The corporate governance of MATSUI SECURITIES Co., Ltd. (the “Company”) is described below.

## I. Basic Views on Corporate Governance, Capital Structure, Corporate Attributes, and Other Key Information

### 1. Basic Views

MATSUI SECURITIES Co., Ltd. (hereinafter referred to as “the Company”) believes that enhancing corporate governance is necessary to achieve sustainable growth and medium- to long-term improvement in corporate value. To do so, the Company establishes a basic policy: improving and operating a highly efficient management system that responds quickly, flexibly and appropriately to changes in the business environment; maintaining sound management and transparency of business and financial condition; and maintaining relationships of trust with stakeholders, including shareholders.

Our corporate philosophy (MISSION) is “Supporting the prosperous lives of customers,” and our corporate goal (VISION) is “Delivering valuable financial products and services to retail investors.” In realizing our MISSION and VISION, we believe that providing superior customer experience value is of utmost importance.

By maintaining a strong financial base and providing a stable trading system and customer-oriented support system, we believe that responding to our customers' trust as a financial institution and maintaining and developing solid corporate activities will lead to “a sense of security in investing itself and in choosing a brokerage firm”, which we have defined as our first value to offer. In addition, we have defined “providing diverse ideas” regarding investment as our second value, in order to make investing itself fun, more accessible and attractive, and to make it an intellectually stimulating experience that leads to discovery and growth in the lives of our customers. These ideas are expressed in our corporate slogan, “As a reliable securities broker, we make investment fun and interesting”.

To embody our corporate slogan, we aim to provide “a stable trading environment” that earns the trust of our customers, “a wide variety of products that meet various customer needs” which lower the hurdles to starting investments and deliver opportunities for discovery and growth to more customers, “products and services with low trial barriers,” “simple and easy-to-understand services,” and aiming to take online securities one step further, “personalized services” that provide detailed responses in line with each customer's needs.

### Reasons for Non-compliance with the Principles of the Corporate Governance Code

[Supplementary Principle 4.1.2 Formulation of a mid-term business plan]

The volatile nature of the financial markets greatly affects securities, the Company's main business. If the Company were to operate its business in line with a Medium-Term Management Plan, waves of change might arrive before it executes its strategies and measures. This would risk neglecting initiatives that could respond promptly to changes in financial markets and customer

needs. Recognizing this, the Company does not formulate a med-term management plan. However, investing in businesses for future growth is essential, so the Company has formulated a fiscal year management plan based on the market conditions and competitive environment. The management plan consists of four axes, “business plan”, “sales plan”, “IT plan”, and “organization plan”, based on the main management issues. The Company explains important issues on the management plan, those initiatives and progress at the financial results briefing meetings and the General Meeting of Shareholders.

The Company conducts constructive discussions on the direction of the Company and the management strategies, and the detailed management plans at Board of Directors’ meetings and determines the contents. Specifically, based on the market environment, trends in the securities brokerage industry, competitive landscape and customer needs, etc., the Board of Directors examines short-term and medium- to long-term efforts such as measures related to business expansion, including introduction of new products, new services, and new trading platforms, etc., and investment in IT systems for securing the stability of the trading platform, the lifeline of an online securities broker. The Board of Directors reviews the progress and priority thereof.

## Disclosure of Policy on Determining Remuneration Amounts and Calculation Methods

---

The Company's policy for determining the contents of Directors' compensation etc. for each individual Director (excluding Directors who are the Audit and Supervisory Committee members) is stipulated based on a resolution of the Board of Directors, and such contents are described below.

### 1. Basic Policy

With respect to the amounts of Officers' compensation (excluding Directors who are of the Audit and Supervisory Committee members), etc. and the policy regarding determination of the calculation method of Officers' compensations (excluding Directors who are of the Audit and Supervisory Committee members), the basic policy is that compensation for inside Directors (consisting of the basic compensation and stock-compensation type stock options) is determined based on each director's role and performance, and compensation for Outside Director (excluding Directors who are of the Audit and Supervisory Committee members) is composed of only the basic compensation, and no stock-compensation type stock options are issued from the standpoint of ensuring independence.

### 2. Policy regarding determination of the basic compensation (monetary compensation) amounts etc. for each individual Director

The basic compensations of the Company's Directors (excluding Directors who are the Audit and Supervisory Committee members) are payable monthly in fixed remuneration amounts, and are determined taking into account the roles and performance of each individual Director. The determination of basic compensation for each Director for each fiscal year is delegated by the Board of Directors under resolution to the Nomination and Remuneration Committee comprised of the President & CEO and all of the Outside Directors (excluding Directors who are the Audit and Supervisory Committee members) of the Company. Such determination is then made by the Nomination and Remuneration Committee within the aggregate amount approved in a resolution of the General Meeting of Shareholders.

### 3. Policy regarding the determination of the method of calculating the contents and amount or number of performance-linked compensation etc. and non-monetary compensation etc.

Officers' compensation (excluding Directors who are the Audit & Supervisory Committee members) of the Company does not include any performance-linked compensation; however, for the purpose of raising motivation and morale towards improving business performance, Executive Directors are granted stock-compensation type stock options. Upon calculating the fair value of such stock options, the stock price as of the time when the stock options are granted is taken into account, and the number of units granted to each individual Director is decided also by taking into account the performance of each Director, the same as for determining basic compensations. With respect to the number of stock-compensation type stock options to be granted, there is no specific prescribed calculation formula which are based on indexes which indicate the financial performance of the Company, and there are also no calculation formulas included in the conditions for rights exercise which are based on indexes which indicate business performance.

### 4. The policy regarding the determination of the ratio of the amounts of basic compensation (monetary compensation) etc., performance-linked compensation etc., or non-monetary compensation etc. against the compensation amounts etc. for each

individual Director.

The Company's basic policy regarding the payment ratio of compensation, etc. to Executive Directors is 70% basic compensation and 30% stock-compensation type stock option. However, given that the performance of the Company's main business is largely affected by the economic environment and market environment, the payment ratio may deviate from such basic policy

5. Matters concerning the method of determination of the contents of compensations etc. for each individual Director (excluding Directors who are the Audit & Supervisory Committee members).

The basic compensation amounts are decided by the Nomination and Remuneration Committee within the scope approved by resolution of the General Meeting of Shareholders.
