The corporate governance of The Chiba Bank, Ltd. (“the Bank”) is described below.

I. Basic Stance on Corporate Governance, Capital Structure, Corporate Profile, and Other Basic Information

1. Basic Stance

The Bank bases all of its corporate activities on “The Chiba Bank Group's Corporate Code of Conduct,” which includes “establishing unwavering trust,” “providing high quality financial services,” “contributing to the regional economy and society,” “thorough compliance with laws, rules and other fundamental principles,” “transparent management,” “respect for human rights,” “Responsibility for realization of a sustainable society,” “opposition to antisocial forces and prevention of money laundering.” Under the Mid-term Plan “Engagement Bank Group – Phase 1 –” (FY2023-FY2025), the group governance is positioned as one of the value creation bases, and we are working to advance the level of corporate governance.

The Bank shall abide by and achieve these principles as it strives to further strengthen and enhance corporate governance, thereby contributing to realizing sustainable regional communities through appropriate cooperation with diverse stakeholders, while achieving sustainable growth and enhancing corporate value over the medium- to long-term.

The Policy on Corporate Governance is posted on the Bank’s website.

[Reasons for Non-compliance with the Principles of the Corporate Governance Code]

The Bank complies with all of the principles of the Corporate Governance Code.

[Disclosure Based on the Principles of the Corporate Governance Code]

[Supplementary Principle 1.1.1] Reasons for Opposition to Company-Proposed Agenda Items and Analysis Results

At the 118th Annual General Meeting of Shareholders held on June 26, 2024, the Bank proposed Agenda Item No. 2: “Election of Nine Directors.” While this agenda item was approved, a significant number of votes were casted against the election of certain directors.

The Bank’s Board of Directors has analyzed the primary factors behind these opposing votes lie in the management responsibility related to the administrative actions (business improvement order) imposed on the Bank and Chibagin Securities on June 23, 2023. It is believed that some shareholders exercised their voting rights against the election of top executives as directors.

In response, the Bank analyzed the root causes of the issue and formulated a business improvement plan that includes measures to prevent recurrence. Based on this plan, the Bank has developed and implemented a wide range of measures, considering the penetration and establishment of the Purpose and Vision to be the common measures to improve all problems.

As for the overall progress of these efforts, the Bank has steadily implemented various measures outlined in the improvement plan, such as revising the organizational structure and evaluation systems as well as planning training sessions and workshops. Both the Bank and Chibagin Securities have now completed all measures included in their respective business improvement plans.

Looking ahead, we remain committed to steadily executing measures aimed at improvement and preventing recurrence. We will also disclose progress in a timely and appropriate manner as we continue striving to regain the trust of our shareholders and stakeholders.

[Principle 1.4] Cross-shareholdings

- Policy on Cross-shareholdings

The Bank's policy is to maintain the shares that are recognized for a meaningful rationale for hold on a limited basis as cross-shareholdings, such as contributing to the development of the regional economy and the enhancement of the bank's corporate value through the maintenance and advancement of favorable relationships with clients as the regional financial institution, while reducing overall cross-shareholdings after having sufficient dialogue with clients, etc. from the perspective of controlling the risk of holding shares and capital efficiency, etc.

The quantitative effect of holding listed shares is verified using RAROA (Risk Adjusted Return on Asset) (note), etc.

The Board of Directors verifies the validity of the rationale for cross-shareholdings every year based on the economic rationale of cross-shareholding for each issuer of the cross-held shares and projections of future share value, taking into consideration the financial structure and the business performance of the issuers. For the current fiscal year, validations were made using March 31, 2025 as the reference date. Even in cases where the rationale for holding the shares is recognized, the shares may be sold in accordance with the Bank's basic policy for reducing outstanding balances. In addition, the Bank does not request the issuer of cross-held shares with which it has reciprocal shareholdings to continue to hold the Bank's shares, and does not prevent them from selling the Bank's shares if they express a desire to do so.

The Bank's policy is to reduce the ratio of cross-shareholdings, the balance sheet amount (market value), to total equity (consolidated net assets) to less than 15% by the end of the next Mid-term Plan period (end of March 2029), while keeping a close eye on market price fluctuations due to share price rises.

(Note) RAROA (Risk Adjusted Return on Asset) is calculated by deducting the deemed allowance for shares and the cost of capital for cross-shareholdings from loan and deposit income, fee income and dividend income of the issuer corporate group. The economic rationale for holding is verified based on the standard value set by the Bank. However, the Bank refrains from disclosing the specific standard values of each judgment factor from the viewpoint of confidentiality in relation to the issuer corporate group, as well as trade secrecy, maintenance of trust, and customer protection as a financial institution.

- Reduction in Cross-shareholdings

In FY 2024, the Bank already sold all of our shares in 9 stocks. As of the end of March 2025, the balance sheet amount (market value) of cross-shareholdings was 199.7 billion yen, accounting for 17.45% of total equity (consolidated net assets). Compared to the previous fiscal year, the number of shares held has decreased while the ratio of cross-shareholdings has slightly increased, mainly due to the new acquisition of shares in The Chiba Kogyo Bank, Ltd. and EDGE Technology Inc.

- Standards for Exercising Voting Rights

When exercising voting rights for cross-held shares, the Bank decides whether to vote for or against proposals in a comprehensive manner, from the perspective of enhancing the corporate value of the Bank and the issuer of those shares, taking into account of the status of governance at the issuer. For important proposals shown below, which may have a significant impact on the medium- to long-term enhancement of corporate value of the issuer of cross-held shares and the economic interests of the Bank, the Bank engages in dialogue, etc. with the issuer as required to decide whether to vote for or against those proposals.

- Proposal for appropriation of surplus (when appropriation significantly lacks balance with financial soundness and retained earnings)
- Proposal for revising Directors' remuneration
- Proposals for the election of Directors and Audit & Supervisory Board Members, and proposals for the payment of retirement benefits (on occasions where scandals occur at the issuer or the issuer has posted an operating loss for certain consecutive periods, etc.)
- Proposals for organizational restructuring
- Proposals for takeover response policy, etc.

[Principle 1.7] Related Party Transactions

The Bank has set forth the following procedures to prevent transactions between the Bank and Directors, etc. of the Bank from harming shareholders' interests.

In accordance with the Bank's Board of Directors Regulations, the Bank requires Directors to obtain prior approval of the Board of Directors for competitive transactions by Directors and important transactions between the Bank and Directors.

After the completion of such transactions, the Board of Directors receives reports of the results of the transaction and monitors the status thereof.

[Supplementary Principle 2.4.1] Ensuring Diversity in the Promotion of Core Human Resources

- Approach to Ensuring Diversity

Diversity in human resources is also essential within the Group in order to respond to the diverse thoughts of each customer and contribute to their realization. We are working to enhance job satisfaction by creating an organization in which diverse human resources can play an active role through the promotion of diversity, by developing human resources for employees to have specialized fields, and by recruiting externally, etc.

In addition, we are expanding support systems and promote awareness and behavior change aimed at utilizing a wide variety of human resources, including women, people from different countries, and mid-career recruits, through the establishment of new forms of employment that are not perceived by existing work schemes and remuneration, as well as the review of the personnel evaluation system. This will lead to measures that contribute to the sustainable growth of the Bank.

- Targets and Status of Promotion of Women to Management Positions

The Bank have set numerical targets for the promotion of women and made up the plan in promoting and developing motivated and capable women. Through various training programs aimed at supporting career advancement, mentor systems, networking support, and follow-up through individual interviews, we are working to foster women's motivation to expand their job fields and develop their abilities. In addition, we are promoting awareness and action reforms through various training and incorporation into evaluation items in order to eliminate unconscious bias and other the perception of gender division of roles among managers, including general managers.

[Status of promotion of women in the Bank] As of July 1, 2025

- Three of the nine Directors are women. (First internal female Director appointed in June 2021)
- There are one female Executive Officers concurrently serving as General Manager, two female General Managers, and 133 female employees in positions such as branch General Manager and Senior Deputy General Manager.
- Number of women in leadership positions or higher is 647 (ratio of women: 30.8%).

Since July 2, 2021, we have formulated a new action plan for the promotion of women, and we will continue to promote women.

Percentage of women in leadership positions or higher: Current 30.8% (as of July 1, 2025), Target: 30% or higher, Date of achievement: July 1, 2026

* "Leadership positions" refer to employees who share organizational responsibilities in their roles as managers of their assigned operations. These employees are in positions supervising subordinates or hold an equivalent post.

- The difference in the wages of men and women full-time employees is that when the average annual wage of men full-time employees is set at 100%, the average wage of women employees is 69.5%. In the Bank Group, there is no difference in wages or other treatment between men and women for the same role. However, there is a wage gap between men and women resulting from the high ratio of men for employees ranked above the leadership positions. In order to eliminate these differences, we have set numerical targets for the ratio of women in leadership positions and above, and are working to promote the active participation and promotion of women.

- Targets and Status of Promotion of foreign nationality staffs to managerial posts

The Bank employs foreign human resources, primarily at four overseas branches and two representative offices. Currently, 44 employees (4 domestic and 40 overseas), of whom 15 are in management positions (15 overseas) (as of July 1, 2025). In 2004, we appointed foreign nationality manager to the position of London Branch General Manager. In addition to promoting the active participation of foreign nationality staffs for some time, we have dispatched foreign nationality staff to Japan and hired new graduates with the aim of creating a corporate culture that creates new ideas by accepting diverse human resources. The ratio of managers in foreign nationality at overseas locations is 45.5% (as of July 1, 2025). We will work to ensure diversity in FY2025 and beyond with the aim of maintaining or improving the current level.

- Targets and Status of Promotion of mid-career recruits to managerial positions

Against the backdrop of the rapidly changing era, including advances in digital technology, it is extremely important to secure highly specialized human resources in order to aim to become a new financial company group that transcends the framework of existing banks. Each year, we formulate a mid-career recruitment plan

and recruit mainly IT and digital divisions and other specialist human resources. Currently, there are 352 mid-career employees, of whom 104 are managers, and the current ratio of managers in mid-career recruits among all employees is 8.0% (as of July 1, 2025). In FY 2025 and beyond, we will work to ensure diversity with the aim of maintaining or improving the current level.

- Human Resource Development and Internal Environmental Improvement for Securing Diversity, Policy, and Implementation Status

The Bank Group's most important management capital is “human resources,” and we believe that the growth of “human resources” is essential for the Group's sustainable growth. Our aim is to create a virtuous cycle in which the growth of human resources enables us to provide social value to our customers, which in turn leads to the sustainable growth of regional communities and the Bank Group, and the profits generated from this will once again become an investment in human resource development.

In addition, we are conducting specific activities to resolve social and environmental issues in order to realize sustainable regional growth for the materiality of the five fields identified in the Chibagin Group Declaration on SDGs established in May 2019. One of these materiality issues is “Promote diversity and work style reforms.” We are working to utilize diverse human resources and realize work style reforms.

Please refer to “III. Implementation of Measures for Shareholders and Other Stakeholders,” “3. Measures to Ensure Due Respect for Stakeholders” described below regarding details of human resources development policy and internal environmental policy.

[Principle 2.6] Roles as Asset Owner of Corporate Pension Fund

The Bank has established a corporate pension fund (the “fund”) to conduct management, payment, and other related administration of pension assets related to the defined benefit pension plan.

The Bank allocates personnel with professional experience of asset management to the Fund Secretariat so that the fund can perform functions expected of an asset owner, such as deciding on concrete management methods and proactively considering risk control, etc.

Important matters such as modifications of terms, the budget for each fiscal year, business reports, financial reports, and management of the pension fund are decided by resolutions of the fund's Board of Representatives consisting of members selected by the employer (the Bank) and those chosen by the beneficiaries, each accounting for half of the Board, to appropriately control conflicts of interest between the beneficiaries of the corporate pension fund and the company. In addition, the Bank has established a system to ensure appropriate management of the pension finances by taking measures including deliberating the allocation of portfolio assets, strategies for newly added funds, and other matters at the Asset Management Committee, which consists of persons with expertise in human resources, finance, risk management, market operations, etc. The fund has announced that it accepts the Japanese Stewardship Code, and requires that investment trustees strive to increase the corporate value of investee companies and increase medium-to long-term investment returns in accordance with the Code.

- Overview of the implementation status of the systems for ensuring proper operations

An overview of the implementation status of the systems for ensuring proper operations at the Bank in FY2024 is as follows.

1. Execution of duties by Directors

In order to realize sustainable growth and improvement of medium to long term corporate value, Chiba Bank Group established and published the Policy on Corporate Governance. The Group has introduced the Group Chief Officer (CxO), and has established an integrated group management system by assigning a Group Chief Officer as the person in charge of the area under his/her jurisdiction under the overall supervision of the Group CEO. We held a Regular Meeting of the Board of Directors 12 times and an Extraordinary Meeting of the Board of Directors 11 times, whereby reports were made on important business execution such as performance plans and human resource strategies, and the progress of the Mid-term plan. Through these efforts, we properly supervise the execution of duties by Directors. In the operation of the Board of Directors, we devote sufficient time to the discussion of important agenda items and invigorate the debate, taking into account the evaluation of the effectiveness of the Board of Directors and we held free discussions and the Board of Directors' lodgin on important medium-to long-term themes outside of the Board of Directors' agenda. In addition, the Board of Designated Directors, consisting of Directors and Executive Officers appointed by the Board of Directors, met 48 times in total to discuss a wide range of matters concerning the execution of duties by Directors. In order to further improve the transparency and objectivity of governance, we increased the ratio of Outside Directors by adding one more Outside Director in FY2024, and changed the chairman of the Board of Directors to the Outside Director.

2. Compliance structure

The compliance program was established by the Board of Directors for each year and the Compliance Committee met 12 times to deliberate as needed on matters such as the status of the execution of the program, measures to prevent recurrence of compliance violations based on root cause analysis, and efforts for further enhancement of countermeasures against money laundering, terrorist financing, proliferation financing, and other violations of economic sanctions. Important matters related thereto were reported to the Board of Directors. In addition, based on "Chibagin Group Compliance Hotline Rules," the whistleblower protection rules are being appropriately applied by, for example, improving the system of the whistleblower reporting hotlines established inside and outside the Group and continuously informing about the prohibition of disadvantageous treatment. Also, as for respond to the Business Improvement Order, we consider that firmly penetrating and establishing the Purpose and Vision in the organization is common to all problems, and conduct an "Engagement Survey" and a "Compliance Questionnaire" twice a year to verify the degree of penetration and establishment among employees, to discover issues, and to consider measures for improvement. In addition, we conduct cross-organizational verification of the degree of penetration and establishment in audits, and interviews at sales branches and headquarters concerning the review of the performance award system. Furthermore, we continue semi-annual reports to the Board of Designated Directors and the Board of Directors on the activities of the Audit & Inspection Division to strengthen our compliance audits.

3. Risk management system

Based on the current risk recognition, the Bank Group annually reviews the "Risk Map" and other information to select top risks. 12 top risks were selected for FY2024, and for each top risk, each Group CxO as risk owner and the top risks were properly managed by setting alarm points and creating action plans. In addition, the ALM Committee, the Risk Management Committee and other committees discussed policies for each risk. Furthermore, in anticipation of the active use of AI technology, the Board of Directors has resolved to establish the "Chiba Bank AI Policy" and the "AI Risk Management Regulations," which are the basic policies to be taken, and is promoting the establishment of an AI risk management system. Audit and Inspection Division, which is independent from the audited divisions, conducts internal audits of the headquarters, branches, subsidiaries, etc., and reports the results of internal audits, matters pointed out, etc., to the "Internal Audit Committee" and the Board of Directors on a monthly basis. The General Manager of the Audit and Inspection Division participates as an observer in Board of Designated Directors

and other important committees, and conducts effective audits to collect information on risk management and reflect it in audit plans. The state of cyber-attack occurrence and strengthening of countermeasures thereto, and management systems for cyber-attacks, etc., were regularly reported to the Board of Directors, and the “Cyber Security Management Office” was newly established within the EDP System Division to build a framework for more advanced cyber risk management and various security measures. We conducted drills to set up an emergency headquarters in anticipation of the occurrence of critical situations and to handle important businesses and communications drills for the initial response in the event of a complete ATM failure on a holiday and storm and flood damage drills in anticipation of a major typhoon.

4. Ensuring the proper operations at the Chiba Bank Group

The Group Chief Officers are assigned responsibility for their areas of supervision, thereby creating a group-wide corporate management system. In addition, we assign responsible Directors to supervise each group company, dispatch Audit & Supervisory Board Members, conduct audits by the Audit and Inspection Division of the Bank, discuss and report important business operations to the Bank based on the “prior consultation and reporting system” of the Group companies, thereby ensuring proper operations at the Chiba Bank Group, based on the “Group Companies Management Regulations.” In addition, the Bank's Audit and Inspection Division has initiated audits that focus on examining the specific operations of each company, and has established a system for further in-depth examinations of risks specific to each company in cooperation with the Audit & Supervisory Board Members of each company.

The “Group Supervision Committee” is held twice for the purpose of grasping the business conditions and various issues of each group company, and the “Group Promotion Committee,” in order to realize synergistic effects through further cooperation among the Bank and group companies, was held twice. In addition, the Group Strategy Division oversees the business divisions that plan, promote, and support matters related to Group companies under its jurisdiction, as well as the group management divisions, which manages risk, allocation of management resources, and other matters across the group under its jurisdiction, to promote integrated group management and advanced group governance. To strengthen group governance based on business improvement orders, we have enhanced integrated management by reporting on the operational status and issue recognition by the CxOs to the Board of Directors, exchanged opinions between the Bank's Executive Officers and staff of the Group companies and conducted interviews with officers and employees of Group companies by Standing Audit & Supervisory Board Members of the Bank. Additionally, the audit results from Chibagin Securities' Audit and Inspection Division, which also received business improvement orders, have been reported to the Bank's Board of Directors. Some members of the Bank's Audit and Inspection Division have also been assigned to work concurrently in the Chibagin Securities' Audit and Inspection Division to directly contribute to the establishment of a system continuously.

5. Ensuring the effective audit by Audit & Supervisory Board Members

The Bank has adopted an Audit & Supervisory Board system. Audit & Supervisory Board Members conducted objective and reasonable audits through means such as attendance at meetings of the Board of Directors and other important meetings, checks on important documents, onsite audits at headquarters and branches, holding of interviews with Directors and General Managers, and increasing the frequency of interviews with group company officers and employees and group-wide Audit & Supervisory Board Members Meetings. In addition, Audit & Supervisory Board Members regularly exchange opinions with Representative Directors and Outside Directors, and the system has established for receiving direct monthly reports from Audit and Inspection Division on the results of audits, etc. through the Internal Audit Committee. The Audit & Supervisory Board Members hold three-way audit liaison meetings, etc. Through close cooperation, the Audit & Supervisory Board Members strive to improve the effectiveness of their auditing functions. In order to facilitate the smooth operation of audits and other operations by Audit & Supervisory Board Members, the Bank has established the Audit and Supervisory Support Office, which is independent from the business executives, and the General Manager of the Audit & Supervisory Board Member's Office is responsible for these roles and for prompt reporting to, communication with, and close cooperation with the Audit & Supervisory Board Members.
