The corporate governance of Sompo Holdings, Inc. (the “Company”) is described below.

I. Basic Views on Corporate Governance, Capital Structure, Corporate Profile and Other Basic Information

1. Basic Views

(1) Corporate Philosophy etc.

SOMPO Group (the “Group”) has established the following “SOMPO’s Purpose”. In the Mid-Term Management Plan starting from fiscal 2024, the previous “SOMPO’s Purpose” has been rephrased to make it clearer.

In addition, in order to embody SOMPO’s Purpose, we have established the “SOMPO’s Values” as the values that all the Group executives and employees wish to cherish.

SOMPO’s Purpose

For a future of health, wellbeing and financial protection

The Group will contribute to a sustainable society and pave the way for the future by leveraging the Group’s strengths, beyond insurance, to address various social issues from a medium- to long-term perspective and tackle to resolve them, with a focus on “health, wellbeing and financial protection”. We will continue to support people and businesses in overcoming their challenges, transcending organizational and business hierarchies within the Group, with the keyword “connect with customers and deliver connected services”

SOMPO’s Values

“Integrity”: Doing what’s right for society and the people.

“Self-motivation”: Thinking for oneself and taking on challenges without being constrained by precedents.

“Diversity”: Welcoming diverse opinions and taking in their thoughts and feelings.

In order to embody SOMPO’s Purpose, we will use “SOMPO’s values” as the basis for the decisions and actions of each and every Group executive and employee, and we will work together as a group to achieve this.

(2) Basic Views on Corporate Governance

The Group aims to serve diverse stakeholders and tackle to address various social issues through each business based on SOMPO’s Purpose (For a future of “health, wellbeing & financial protection”) to enhance enterprise value.

The Company, as the holding company of all Group companies, considers continuous improvement of transparency and fairness of the Group's corporate governance and fulfillment of corporate social responsibility through business as essential for maintaining strong relations of trust with stakeholders. The Board of Directors has accordingly established this Policy to clarify basic policies regarding the overall vision for the governance structure and the development of governance framework. We continue to make efforts to enhance corporate governance in pursuit of the best corporate governance. Further information on the Group's Corporate Governance Policy may be viewed on the Company website.

(<https://www.sompo-hd.com/en/company/governance/overview/policies/>)

The Company has changed its governance structure to "Company with committees", effective June 2019, as part of efforts to strengthen corporate governance structure by separating management supervision from business execution in order to reinforce the supervisory function of the Board of Directors and to accelerate business execution by delegating substantial authorities from the Board of Directors to executive functions. The Company also established three committees; Nomination Committee, Audit Committee, and Compensation Committee and established a governance structure that works to improve transparency and fairness.

The Board of Directors sets the basic policies for Group management and for internal control which forms the foundation of Group management, appoints Executive Officers and Executive Vice Presidents, and supervises the performance of duties by Directors and Executive Officers. The Board of Directors also delegates executive decisions to Executive Officers in principle, as far as the laws permit, to further strengthen the supervisory function of the Board of Directors and accelerate business execution.

In addition, by appropriately executing the duties of the Nominating Committee, Audit Committee, and Compensation Committee, which have the Chairman and a majority of its members as Outside Directors, the Company ensures transparency in the appointment of Directors, Executive Officers, and Executive Vice Presidents, the audit of their duties, and the compensation of Directors, Executive Officers and Vice Presidents to develop and maintain the structure for enhanced functioning of corporate governance.

On the structure for business execution, Executive Officers make executive decisions and perform duties on the matters delegated from the Board of Directors under the overall supervision of the Group CEO, while the Business CEO System by which the Business CEO is appointed and the Executive Vice President in charge of the business segment pursues sustainable enhancement of enterprise value and maximization of synergies within the Group under the oversight of the Business CEO, and Group CxO System by which the Group Chief Officer ("Group CxO") utilizes high level of expertise in respective functional area across businesses and pursues Group best, are in place to ensure agile and flexible decision-making and business execution, with clearly defined authorities and responsibilities.

Also, the Company established the Group Executive Committee ("Group ExCo") which is an advisory body to the Group CEO to discuss important matters that significantly impact management, such as Group management strategy and business executive policy.

(3) View on the Corporate Governance Code

We understand that the Corporate Governance Code (the "Code") is established in order to contribute to company's sustainable corporate growth and the increase of corporate value in the medium term by improving the system for transparent, fair, prompt, and decisive decision-making based on the perspective of all stakeholders, including the company's shareholders, customers, employees and local communities.

In the spirit of the Code, the Group constantly seeks to improve its corporate governance to promote the Group's ongoing growth and the enhancement of corporate value in the medium term.

[Reasons for Non-compliance with the Principles of the Corporate Governance Code]

The Group complies with all principles of the Code revised in June 2021.

[Disclosure Based on the Principles of the Corporate Governance Code]

Supplementary Principle 1-1-1 Reasons for and analysis of opposition to the company's proposals

At the 15th Ordinary General Meeting of Shareholders held on June 23, 2025, the Company submitted Proposal No. 2, "Election of 13 Directors". Although this proposal was approved, a certain number of dissenting votes were cast regarding the election of one Director. The Company analyzed the main reasons for this as follows.

- Due to a series of misconduct cases within the Group, some shareholders exercised their voting rights against the appointment of the top management Director.

- Due to the ratio of policy-held shares to net assets as of the end of March 2025, some shareholders exercised their voting rights against the appointment of the top management Director.

Based on the above analysis, the Company will steadily implement its Business Improvement Plan and continue to work on further evolution and improvement of the governance structure across the entire Group. Furthermore, we will accelerate the pace of reducing our treasury stock holdings to achieve a zero balance by the end of FY2030. The strengthened capital resulting from this will be directed toward growth investments and shareholder returns.

Through these initiatives, we will strive to continuously enhance corporate value while actively disclosing information to foster communication with our stakeholders.

Principle 1.3 Basic Policy of Capital Policy

- Our capital policy is based on the Enterprise Risk Management (ERM) framework. Its basic policy is to maintain robust financial health by appropriately controlling the balance of capital, risk, and return, with the goal of achieving adjusted consolidated ROE levels and adjusted EPS growth rates that are comparable to our global peers, as well as ensuring attractive shareholder returns (dividends paid + share buybacks) commensurate with both profit and shareholder equity levels.

- To sustainably boost the Group's capital efficiency, we will promote circulation of capital by actively allocating capital to highly capital efficient areas and withdrawing from low efficiency areas in a timely and appropriate manner. In addition to increasing remittance from mature businesses, we will use the capital and cash flow generated through the downsizing of business segments with low capital efficiency and the reduction of equity holdings for business relationships ("Strategic Equity Holdings") to invest in growth, including M&A, and in areas with high capital efficiency, based on the risk-taking direction clarified in the "SOMPO Group Risk Appetite Statement".

By reviewing and advancing these initiatives one by one, we aim to achieve an adjusted consolidated ROE of 13-15% and an adjusted EPS growth rate of over 12% in FY2026, the final year of the Mid-Term Management Plan.

The target for adjusted consolidated ROE was set based on our cost of capital of 7% and the average level of our global peers, as estimated by CAPM (Capital Asset Pricing Model).

- To maintain robust financial health, we manage capital based on the Economic Solvency Ratio (ESR), which compares capital and risk based on economic value. In capital management, we set a target capital level (ESR: 200% to 250%) and risk tolerance as a guide to appropriate capital levels from the perspective of financial soundness and capital efficiency, and implement appropriate capital policies according to the ESR target levels. In calculating ESR, we take into account recent regulatory trends and disclosures by domestic and overseas insurance companies. Additionally, in order to enhance global comparability, we have adopted capital management methods that comply with international capital regulations and are working to maintain financial soundness.

- We aim to provide attractive shareholder returns while taking into consideration our financial soundness and the business environment, with the basic policy of continuously increasing dividends through sustainable profit growth as well as maintaining the option of flexibly executing share buybacks depending on share price and capital availability.

Under the Mid-Term Management Plan, we set a basic shareholder return rate equivalent to 50% (average of the most recent three years) of adjusted consolidated profit and will increase the total amount of returns (dividends paid + share buybacks) through profit growth. We will in principle return an additional 50% of gains/losses on the sale of Strategic Equity Holdings, and will also consider capital level adjustments in light of risk and capital conditions, performance trends, and financial market conditions. In addition, our basic policy is to increase dividends in line with mid-term profit growth, and to raise the ratio of dividends to total payout.

Principle 1.4 Strategic Equity Holdings

Policy on Strategic Equity Holdings

-The Group holds Strategic Equity Holdings (equity holdings other than for net investment purposes) primarily for the following purposes.

- a) To maintain insurance transactions and insurance sales channels held by our subsidiary, Sompo Japan
- b) For the purpose of strategic capital and business alliances.

-Of these, we have established a plan to reduce the balance of shares held that could potentially hinder fair competition in insurance transactions to zero by the end of FY2030. To achieve this, Sampo Japan has set a target of reducing the balance by more than 600 billion yen during the Mid-term Management Plan period from FY2024 to FY2026. In the first year of the Mid-term Management Plan, FY2024, we achieved a reduction of 429.3 billion yen, significantly exceeding the initial target of 200 billion yen. Taking into account the accelerated reduction, we have raised the reduction target for the Mid-term Management Plan period to over 800 billion yen as of May 2025.

-Part of the capital buffer created by the reduction of Strategic Equity Holdings will be allocated to growth investments such as M & As, to maintain and improve financial soundness and capital efficiency.

Confirmation and Examination by the Board of Directors

The Company carries out the following confirmation and examination by the Board of Directors.

-The Board of Directors confirms the impact on the Group's corporate value by comparing the Company's cost of capital with indicators that quantitatively evaluate the return and risk of stocks, in addition to the progress of the reduction plan, for listed stocks that may hinder fair competition in insurance transactions during the period until the balance of stockholdings is reduced to zero.

-With regard to listed shares held by the Company and its domestic subsidiaries for the purpose of strategic capital and business alliances, the Board of Directors examines the appropriateness of holding such shares, taking into consideration not only the long-term profitability of the shares but also the contribution to the Group strategy, including the status of cooperation (business alliances) with investees assumed at the time of investment, and the state of achievements in business alliances.

Exercising voting rights for cross-shareholdings

-The Company's subsidiary Sampo Japan maintains a Policy for Conformance to the Japanese version of the Stewardship Code. The Policy for the Exercise of Voting Rights is as follows.

< Sampo Japan: Policy for Conformance to the Japanese version of the Stewardship Code (abridged) >

1. Basic Policy on Exercise of Voting Rights

Sampo Japan exercises its voting rights following a basic policy of supporting the sustainable growth of the invested company and as deemed appropriate in consideration of the invested company's activities to address environmental issues, corporate governance status, compliance structure, and other areas.

2. Policy on Discussions

The discussion of items considered as requiring careful examination from various perspectives, such as the significance related to raising corporate value, includes a thorough examination of the purpose and objectives. Final decisions for such discussion items are determined based on the dialogue with the invested company and other information. Items given special attention include the following.

(1) Potential material negative impact on shareholder value (transfer of important assets, share transfers due to reasons such as merger or conversion to wholly-owned subsidiary, capital increase from a third-party allocation with an advantageous placement, introduction of anti-takeover measures, etc.)

(2) Financial performance (provision of retirement benefits to officers of companies with a capital deficiency or poor business performance, posting net losses for consecutive periods, ROE and shareholder return, etc.)

(3) Development and operation status of ESG (status of appointment of outside directors, tenure of outside officers and their attendance at meetings of the Board of Directors and the Audit & Supervisory Board, sustainability-related issues such as reduction of GHG emissions, etc.)

3. Disclosure of voting records

The Company considers it important to contribute to the enhancement of corporate value, damage prevention, and sustainable growth of invested companies through such activities as constructive dialogues and provision of risk management with investee companies in order to fulfill its stewardship responsibilities.

Positioning the exercise of voting rights as part of these activities, the Company discloses aggregate voting records, examples of dialogues held with investee companies, and cases of exercising the right of dissent for a more accurate understanding of its activities.

Upon comprehensive consideration of the impact on the overall activity mentioned above of the Company to fulfill its stewardship responsibilities, the Company does not disclose voting records on an individual agenda item basis.

In addition, if a company from which we hold policy-held shares offers to sell its shares in our company, we will not take any action to prevent the sale.

Principle 1.7 Related Party Transactions

When the Company engages in transactions or other dealings defined as a related party transaction, the Company conducts proper oversight, which shall include consulting with experts as considered necessary and presenting the transaction for approval and/or reporting the transaction at the Board of Directors Meeting attended by outside directors in compliance with all laws, regulations, and Company internal rules. The execution of such a transaction shall be properly disclosed as a material fact base as stipulated by law.

Supplementary Principle 2.4.1 Ensuring diversity in appointing core human resources

< Policy on ensuring diversity >

The Group has positioned "Diversity, Equity and Inclusion (DEI)" as the key management strategies essential to the growth of the Group, and is promoting it.

The purpose of promoting DEI is to foster a corporate culture that "respects" and "dialogues" with respect for autonomous individual differences from the perspective of employees, the perspective of the company, and the perspective of society, to raise employee pride and motivation to work, and to support growth (employee perspective); to connect diverse individual activities and improved decision-making quality to value creation and resilience (company perspective); and to create a workplace and society in which all people, including minorities, can play an active role safely (social perspective).

To fulfill SOMPO's Purpose of serving as "For a future of health, wellbeing & financial protection", we will implement true DEI, in which each employee at each workplace is not affected by gender, disability status, nationality, age, etc., in which each employee's values are respected and each employee's talents and strengths are utilized in dialogue to create new values in anticipation of change.

< Measures to ensure diversity >

The Diversity Equity and Inclusion Promotion Headquarters has been established to promote DEI throughout the Group. With this as the driving force, we will reflect the perspectives of diverse human resources in the various services offered by the Group. We will also create an environment in which all employees can exercise their individuality and strengths and work with a sense of contribution to the team, in order to achieve the objectives of "employee perspective," "company perspective," and "society perspective" described above.

In addition, the Group is working to take advantage of the diversity of each employee by focusing on the diverse values of each employee and the "My Purpose" that drives them.

□ Closing the Gender Gap

With regard to closing the gender gap, the entire Group and each company holds various events such as training programs and seminars designed to steadily foster awareness among employees, thereby creating a climate and environment that supports men and women can both advance their careers. Aiming to improve diversity in management decision-making, the Group has set numerical targets for the ratio of female executives, the ratio of female general managers, and the ratio of female managers to 30% or more by 2030. In addition, the Group has formulated a succession plan for the group's key posts (93 in total), including executives including Group CEOs, and has set a target for the ratio of female candidates to 50%. As of April 1, 2025, there were 8 female executives in the Company (3 outside directors, 5 executive Vice Presidents), 7 in Sompo Japan (1 outside director, 6 executive Vice Presidents), and the ratio of female executives to management positions in the entire Group was 26.6% *.

(*) At Sompo Japan, we have achieved our goal of 30% of the female ratio of above the level of team leaders who have been assigned to evaluation work, which we have defined as managers, through our continuous efforts to promote the advancement of women. Currently, we are defining managers as those at or above the leadership level, which is a higher decision-making level, and accelerate our efforts by targeting the female ratio.

□ Appointment of Foreign Nationals and External Personnel

The Group has formed a diverse workforce, including foreign nationals, through the development of its overseas insurance business. In addition, we are working to further promote DEI and globalize our business by launching programs to actively recruit personnel from overseas group companies, mainly in Sompo Japan. In April 2020, the Company introduced a job-based personnel system for external personnel. This system creates positions based on the content of duties (jobs), and hires and assigns personnel with the necessary experience and skills. By expanding the number of job-based personnel through external career recruitment, etc., this system contributes to building a human resource group with diverse experience and skills.

In addition, we actively promote highly specialized personnel to key positions such as directors, general managers, and specialists. We are working to ensure diversity by promoting strategic personnel assignments that are not restricted to gender or nationality.

As of April 1, 2025, the percentage of foreign nationals among the Company's Executive Officers and Executive Vice Presidents is 21.4%. As of March 31, 2025, the ratio of foreign nationals employed in the Company is 9.5%, while that of external personnel is 31.5%. In the future, we will further diversify our personnel system by expanding our job-based personnel system and promoting strategic staffing.

□ Promoting advancement of people with disabilities

The Group is working to provide a stable place for people with disabilities with the aim of creating new value as a component of DEI, while providing a stable place for people with disabilities to demonstrate their abilities and achieve self-fulfillment in their professional lives. The Group hires people with disabilities all over the country, and is making efforts to create workplaces where they can play an active role and secure employment. Sompo Japan Insurance Inc. has placed vocational life consultants for people with disabilities throughout Japan, and has established a system to provide support for creating comfortable workplaces. SOMPO Challenged Inc., a special-purpose subsidiary established in April 2018, also plays a role in driving the employment and activities of people with disabilities in the Group. The employment rate of people with disabilities is 2.61% as of April 1, 2025.

In FY2023, we held “Universal Manner Certification” training for group executives. We believe that systematically learning and mastering the practice of universal manners (mindset and actions toward diverse people, including those with disabilities) will not only enable us to provide customers with “reasonable consideration” and valuable products and services based on correct understanding, but will also lead to greater understanding and respect for people with disabilities among our employees. We believe that this will lead to a better understanding of and respect for people with disabilities.

Principle 2.6 Demonstration of Functions as a Corporate Pension Asset Owner

The Company's key subsidiaries in Japan, including Sompo Japan and Sompo Himawari Life Insurance, Inc., employ defined-contribution pension plans to reduce future risks in corporate accounting and to support free asset building in accordance with economic rationality and individual employees' life plans. Based on its high degree of specialized expertise, the Company's subsidiary Sompo Japan DC Securities Inc. is designated as the asset-management agency. It provides employees of individual companies that have adopted these plans with thorough member training using e-learning and encourages use of the matching-contribution program, among other efforts to promote the pension plans.

Principle 3.1 Full Disclosure

The Company has established the SOMPO's Purpose and publicly communicates its management strategy and Mid-Term Management Plan to deliver value to society and to realize society aimed at in the medium to long term.

(i) The Company's Management Strategy and the Mid-Term Management Plan

In the Mid-Term Management Plan (FY 2024 to FY 2026), which begins in FY 2024, we will pursue “resilience” and “connect with customers and deliver connected services” as basic strategies in order to respond to future changes in the environment and take advantage of the strengths of SOMPO. We will redefine our business areas into 3 categories and implement growth strategies for each business based on the Group's issues, while quickly realizing our vision.

In particular, over the following three years, the Domestic P&C Insurance Business will make efforts to restore trust of stakeholders and improve resilience, while the Overseas Insurance Business will support the Group's size and growth, and the Wellbeing Business will become a driver of medium- to long-term growth. We aim to achieve our management targets, such as a Group adjusted consolidated ROE of 13~15% and an adjusted EPS growth rate of over 12%.

The Group's common strategies to support these growth strategies include the Human Resources Strategy (including corporate culture transformation), the Financial Strategy (including capital recycling management), the Data and Digital Strategy, and governance, and will steadily evolve them.

In order to restore trust in the Group, all officers and employees will reaffirm that they are committed to providing value to their stakeholders, including customers, society, employees, and shareholders, and strong governance will support them.

The details of the Company's management strategy and Mid-term Management Plan are presented on the Company website.

(<https://www.sompo-hd.com/en/ir/strategy/>)

(ii) The basic philosophy on corporate governance is based on the principles of the Corporate Governance Code, which are presented in the section "1. Basic Views, (2) and (3)" of this report.

(iii) As the decision-making policy and process for setting director compensation amounts, the Company makes the policies on decisions pertaining to compensation for officers and describes in section "7. Policies on Decisions pertaining to Compensation for Officers" of the Corporate Governance Policy on the Company website.

(<https://www.sompo-hd.com/en/company/governance/overview/policies/>)

(iv,v) The reasons for selecting a candidate for director and policies for appointment of officers are presented in the reference materials provided with the Notice of Convocation of the General Meeting of Shareholders for discussions and election at the Meeting. Decisions on selection and dismissal of executive officers are made by the Board of Directors following review by the Nomination Committee based on the content of the director selection policies and other considerations.

(<https://www.sompo-hd.com/en/ir/stock/meeting/>)

Supplementary Principle 3.1.3 Sustainability initiatives and investment in human capital and intellectual property

At the group, "For a future of health, wellbeing and financial protection" is at the core of our management as the "SOMPO's Purpose". Each of the Group's businesses will formulate a strategy to realize the SOMPO's Purpose and steadily implement it, with the aim of realizing the SOMPO's Purpose. In addition, it is essential to improve human capital and intellectual property in implementing the strategy. Under the supervision of the Board of Directors, the Group will allocate optimal management resources, thereby enhancing the certainty of the strategy.

Furthermore, the "Description of Purpose" section explains a future the Group wishes to create, what social issues it is addressing, and how it is trying to provide value to society for the future.

Description of Purpose

For a future of health, wellbeing and financial protection

Sompo prioritizes health, wellbeing and financial protection to create opportunities for everyone we serve, from individuals to enterprises.

In a rapidly changing world and shifting demographics that demand resilience and adaptability, we are steadfast in our commitment to build on insight and meticulously craft solutions for the future.

We leverage our deep collective expertise to connect across boundaries and beyond geographies, to deliver a collaborative and connected partnership that meets the unique aspirations and risk management needs of those we serve.

For a future of health, wellbeing and financial protection.

We are SOMPO Group.

In addition, in order for the Group to contribute to the realization of a resilient and sustainable society, the Group has established the Group Sustainability Vision and established the Group Sustainable Management Promotion Council to discuss policies for the Group's efforts to enhance its corporate value by contributing to the realization of a sustainable society, thereby enhancing the effectiveness of its efforts.

Details can be found on the Company website.

(Data and digital initiatives are listed here.)

In response to climate change, which has become increasingly critical as a global social issue in recent years, the Group has set "adopt to climate change," "mitigate climate change," and "contribute to societal transformation" as its "SOMPO Climate Action" and has established KPIs such as greenhouse gas reduction targets and targets for the introduction of renewable energy.

In addition, we are working on climate scenario analysis and highly transparent information disclosure based on the recommendations of the Task force on Climate-related Financial Disclosures (TCFD).

Furthermore, with regard to the loss of biodiversity, which is increasingly being recognized as an important social issue in recent years, the Group is working to further promote its biodiversity conservation initiatives to date, and has also registered as a "TNFD Early Adopter", which indicates its intention to disclose information in line with the Task Force on Nature-related Financial Disclosures (TNFD) by fiscal 2025, and is working to disclose nature-related financial information based on these recommendations.

Information on our response to the recommendations of TCFD and TNFD is available on the Company website.

(<https://www.sompo-hd.com/en/csr/materiality/topic2/>)

Supplementary Principle 4.1.1 Roles and Responsibilities of the Board (Scope and content of matters delegated to management)

The roles and responsibilities of the Company's Board of Directors are stipulated by law and the Articles of Incorporation, and matters to be resolved the Board of Directors Meeting are stipulated in the Company's "Rules and Regulations for the Board of Directors." Decisions regarding other matters of business execution are delegated to management under the Group CEO and the Business CEOs who have been delegated authority by the Group CEO, and the content of such matters is clearly stipulated in the internal rules, including the basic policies and the managerial decision rules.

< Main items for resolution by the Board of Directors Meeting other than items stipulated by law and the Articles of Incorporation >

-Important matters concerning Group management policy

-Matters related to the exercise of voting rights at the General Meeting of Shareholders of Sompo Japan and SOMPO Himawari Life Insurance, Inc.

-The establishment, purchase, or sale of important subsidiaries

Principle 4.9 Independence Standards and Qualification for Independent Directors

The Company has established "outside director independence criteria" based on the decisions of the Nomination Committee and by resolution of the Board of Directors in accordance with the standards required for Financial Instruments Exchange.

The Board of Directors appoints outside directors who have broad range of knowledge and experiences as corporate management, academia, legal or finance profession to facilitate objective decision making with respect to management issues from a diverse and independent viewpoint and perspective and diversity in terms of gender and nationalities; and the majority of the Board of Directors consists of outside directors. As a result of this policy, the Company's independent outside directors contribute to frank, active, and constructive deliberations and discussions at meetings of the Board of Directors, the Nomination Committee, the Audit Committee and the Compensation Committee.

Note: In this principle, gender means all the phenomena, knowledge, and viewpoints relating to sexuality such as gender division of labor and LGBTQ+.

Supplementary Principle 4.11.1 Policy and Procedure regarding the Board of Directors Skillset and the Appointment of Directors

The Company's Board of Directors is composed of a large number of outside directors to ensure effectiveness of supervision. In order to ensure sufficient diversity, outside directors are appointed from among corporate managers, academics, and members with expertise in legal, financial, and accounting fields, taking gender or nationality into consideration as well. This system of governance ensures high levels of transparency and fairness.

The Company's views on the overall balance of knowledge, experience, and capabilities and the diversity and scope of the Board of Directors as well the policy and procedure for selecting a candidate for director and a skill matrix that lists the skills and areas of expertise that each director is particularly expected to have are

presented in sections “3. Board of Directors and Committees” and “5. Policies for Appointment of Directors and Executive Officers” of the Corporate Governance Policy and “Directors' Skills Matrix” on the Company website.

- Corporate Governance Policy

(<https://www.sompo-hd.com/en/company/governance/overview/policies/>)

- Directors' Skills Matrix

(<https://www.sompo-hd.com/en/company/summary/skillmatrix/>)

Supplementary Principle 4.11.2 Concurrent Positions of Directors

In the event a director would be holding a concurrent position at another company, the Board of Directors determines the appropriateness of the appointment upon verifying the appropriateness of such positions as stipulated by law and by verifying the business content, volume of duties, and other conditions of the concurrent position. The Company seeks candidates with minimum of concurrent positions. Regarding outside director's concurrent position at another company, the Nomination Committee confirms that each person can secure the time and effort required to appropriately fulfill his/her role and responsibilities as an outside director of the Company, as well as number of positions held concurrently by outside directors.

Supplementary Principle 4.11.3 Evaluation of the Effectiveness of the Board of Directors

1. Initiatives to secure and enhance the effectiveness of the Board of Directors

At the Company, every director, including the Chairman of the Board of Directors, is keenly aware of the need for securing and enhancing the effectiveness of the Board of Directors, and we have established a cycle in which discussions are constantly held throughout the year and actions are taken with following initiatives.

a) The Structure of Board of Directors

As stated in Supplementary Principle 4.11.1 above, the Company's Board of Directors is composed of a large number of outside directors to ensure effectiveness of supervision. In order to ensure sufficient diversity, outside directors are appointed from among corporate managers, academics, and members with expertise in legal, financial, and accounting fields, taking gender or nationality into consideration as well. This system of governance ensures high levels of transparency and fairness.

In April 2024, we shifted to a governance system in which an outside director chairs the Board of Directors. This will enhance the fairness of management discussions at the Board of Directors meetings, strengthen the supervisory function for the executive divisions, and increase the objectivity and transparency of management.

b) Implementation and Utilization of Preliminary Briefing Sessions of the Board of Directors

The Company holds preliminary briefing sessions for all outside directors each time the meetings of the Board of Directors are held, so that constructive and productive discussions can be held. The Board of Directors also holds discussions based on the opinions and questions raised at each meeting. At the Company, integrated management of preliminary briefing sessions and the Board of Directors ensures efficient and fruitful discussions and that the views and perspectives of outside directors are directly reflected in the Board of Directors.

c) Activation of Discussions by Statutory Committees

The Company adopted a Company with Committees in June 2019 in order to strengthen management supervision and speed up business execution. Under this structure, discussions are deepened in order for each organization to perform its roles more faithfully and fulfill its accountability to stakeholders, including intensive deliberations on important management themes at the Board of Directors, appointment and remuneration decisions of officers and supervision of the legality and appropriateness of execution of duties at the Nomination, Audit, and Compensation Committees.

d) Measures for the Exercise of Functions of Supervision of the Board of Directors

In order to maintain a sense of distance between the Board of Directors and the executive departments and to maintain sufficient communication even after transition to a company with a Nomination Committees, etc. as above, the Company will proactively take measures that contribute to the exercise of functions of supervision, such as strengthening information coordination for directors to grasp the status of execution.

Concretely, the Group CEO, the Business CEOs and Executive Vice Presidents of business segments report on business execution at the Board of Directors meetings, Outside Directors can observe the Group ExCo, which is a meeting body of the Executive Division, and other meeting bodies, various opportunities are provided to outside directors to share information in a timely manner without limiting matters to be discussed by the Board of Directors, and meeting between outside directors and representative executive officers are held.

e) Supervision of Business Improvement Plan Formulation and Progress

The Company and its consolidated subsidiary, Sompo Japan, are implementing a business improvement plan (submitted to the Financial Services Agency (“FSA”) on March 15, 2024) aimed at preventing recurrence, including measures to foster a sound corporate culture that prioritizes compliance and customer protection, in response to issues related to improper claims for automobile insurance by Big Motor Co., Ltd. Additionally, Sompo Japan has submitted a business improvement plan (submitted to the FSA on February 29, 2024) outlining measures to prevent recurrence, including the establishment of an environment for fair competition, in response to issues related to inappropriate premium adjustments that may violate the Antimonopoly Act. Furthermore, in light of issues such as the leakage of customer information, Sompo Japan is working to restore trust by implementing a business improvement plan (submitted to the FSA on May 30, 2025) that sets out measures to prevent recurrence, such as ensuring compliance with laws and regulations and customer protection.

Our Board of Directors, following the discovery of the above incidents, has fulfilled its supervisory and advisory functions appropriately by making recommendations for effective group governance, including the formulation of business improvement plans. Since then, we have regularly reported the progress of the business improvement plan to the Board of Directors and the Audit Committee, and have strengthened collaboration between our external directors and the external directors of Sompo Japan, among other measures, to ensure that the supervisory functions of the Board of Directors are effectively exercised.

f) Evaluate the Effectiveness of the Board of Directors

The Company have been conducting an annual survey that includes self-evaluations by each director, and have established opportunities to analyze and evaluate the overall effectiveness of the Board of Directors, among other initiatives to enhance the effectiveness of the Board of Directors.

In the FY2024, we have decided to conduct an external evaluation of the effectiveness of the Board of Directors. With the assistance of external experts, we are conducting surveys, interviews, and group discussions to advance initiatives aimed at improving the effectiveness of our corporate governance. The details are outlined below in 2.

2. Evaluation of the Effectiveness of the Board of Directors

At the SOMPO Group, we view changes in the external environment as opportunities and are promoting “further improvement of resilience” and “connecting and staying connected” in order to achieve sustainable growth. From FY2025, we will consolidate our business areas into “SOMPO P&C (property and casualty insurance business)” and “SOMPO Wellbeing” and will strengthen collaboration across business and regional boundaries. We have established Business CEOs (SOMPO P&C CEO and SOMPO Wellbeing CEO) to oversee each business area, along with a Management Board as an advisory body. Additionally, we have established a swift decision-making framework where Business CEOs can execute important initiatives within their authority after consulting with the Group CEO. Leveraging the strengths, we have cultivated over the years, we will bring together the knowledge and expertise of our employees to enhance our specialization, provide solutions that meet the changing needs of our customers, and advance our efforts to achieve sustainable corporate value and realize SOMPO's purpose of “For a future of health, wellbeing & financial protection”

To support these efforts, we have conducted an external evaluation of the effectiveness of the Board of Directors for the FY2024 (conducted from February to May 2025) with the aim of further strengthening the effectiveness of the Board of Directors and, ultimately, the corporate governance of the SOMPO Group, so that the Board of Directors can more effectively fulfill its advisory and supervisory functions from a strategic and holistic perspective.

(1) Adoption of the Evaluation Process Utilizing External Experts

To further enhance the effectiveness of the Board of Directors, we have decided to conduct an external evaluation and have carried out the following procedures to assess the effectiveness of the Board of Directors.

- With the assistance of external experts, we designed the questions for a pre-survey and had all 13 directors respond.
- External experts analyzed the results of the pre-survey, conducted hypothesis testing to identify issues for improving the effectiveness of the Board of Directors, and reviewed the key points to focus on during interviews.
- External experts conducted individual interviews with all 13 board members.

- Based on the results of the individual interviews, a group discussion was conducted by the Chairman of the Board of Directors, the Chairman of the Nomination Committee, and the Group CEO, facilitated by external experts.

- The 13 board members were divided into two groups and conducted group discussions.

- Following the above processes, with the advice of external experts, the board of directors conducted a summary of the issues and action plans for improving the effectiveness of the board of directors.

Initially, we had planned to conduct only a preliminary questionnaire and interviews. However, as many constructive issues were raised by the directors in the preliminary questionnaire and interviews, we conducted multiple group discussions as described above to examine fundamental action plans to improve the effectiveness of the Board of Directors and, by extension, the corporate governance of the SOMPO Group.

Additionally, throughout the aforementioned processes, the Chairman of the Board of Directors, the Chairman of the Nomination Committee, the Group CEO, and the Board of Directors Secretariat collaborated, leveraging the expertise and advice of external experts, to repeatedly discuss measures to autonomously enhance the effectiveness of the Board of Directors.

(2) Overview of Evaluation Results

< Evaluation on Performance of Functions of the Board of Directors >

Following a series of processes to evaluate the effectiveness of the Board of Directors, the following points were identified as strengths of our Board of Directors:

- (i) The separation of the roles of the Chairman of the Board of Directors and the Group CEO, and the appointment of an Outside Director with the necessary character and qualifications to serve as Chairman, thereby enhancing the effectiveness of the Board of Directors;

- (ii) Continuous improvement in the operation of the Board of Directors, including regular presentations by the Group CEO and intensive discussion retreats;

These points have been confirmed.

Additionally, among the initiatives identified as areas for improvement in the previous year's Board of Directors' effectiveness evaluation, it was confirmed that sufficient progress has been made on initiatives such as deepening discussions on the "steady implementation and effectiveness of business improvement plans" and enhancing the opportunities for reporting on implementation status to further enhance the Board of Directors' functions.

<Initiatives to Further Enhance the Effectiveness of the Board of Directors>

From the perspective of the necessity to further enhance the effectiveness of the Board of Directors,

- (i) We will continue to optimize the composition of the Board of Directors in terms of size, diversity, and skill matrix,

- (ii) Based on the respective responsibilities of the Board of Directors, statutory committees, and outside directors of SOMPO Holdings, as well as the boards of directors of each operating company, we will work to make the corporate governance of the entire group more efficient and effective.

These and other measures were confirmed.

In light of the business improvement order we received, we have been focusing on restoring the trust of our customers and other stakeholders. Going forward, we will need to address a number of management issues, including reforming the business model of our domestic non-life insurance business to restore trust, recognizing the need to deepen our new growth strategy following the reduction of policy-held shares, adapting to rapid changes in the domestic and overseas environment, transforming the Group's management structure, and realizing our management strategy. With the aim of effectively exercising its advisory and supervisory functions in relation to these issues, the Board of Directors has recognized the necessity of the above initiatives.

<Future Initiatives>

To address these issues, we will promote the following initiatives to enhance the effectiveness of our Board of Directors and corporate governance, thereby striving to achieve sustainable growth in corporate value and realize the future envisioned in "SOMPO's Purpose" of "a future filled with 'security, safety, and health.'"

- (i) Initiatives to further evolve and strengthen the Group governance structure

- (ii) Development of a Mission Statement for the SOMPO Holdings Board of Directors

- (iii) Effective implementation of the Board Succession Plan by the Nomination Committee

- (iv) Further strengthening of collaboration between the SOMPO Holdings Board of Directors and the Boards of Directors of core business companies such as Sompo Japan

In particular, collaboration among operating companies in the business areas of “SOMPO P&C (property and casualty insurance business)” and “SOMPO Wellbeing” as well as the creation of innovative business models, are critical challenges for enhancing our corporate value. The Board of Directors recognizes that supporting the transformation of the management structure by the executive officers is an important responsibility, and will enhance the effectiveness of the Board of Directors through the above initiatives.

Additionally, to continuously improve the effectiveness of the Board of Directors, we will advance initiatives such as strengthening collaboration among the Chairman of the Board of Directors, the Group CEO, and the three Committee Chairs, and conducting Off-Site Meetings.

Supplementary Principle 4.14.2 Policy on Director Training

The Company’s policy on training directors is presented in section “6. Policies for Training of Directors and Executive Officers” of the Corporate Governance Policy on the Company website.

(<https://www.sompo-hd.com/en/company/governance/overview/policies/>)

Principle 5.1 Policy for Constructive Dialogue with Shareholders

The Company, to a reasonable extent, proactively responds to requests from shareholders and engages in positive and constructive dialogue.

To further promote constructive dialogue with shareholders, the Board of Directors decides the matter for carrying frameworks and activities for enhancement of investor relations. The Company sets an investor relations action plan and reports to the Board of Director in addition to the summary of results of activities in the last year.

Principle 5.1.2 Policy to promote Constructive Dialogue with Shareholders

(i) Involvement of management team in dialogue with shareholders

The Group's management team, including the Group CEO, takes the lead in engaging in constructive dialogue with shareholders and investors, which is driven by the executive officer and the department in charge.

(ii) Organic collaboration of relevant departments to assist dialogue

The department in charge of investor relations plays a central role in the promotion of dialogue with investors and supports it in collaboration with various departments, including corporate planning, sustainable management promotion, finance and accounting, public relations, investment, overseas business, and each department of group companies.

(iii) Various means of dialogue other than individual interviews

In addition to regular IR meetings, the Company holds a number of timely IR events to encourage disclosure and positive dialogue by its management team.

(iv) Report to the Board of Directors and Management

Views and concerns of investors are reported to the Board of Directors and the management team in a timely and appropriate manner.

(v) Control of Insider Information

The Company makes prompt and fair disclosure via its website. In addition, the Company refrain from discussing our business performance during a certain period prior to the announcement of financial results.

Please also refer to the "III.2. IR Activities" section of this report for details of our IR activities.

5. Other Special Circumstances which may have Material Impact on Corporate Governance

<Group management philosophy and policies>

The Group is pursuing sustainable improvements in corporate value through the implementation of group strategies that make the most of its strengths as a major player in both the Insurance and Nursing Care Businesses, as well as its customer base in the Domestic P&C Insurance Business cultivated over its 130-year history, its expertise in Overseas Insurance Business gained over the past decade, and its strengths as a major player in both the Insurance and Nursing Care Businesses.

In its three-year Mid-Term Management Plan starting from fiscal 2024, the Group has set “further improvement of resilience” and “connecting and staying connected” as key goals, and in order to accelerate efforts to achieve these goals, the Group's businesses have been consolidated into two business areas, “SOMPO P&C (property and casualty insurance business)” and “SOMPO Wellbeing” from fiscal 2025.

In SOMPO P&C (property and casualty insurance business), the Group aims to expand scale and improve profitability by sharing best practices through the integrated operation of domestic and overseas property and casualty insurance business and by realizing synergies in reinsurance and asset management. In addition, SOMPO Wellbeing will work as a group to create products and services that address the “Health concern,” “Financial concern after retirement,” and “Nursing care concern,” which have become evident in the context of a declining birthrate and aging population.

To strengthen the foundation that supports the implementation of these strategies, we are actively investing capital in the implementation of generative AI in our operations and the utilization of data, accelerating the drastic improvement of productivity and the development of new solutions.

<The significance of having listed affiliates and measures to ensure the effectiveness of the governance systems of listed affiliates>

The Company has listed affiliates Wellness Communications Inc. (TSE Growth; the “WCC”) and ABEJA Inc. (TSE Growth; the “ABEJA”). In addition to collaborative transactions, the transaction relationship between both companies and the Group includes transactions for the purpose of personnel exchanges such as the dispatch and secondment of executives. Regarding the terms of transactions, we have established a system to determine them fairly and appropriately based on the same standards as generally accepted transaction terms and reasonable judgments after taking into account market prices. In addition, we have a policy of pursuing the common interests of shareholders while also considering the interests of minority shareholders.

①WCC (shareholding ratio: 33.3% * as of the end of June 2025)

Under its corporate vision of “Energizing companies and people,” WCC develops medical checkup solutions and health management cloud services in the corporate wellness field for more than 3,500 corporations nationwide, including companies that drive the domestic and global economies, and health insurance associations that support the lives of their employees and their families.

WCC's unique platform-type solutions are essential to realize the seamless and comprehensive provision of a wide range of health and disease prevention-related services that SOMPO Wellbeing aims to provide.

As of July 2025, three of WCC's five directors are outside directors (including one from the Company). In addition, the Company will provide minimum necessary management control to WCC as a group based on the Group's basic policy, but we have not established any prior approval or prior consultation items with WCC, and we respect WCC's independent and autonomous business activities. We believe that it would be desirable for WCC to hone its services and solutions as a listed company in the promising corporate wellness field from the perspective of synergy with the Company.

②ABEJA (shareholding ratio: 17.4% *as of the end of June 2025)

ABEJA has a vision of “Implementing a rich world” and has realized digital transformation (DX) for over 300 clients through support for the introduction of AI in core business operations.

As a strategic partner in the digital field, ABEJA supports the sophistication and efficiency of the Group companies' operations using AI, as well as the improvement of the digital capabilities of the Group executives and employees from an educational perspective.

We have dispatched one director (total of seven directors *as of June 2025) to ABEJA, and we will provide minimum necessary management control to ABEJA as a group based on the Group's basic policy, but there are no transactions or operations that require our prior approval, and we believe that ABEJA's independence and autonomy in management is ensured.

Appointment of Directors and/or Staff to Support the Audit Committee

Appointed

Matters Related to the Independence of Such Directors and/or Staff from Executive Officers

To ensure the effectiveness of audits by the Audit Committee, the Company has established the Audit Committee Office as an organization dedicated to assisting the duties of the Audit Committee.

Cooperation among Audit Committee, Accounting Auditors and Internal Audit Departments

The Company has changed its governance structure to "Company with committees", effective June 2019, as a part of efforts to strengthen corporate governance structure.

The Internal Audit Department discusses with the Audit Committee when the department makes internal audit plans. The results of audits by the Internal Audit Department are all reported to the Audit Committee. The Audit Committee requests the Internal Audit Department to conduct investigations as necessary, and uses the results of these investigations for audit by the Audit Committee. In addition, the Internal Audit Department works closely with the Accounting Auditor and regularly exchanges opinions.

The Audit Committee formulates audit plans and conducts audits. It strives to implement efficient audits by requesting General Manager of Internal Audit Department to attend the Audit Committee and regularly exchanging opinions and information with the Internal Audit Department. It also deepens mutual understanding with the accounting auditors about the content of audits, including risk recognition and audit plans, and it exchanges opinions with the Internal Audit Department upon receiving explanations on the implementation status of audits. Also, the quality of the audits by the accounting auditors is maintained by consenting to the decision for the accounting auditors' audit fee after verifying that adequate time will be able to be provided for the audits.

Steps have also been taken to provide a supportive environment for the accounting auditor, including enabling access to senior management personnel such as the Representative Executive Officer and promoting collaboration with the internal audit and other departments.

When the Audit Committee receives reports on the results of audits from the accounting auditor, the Internal Audit Department attends so that the three parties could have the same understanding.

During the audits and other activities, the internal audit department, the Audit Committee and accounting auditors exchange opinions and information with the internal control departments (corporate management / accounting). The internal control department uses the results of the opinion and information exchanges by three audit parties to strengthen the internal controls.

Disclosure of Policy on Determining Remuneration Amounts and Calculation Methods

Approach to Executive Compensation Systems and Specific Calculation Methods

1. Sompo Holdings' Executive Compensation Structure

The Company regards its executive compensation structure as an important aspect of corporate governance. The executive compensation structure has been configured with the aim of increasing corporate value and sharing interests with shareholders. The aforementioned structure is based on the basic policies outlined below, and has been designed from an objective perspective by the Compensation Committee, which is chaired by an outside director.

The Company's Policies on Decisions Pertaining to Executive Compensation describes the Basic Policies on Executive Compensation, the composition of compensation and how it is determined for each position, and the details of each type of compensation.

2. Overview of Executive Compensation Structure

The Company considers the current Mid-Term Management Plan as an opportunity for realizing transformation of each business and the entire Group. Executive compensation linked to the Company's performance is recognized as an important facet of corporate governance underpinning this transformation initiative.

The Company, based on the principle of being mission-driven (Stay engaged with a sense of mission; take ownership at work) and results-oriented, is of the opinion that each executive officer should demonstrate and act in accordance with their own duties and mission. Compensation for these executive officers is not a fixed amount based on their duties or position, but decided in accordance with the magnitude of the mission they are undertaking for the future and the outcome of their efforts. The structure for executive compensation was designed with this philosophy in mind.

(1) Decision-making process for total compensation packages

The Company sets compensation levels on an individual basis with consideration made to the magnitude of the mission assigned to each executive officer, etc. This is in contrast to an approach whereby compensation is determined according to a traditional compensation table for each executive rank.

(2) Composition of executive compensation

Executive officer compensation consists of a fixed component (base salary) based on the duties and responsibilities of each executive officer and a variable component linked to performance. Variable compensation comprises an annual bonus, which is compensation linked to short-term performance paid out on a fiscal-year basis in accordance with performance during each year, and a stock-linked compensation system (Phantom Stock) that provides the same economic value as cash stock in order to motivate executives to sustainably increase the Company's corporate value and to promote value sharing between executives and shareholders. This composition is designed to motivate executive officers to make decisions based on longer-term earnings with a greater awareness of the share price, instead of focusing solely on a single fiscal year.

(3) Concepts on each of the remuneration elements and calculation method

■ Fixed Compensation (Base Salary)

The Company sets fixed compensation (base salary) in accordance with the responsibilities of the post assigned to each executive officer, and paid in equal amounts each month, in principle.

The amount of fixed compensation (base salary) is set at a level deemed fair in light of prevailing compensation levels on the market, referring to a survey of executive compensation conducted by a third-party compensation consulting firm, with a standard amount for the total compensation package based on the

post grading system, as well as a base amount that depends on the nature of the duties and responsibilities of each executive officer while considering the mission of each post.

■ **STI (Annual Bonus)**

The Company has put in place a performance-linked compensation structure that rewards executive officers based on the business contributions they made in a single fiscal year, as well as establishing a framework that incentivizes executive officers to improve performance for the sake of the Group's growth, while aligning the executive compensation structure to business strategies.

- The annual bonus is determined by reflecting the degree of achievement toward financial targets and strategic targets in a single fiscal year in the base amount of performance-linked compensation.
- The target amount of performance-linked compensation is defined as the amount to be paid when financial targets and strategic targets are achieved. This base amount is determined for each executive officer individually.
- The annual bonus consists of financial performance-linked compensation and strategic performance-linked compensation. The ratio of the two components is determined by the Compensation Committee in accordance with the nature of the mission assigned to each executive officer.
- The performance metrics for financial targets include adjusted consolidated ROE in the fiscal year, and the coefficient is determined as a ratio of actual performance to target performance (numerical targets in the business plan).
- The performance metrics for strategic targets are those agreed upon by the Group CEO, or the Business CEOs, etc. in charge of evaluating performance, in accordance with the mission assigned to the executive officer in question, and the coefficient is set according to the degree of achievement.
- The performance metrics applied for strategic targets include an engagement metric for all executive officers and a brand value metric for some executive officers as mandatory items related to the unrealized financial value metric.

■ **Stock price-linked compensation system (Phantom Stock ("PS"))**

Stock price-linked compensation is compensation in which the amount received varies according to the number of units granted as well as the Company stock price and dividends, and is linked to the medium- to long-term growth of the Company.

- The number of units will be determined by reflecting the level of achievement of strategic goals in the base amount of stock-linked compensation, which is determined based on the size of the mission, etc.
- The units granted will vest at the end of the fiscal year three years after the date of grant, and the vested units will be classified as PS (i) and PS (ii).
- Directors may exercise their rights at any time with respect to PS (i) and only upon retirement with respect to PS (ii), and the amount to be paid will be calculated by multiplying the number of units exercised by the Company's share price at the time of exercise and adding an amount equivalent to the dividends accumulated up to the time of exercise.

The Group's Policies on Decisions regarding Compensation for Directors and Executive Officers

The Company regards compensation for Directors and Executive Officers as important matter from the viewpoints of improving business performance and enterprise value, and sets policies for determining compensation for Directors and Executive Officers as follows:

1. Basic concept of Compensation for Directors and Executive Officers (Group-wide policy)

The Company's Purpose is "For a future of health, wellbeing, and financial protection." To embody this purpose, it defines the expected behaviors based on SOMPO's Values (Integrity, Self-motivation, and Diversity) as the foundation for the decisions and actions of executives and employees.

Executives are expected to lead by example. Therefore, their compensation is determined based on the following principles:

- a) The compensation system should create sustainable value for stakeholders over the medium to long term.
- b) The level and system of compensation ensures acquisition and retention of top talent as management of the Group.
- c) Compensation shall be determined in accordance with the magnitude of the mission with a forward-looking mindset and accomplishments. Additionally, fixed factors associated with specific job title or position may be taken into consideration.
- d) The compensation system for Directors and Executive Officers shall be consistent with business strategy and heightens the Directors' and Executive Officers' awareness of performance improvement for the Group's growth.

e) Compensation shall reflect medium to long-term results and initiatives of Directors and Executive Officers, not just performance in a single fiscal year.

f) The compensation system of the Company and major subsidiaries shall have objectivity, transparency and fairness to fulfill accountability to stakeholders through the deliberation process at the Compensation Committee of the Company.

2. Compensation system for Directors and Executive Officers

The following is applied to the Company's compensation system for Directors and Executive Officers. However, in case there is a justifiable reason for not applying the following, the amount and composition of compensation are determined individually by the Compensation Committee.

a) Composition and determination method of Directors' compensation

Compensation for Directors shall consist of monthly compensation, performance-linked compensation and stock price-linked compensation. With regard to monthly compensation, performance-linked compensation and stock price-linked compensation, fixed amount shall be determined for monthly compensation, while a base amount and the number of base point (one unit = cash equivalent to one common share of the Company) shall be determined for performance-linked compensation and stock price-linked compensation, depending on whether the Director is an Outside Director or not, and whether the Director is a full-time or a part-time Director.

However, performance-linked compensation and stock price-linked compensation are not paid to non-executive Directors.

Any Director who also serves as an Executive Officer shall be paid with the sum of the compensation for Director and the compensation for Executive Officer.

The overview of the performance-linked compensation and stock price-linked compensation is described below in (c) and (d).

b) Composition and determination method of Executive Officers' and Executive Vice Presidents' compensation

Compensation of Executive Officers and Executive Vice Presidents shall consist of monthly compensation, performance-linked compensation and stock price-linked compensation. The amount and composition of compensation of Executive Officers and Executive Vice Presidents are determined based on the business environment and market average executive compensation, reflecting the magnitude of the mission.

Additionally, fixed amount shall be determined for monthly compensation, while base amount and the number of base point (one unit = cash equivalent to one common share of the Company) shall be determined for performance-linked compensation and stock price-linked compensation.

The overview of the performance-linked compensation and stock price-linked compensation is described below in (c) and (d)

c) Performance-linked compensation

The Company introduced a performance-linked compensation system to align compensation for Directors and Executive Officers and business strategy and heighten the Directors' and Executive Officers' awareness of performance improvement for the Group's growth. The overview of the system is described below.

- Performance-linked compensation shall be determined by reflecting the degree of achievement of financial target and strategic target for a single fiscal year in the base amount of performance-linked compensation.
- The base amount of performance-linked compensation is defined as the amount to be paid when financial target and strategic target are achieved. This base amount is determined individually for each Director and Executive Officer.
- Performance-linked compensation consists of financial performance-linked compensation and strategic performance-linked compensation, and the allocation ratio of each base amount is determined by the Compensation Committee in accordance with the nature of the mission of each Director and Executive Officer.
- Performance indicators that are applied to financial target are adjusted consolidated ROE and others for the fiscal year and the coefficient is determined according to the actual figures vs. target figures (numerical target in business plan).
- Performance indicators that are applied to strategic target are the indicators agreed by the Group CEO, Business CEO or others responsible for evaluation in accordance with the mission of each Director and Executive Officer, and the coefficient is determined according to the degree of the achievement.

d) Stock price-linked compensation system

The Company introduced a stock price-linked compensation system that provides the same economic value as actual shares in order to motivate Directors and Executive Officers to continuously improve the Company's

enterprise value and to promote value sharing between the Directors and Executive Officers and shareholders. The outline of this system is as follows:

- Stock price-linked compensation reflects an amount equal to the Company's stock price and dividends in the number of units granted.
- The number of units will be determined by reflecting the level of achievement of strategic goals in the base amount of stock-linked compensation, which is determined based on the size of the mission, etc.
- The units granted will vest at the end of the fiscal year three years after the date of grant, and the vested units will be classified as PS (i) and PS (ii).
- Directors may exercise their rights at any time with respect to PS (i) and only upon retirement with respect to PS (ii), and the amount to be paid will be calculated by multiplying the number of units exercised by the Company's share price at the time of exercise and adding an amount equivalent to the dividends accumulated up to the time of exercise.

[Supporting System for Outside Directors]

Prior to meetings of the Board of Directors, outside directors are provided with explanations by the Corporate Legal Department of the Secretariat of the Board of Directors, and by the departments in charge of each agenda item. Additionally, the Human Capital Department provides assistance to outside directors as the Secretariat of the Nomination Committee and the Compensation Committee, and the Audit Committee Office provides assistance to outside directors as the Secretariat of the Audit Committee.

The Company also makes efforts to provide outside directors with various types of information, including the Integrated Annual Report, Annual Securities Report, and IR presentation materials.

Other Related Matters

In some cases, the Company appoints former Group CEOs and/or presidents, etc. as special advisors. However, these special advisors have no roles or authority with regard to advising on management. Instead, these appointments are intended to carry out external activities, such as those related to business associations, social contribution activities, and cultural activities. They are appointed to one-year terms through a resolution of the Board of Directors.

2. Matters Concerning Functions of Business Execution, Auditing and Supervision, Nomination, and Remuneration Decisions (Overview of Current Corporate Governance System)

The Board of Directors sets the basic management policy and the basic policy for internal control which forms the foundation of the Group management, appoints executive officers/executive Vice President and provides supervision over the performance of duties by directors and executive officers. Additionally, the Board of Directors delegates executive decisions to executive officers in principle, as long as laws permit, for further strengthening the supervisory function of the Board of Directors and further accelerating business execution simultaneously.

In addition, by appropriately executing the duties of the Nominating Committee, Audit Committee, and Compensation Committee, which have the chairman and a majority of its members as outside directors, the Company ensures transparency in the appointment of Directors and Executive Officers/Executive Vice President, the audit of their duties, and also the treatment of directors and executive officers to control and maintain the structure of corporate governance for proper and more efficient function.

On the structure for business execution, Executive Officers make executive decisions and perform duties on the matters delegated from the Board of Directors under the overall supervision of the Group CEO, while the Business CEO System by which the Business CEO is appointed and the Executive Vice President in charge of the business segment pursues sustainable enhancement of enterprise value and maximization of synergies within the Group under the oversight of the Business CEO, and Group CxO System by which the Group CxO utilizes high level of expertise in respective functional area across businesses and pursues Group best, are in place to ensure agile and flexible decision-making and business execution, with clearly defined authorities and responsibilities.

Additionally, the Company established the Group ExCo, as an advisory body to the Group CEO to discuss themes that significantly impact group-wide management strategy as well as business executive policy.

The Group considers that it is essential to continually improve the transparency and fairness of the Group's corporate governance and to maintain strong relations of trust with stakeholders. The Board of Directors has accordingly established the Corporate Governance Policy to clarify basic policies regarding the formation of the overall vision for the governance structure and the governance framework.

Directors and the Board of Directors

The Board of Directors performs its duties as stipulated by laws and regulations and the Articles of Incorporation, decides on important items for management as defined in the Rules of the Board of Directors, and serves a supervisory function overseeing the status of business execution.
