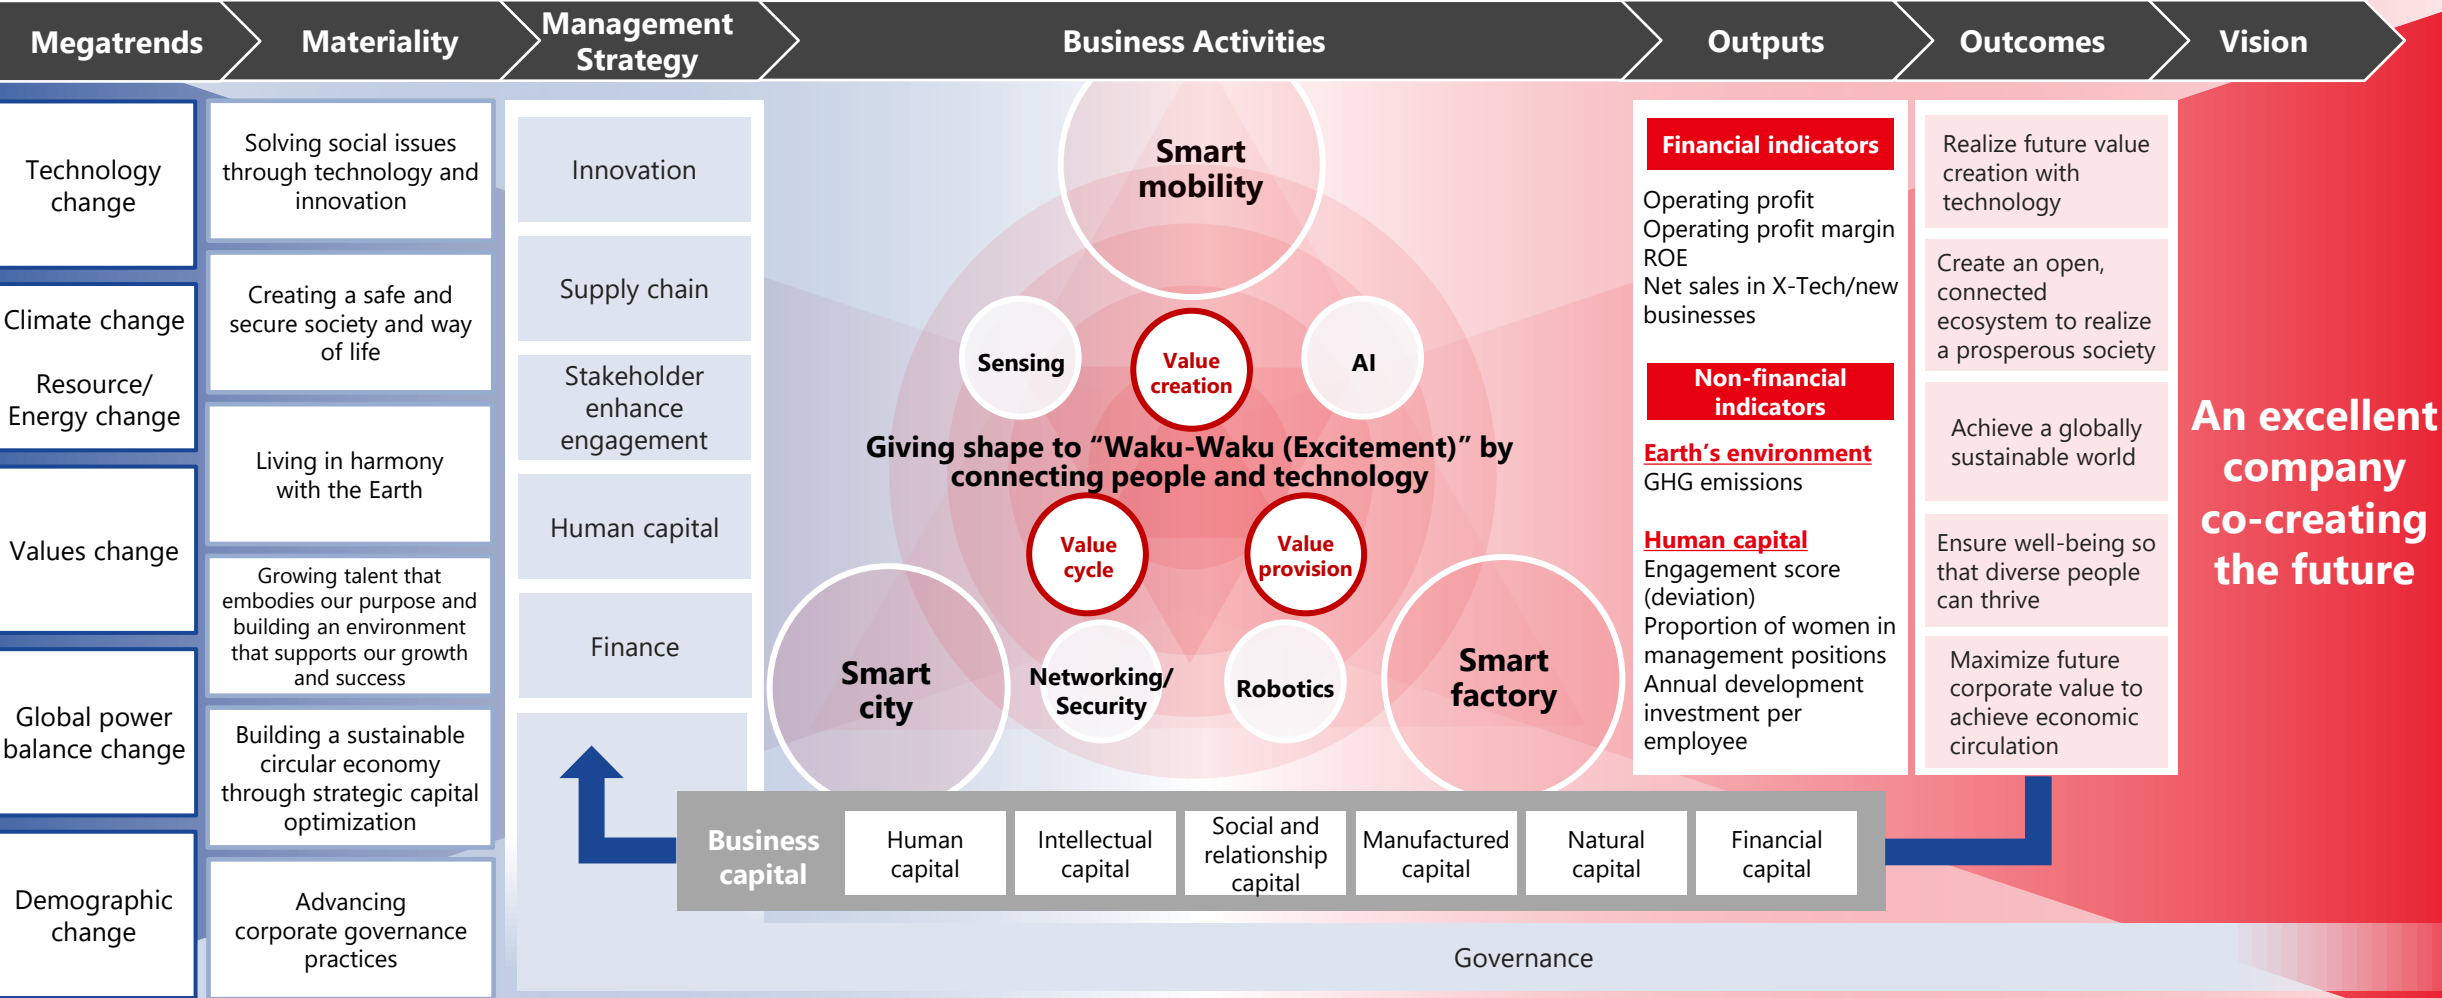

Six Management Strategies — Stakeholder Engagement and Governance

Stakeholder Engagement	Encourage communication with stakeholders to ensure deeper mutual understanding and closer collaboration for co-creating value												
	Enhance the brand	<ul style="list-style-type: none">• Inner branding (Raise awareness of our Purpose, Vision, and Values, business brands, etc.)• Outer branding											
	Promote SR and IR activities	<ul style="list-style-type: none">• Promote communication with shareholders and investors• Increase the liquidity of shares											
	Enhance social contribution activities												
	Strengthen efforts to reduce environmental impact	<ul style="list-style-type: none">• Reduce GHG emissions• Offer environmentally friendly products and services• Understand our dependency and impact on natural capital	<div><div>GHG reduction</div><table><tr><th></th><th>FY2024 Forecasts (FY ended March 2025)</th><th>FY2029 Targets</th></tr><tr><td>Scopes 1 and 2 (compared to 2023)</td><td>+17%</td><td>-36% or more</td></tr><tr><td>Scope 3 (compared to 2023)</td><td>-16%</td><td>-21% or more</td></tr></table></div>		FY2024 Forecasts (FY ended March 2025)	FY2029 Targets	Scopes 1 and 2 (compared to 2023)	+17%	-36% or more	Scope 3 (compared to 2023)	-16%	-21% or more	
	FY2024 Forecasts (FY ended March 2025)	FY2029 Targets											
Scopes 1 and 2 (compared to 2023)	+17%	-36% or more											
Scope 3 (compared to 2023)	-16%	-21% or more											

Governance	Promote advanced governance to enhance management transparency and fairness, and to support agile and decisive decision-making			
	Improve governance	<ul style="list-style-type: none">• Improve the effectiveness of the Board of Directors• Diversify the composition of the Board of Directors	<ul style="list-style-type: none">• Introduce a reward system linked to the KPIs of the medium-term management plan• Create a succession plan	
	Enforce compliance	<ul style="list-style-type: none">• Continue compliance education		
	Evolve risk management framework	<ul style="list-style-type: none">• Strengthen the structure for group governance and risk management		
	Advance governance	<ul style="list-style-type: none">• Adopt data-driven approaches to advance governance		

RYODEN's Value Creation Model

We use business capital effectively and collaborate with all stakeholders to create value through our corporate activities. By reinvesting the created value back into business capital to build a sustainable growth cycle, we aim to harmonize social value and economic value and sustainably enhance corporate value.

Sustainability Management: Our Businesses' Relation to Social Issues, Opportunities, and Risks

	FA Systems 	Cooling & Heating and Building Systems 	X-Tech 	Electronics 
Relation to social issues	<ul style="list-style-type: none"> Adapt to labor shortage and rising labor costs (productivity improvement and automation) Drive global factory revolution. Address energy saving and labor-saving needs Improve efficiency through high-precision and high-speed technology 	<ul style="list-style-type: none"> Offer energy-saving products to realize a sustainable society Focus on the net-zero market to accelerate towards a decarbonized society Meet the demand for stable energy supply Support safe and comfortable environments 	<ul style="list-style-type: none"> Highly information-oriented society Address food supply issue and create new business Achieve energy saving and smart security Improve industrial efficiency and safety Overcome healthcare challenges and improve the management Solve social and customer issues and support decarbonization 	<ul style="list-style-type: none"> Contribute to environmental conservation on Earth (energy saving, sustainable products) Meet green procurement requirements. Assist in preventing global warming and reducing environmental impact. Support a highly information-oriented society Build a sustainable supply chain
Opportunity	<ul style="list-style-type: none"> Technical approach to automation and labor reduction Full-scale launch of the ASEAN business platform Increase in and creation of popular products, and increased business meeting opportunities Closer relationship with key suppliers and customers 	<ul style="list-style-type: none"> Net-zero businesses (energy systems, building infrastructure, and building management) Energy markets expanded with environmentally conscious products such as solar power systems and grid-scale batteries Increase in trading volumes of main models More efforts applied to the net-zero business Expansion of system engineering business and the product lineup 	<ul style="list-style-type: none"> Decarbonization business in response to global warming Contribution to energy-saving solutions Increased demand for DX in the medical field Improved automatic safety technology New business creation and expansion driven by ICT technology Emerging business opportunities through AI applications 	<ul style="list-style-type: none"> Improved automatic safety technology Contribution to energy-saving solutions Exploration into new markets (amusement and energy-harvesting IoT) Global market development
Risk	<ul style="list-style-type: none"> Delay in launching growth businesses (SE, EMS, or processing applications) Unpredictable impacts on the manufacturing sector, for example, due to manufacturing site relocation from Japan to other countries and geopolitical risks Decrease in or loss of top-selling products Decreased business meeting opportunities Customer complaints and dissatisfaction 	<ul style="list-style-type: none"> Delay in transforming the portfolio for the net-zero business Sluggish construction and facility investment caused by soaring material, labor, and other costs Decreased customer satisfaction Customer requirements that are hard to meet, failures in the distribution network, and increased costs 	<ul style="list-style-type: none"> Slow adaptation to market changes or technological advances Delays in investment recovery and business scaling Intensified competition with rival companies Reduced business stability and delay in creating high-value-added business Obsolete or deteriorated information network. Downturn or contraction in our target markets and industries 	<ul style="list-style-type: none"> Intensified competition with rival companies Slow adaptation to technological advances Reduced business stability Delay in creating high-value-added business Loss due to delays in supply chain enhancement

Growth Investment to Transform the Business Portfolio

Aligning with the capital allocation policy to realize a growth cycle for medium- to long-term corporate value improvement, we will implement optimal investments in managerial capital, including growth investments.

Target

- Implement the growth strategy to create continuous cash flows from operating activities:
5-year earnings before tax of more than ¥40.0 billion (or earnings after tax of ¥28.0 billion or more)
 - Business expansion will lead to an approx. ¥6.0 billion increase in trade working capital.
* This estimate assumes an improved capital efficiency with ROIC and improved CCC by optimizing the business portfolio.
-
- Sell cross-shareholdings, etc.
 - Sell low cash flow non-core assets
-
- Basically, ensure liquidity on hand for 1.0 month
 - Utilize debt, such as borrowing and corporate bonds, maintaining the D/E ratio at 0.3 or less

Growth Investment to Transform the Business Portfolio

The innovation strategy is designed to deepen and broaden existing businesses and explore new domains to drive value creation continuously. We clarify the positioning of each segment and allocate resources flexibly to enable constant transformation of our business portfolio.

Focus business resources on **growth drivers**

Expand/Exploit businesses		Explore new domains
Core business innovation Intensively invest for transformation and profitability improvement	Growth businesses (X-Tech) Expand business domains	New businesses Create next-generation core businesses
<ol style="list-style-type: none">1. Strengthen the ability to propose solutions that address customer issues and make a shift to high-value-added business models2. Actively promote the sales of environmentally friendly products and seize business opportunities in sustainability-focused markets3. Use digital technology to improve sales efficiency and refine operations4. Leverage strategic partnerships and M&A to expand our business scale and get technologies and expertise5. Reduce risk related to dependency on business partners and strengthen strategic partnerships	<ol style="list-style-type: none">1. With a focus on plant factory technology, secure a leading position in the smart agriculture market and branch out into related fields2. By leveraging photosynthesis engineering technologies, promote businesses that contribute to a circular society3. Use sensing and network security technologies to create new business models4. Propose DX to food and other manufacturing facilities to help improve their working practices, safety, and security5. Promote data-driven recurring business models and strengthen the revenue foundation	<ol style="list-style-type: none">1. Enhance data analysis capabilities to offer data-driven solutions that can help manufacturers address their challenges2. Pursue and commercialize innovative business models free from conventional frameworks3. Strategically invest in securing business development assets (technology, people, data, etc.)

Growth Investment to Transform the Business Portfolio

Investment activities transforming our business portfolio

- Make appropriate growth investments to transform our business portfolio that supports a growth cycle model

* ROIC: Operating profit after tax ÷ {Working capital (Trade receivables + Merchandise inventory - Trade payables + Accounts receivable-other) + Non-current assets}

Planned Transition of the Business Portfolio Composition

Operating profit

FY2024 result: **¥5.5 billion** (Operating profit margin: 2.5%)
(FY ended March 2025)

Operating profit

FY2029 plan: **¥13.5 billion** (Operating profit margin: 5.0%)

* The percentages on the charts represent the proportion of the business. * The charts exclude corporate expenses.

(Millions of yen)

Quantitative Targets by Segment

Net Sales (Millions of yen)

	FY2024 Results (FY ended March 2025)	FY2029 Targets	Change from the Previous Medium-term Management Plan Results
FA Systems	48,190	65,000	+34.9%
Cooling & Heating and Building Systems	32,429	41,500	+28.0%
Electronics	126,536	140,000	+10.6%
X-Tech	8,687	23,500	+170.5%
Total (after inter-segment adjustments)	215,790	270,000	+25.1%

Operating Profit (Millions of yen)

	FY2024 Results (FY ended March 2025)	FY2029 Targets	Change from the Previous Medium-term Management Plan Results
FA Systems	1,359	4,000	+194.2%
Cooling & Heating and Building Systems	1,823	2,910	+59.5%
Electronics	3,269	5,620	+71.9%
X-Tech	(13)	3,470	—
Total (including corporate expenses)	5,483	13,500	+146.2%

Segment-specific Strategy—FA Systems

Existing business	<ul style="list-style-type: none"> • Maintain the business scale in Japan and other regions based on the solid position as a Mitsubishi FA agent, and enhance earning capacity by redesigning and optimizing our operational framework and by streamlining the supply chain
Innovation strategy Exploit and expand existing businesses Explore new domains	<ul style="list-style-type: none"> • Reinforce partner products and improve system engineering capabilities to accelerate the deployment of high-value-added businesses • Make strategic investments for expanding business domains and user bases domestically and overseas. • Develop advanced technology and innovate on business models through effective use of data analysis to provide new value

Segment-specific Strategy—Cooling & Heating and Building Systems

Existing business	<p>Cooling & Heating: Strengthen sales capabilities with the shift to smart systems, increase the sales of area air conditioners in Japan and overseas, and expand the industrial cooling & heating business.</p> <p>Building Systems: Based on the Mitsubishi Electric elevator business, increase the sales of elevators, conveyors, H-ELV, and others to retain and expand the mainstay core business.</p>
Innovation strategy Exploit and expand existing businesses Explore new domains	<p>Cooling & Heating: Take a multi-faceted approach to acquire end-user customers, diversify our product portfolio to help solve issues in the construction market, and promote the sales of recycled refrigerants.</p> <p>Building Systems: Develop business in the net-zero market beyond the building sector, enabling us to contribute to the realization of a decarbonized society through our energy business.</p>

Segment-specific Strategy—Electronics

Existing business

- Utilize the digital information infrastructure and establish a supply chain that supports an agile operating structure to enhance earning capacity
- Expand the business foundation around in-vehicle mobility products

Innovation strategy

Exploit and expand
existing businesses
Explore new domains

- Develop new products capturing customer needs for exploring new markets (such as amusement and energy-harvesting IoT markets)
- Research markets globally to launch overseas businesses and expand our business domains
- Discover and offer new high-value-added products, such as for power management and energy saving, to contribute to solving customer and social issues

Notes on handling these materials

Forward-looking statements, including planned performances, contained in this presentation are based on information currently available to us and certain assumptions judged to be reasonable. Actual results may differ substantially from these statements due to various factors. The main factors include the following:

- Sudden changes in economic conditions, consumer trends, and product demand and supply in our key markets, such as Japan and Asia
- Significant fluctuations in the exchange rates of the U.S. dollar and other currencies against the yen
- Considerable changes in market prices in the capital market
