MONEX GROUP

Announcement of Group Company's Release

TOKYO, September 25, 2026 – Monex Group, Inc. (the "Company") hereby announces that Coincheck, Inc. ("Coincheck"), a subsidiary of Coincheck Group N.V. (Nasdaq: CNCK) the majority stake of which the Company owns, has launched a leveraged crypto asset trading service. Within the Coincheck app, which ranks No. 1 in Japan in terms of both the number of app downloads and the number of active users, customers can smoothly switch between spot trading and leveraged trading with a single tap, broadening the range of investment strategies available to them in response to market conditions. The launch enables customers to utilize trading methods that have long been established in traditional finance in crypto asset trading as well.

Monex Group envisions a future in which traditional finance and finance built on blockchain infrastructure converge. In our Digital Asset Business, we are expanding our retail customer base through partnerships with companies utilizing CaaS (Crypto as a Service). Going forward, we will continue to expand our range of services to meet the diverse needs of our customers and drive further growth.

【PRESS RELEASE】

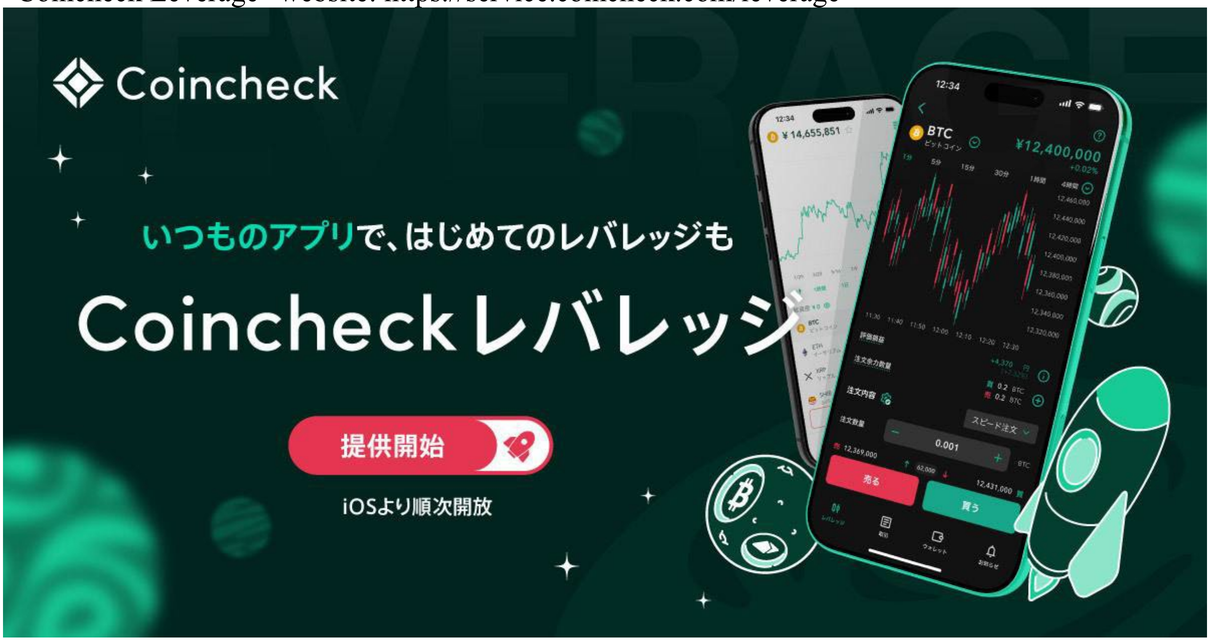
September 24, 2026
Coincheck, Inc.

Coincheck Launches "Coincheck Leverage," a Leveraged Crypto Asset Trading Service
— Leveraged trading now available with a single tap in the Coincheck app customers already use —

This material is an English translation of a Japanese announcement made on the date above, prepared by Coincheck, Inc. This document is provided for reference purposes only, and the accuracy and completeness of its contents are not guaranteed. Please refer to the original Japanese document for the official version.

Coincheck, Inc. (Head office: Shibuya-ku, Tokyo; Representative Director: Satoshi Hasuo, Tomoyuki Isaka; hereinafter "Coincheck" or "the Company"), which operates "Coincheck," a crypto asset trading service that ranks No. 1 in Japan in terms of active users and app downloads*, today announced that it will launch "Coincheck Leverage," a leveraged crypto asset trading Contract For Difference (CFD) service, in the Coincheck app (iOS) on September 24, 2026.

"Coincheck Leverage" website: https://service.coincheck.com/leverage



About "Coincheck Leverage"

"Coincheck Leverage" is a new service that enables leveraged trading of crypto assets (CFD) within the Coincheck app. No separate app download is required, and its defining feature is the ability to switch between spot trading and leveraged trading with a single tap, directly from the trading screen of the Coincheck app customers already use.

With this service, users can adopt new investment methods such as leveraged trading and short (sell) positions in addition to spot trading, broadening the range of investment strategies available to them as market conditions change.

Note: From today, the service will be rolled out to users of the Coincheck app (iOS), with eligible users being expanded in phases. Using Coincheck Leverage requires opening both a “Coincheck” account and a “Coincheck Leverage” account.

This service (Coincheck Leverage) is provided under the Company’s registration as a Type I Financial Instruments Business Operator pursuant to the Financial Instruments and Exchange Act (Director-General of the Kanto Local Finance Bureau (Financial Instruments Business) No. 3540).

A Seamless Experience, Complete Within the App You Already Use

Coincheck has been supported by a large user base as a service that is easy to use even for beginners. With this launch, the Company retains that simple usability while adding functions such as leveraged trading, evolving Coincheck into a product that also meets the needs of intermediate and more experienced investors.

“Coincheck Leverage” is designed to work entirely within the existing Coincheck app, requiring neither a separate app download nor the effort of learning a new interface. In-app switching lets users move smoothly between spot and leveraged trading with a single tap, and funds can be transferred seamlessly between the spot account and the leverage account. As a result, customers who have used the Coincheck app mainly to buy and sell crypto assets can take on new investment methods in the very app they already use.

The Company will continue to provide an environment in which users can choose from an increasingly diverse range of investment strategies.

Coincheck

Service Overview

Service name: Coincheck Leverage
Launch date: Thursday, September 24, 2026
Supported environments: iOS app (version 5.0.0 or later); Android and web versions are scheduled to launch within 2026
Supported currency pairs: BTC/JPY, ETH/JPY, XRP/JPY Leverage: Up to 2x (required margin ratio of 50% for individual customers)
Eligibility: Individual customers who have already opened a crypto asset spot account with the Company and have completed the prescribed suitability assessment and related procedures (support for corporate customers is scheduled from 2027 onward)

Key Features

・Leveraged trading (up to 2x / required margin ratio of 50% for individual customers): Customers can trade up to twice the value of the margin (Japanese yen) they have deposited.
・Short (sell) positions: Offers opportunities to profit even when prices fall, allowing flexible trading in line with market conditions.
・A range of order types (market, limit, stop, speed order, and close-all order): Support for trading at pre-specified prices as well as speed orders enables agile trading without having to watch the market continuously.
・Support for major currency pairs (BTC/JPY, ETH/JPY, XRP/JPY): Three pairs are supported, covering Bitcoin, Ethereum, and XRP (Ripple).
・Trading 24 hours a day, 365 days a year (excluding maintenance periods): Customers can trade whenever they wish, regardless of time or place.

Future Plans

At the September 24, 2026 launch, core functions will be available in the iOS app: leveraged trading, short positions, market, limit, stop, speed and close-all orders, and support for the three major currency pairs. Additional functions are scheduled to be rolled out in stages thereafter. Beyond that, the Company plans further expansion, including Android and web versions as well as availability for corporate customers.

Comment from Shuhei Sawamura, Expert Director / Head of Product and Deputy Head of the Development & AI Division, Coincheck, Inc.

“For many years, we have offered spot trading of crypto assets through our brokerage and exchange services. As the number of customers holding crypto assets has grown, we decided to launch a leveraged trading service, so that we can serve not only those seeking returns from holding over the long term, but also those looking to earn yield on their holdings or to trade over shorter horizons.

Coincheck Leverage is available inside the same Coincheck app our customers already use every day. We hope they will use it as a tool for engaging with both the upside and the downside of the market, with their own financial circumstances in mind.”

About Coincheck, Inc.
Under the mission “Making New Value Exchange More Accessible,” Coincheck, Inc. operates “Coincheck,” Japan’s No.1 crypto asset trading service for individual users in terms of the number of active users and the No.1 crypto asset trading app in terms of the number of downloads for seven consecutive years*, “Coincheck Prime,” which supports crypto asset trading and custody for corporations and institutional investors, and “Coincheck CaaS,” an embedded crypto asset trading service, as well as “Coincheck Partners,” which supports on-chain-related businesses for corporate clients. As a group company of Monex Group, Inc., listed on the Tokyo Stock Exchange Prime Market, and Coincheck Group N.V., listed on NASDAQ in the United States, Coincheck provides the “new value exchange” created by crypto assets such as Bitcoin and Ethereum and by blockchain technology, under a commitment to transparency, reliability, and security.

*Regarding the number of active users, see Coincheck’s press release dated February 26, 2026, “Coincheck App Wins ‘Best Cryptocurrency App’ at the APAC Awards 2025.” Regarding the number of app downloads, coverage: domestic crypto asset trading apps; period: January 2019–December 2025; data provided by AppTweak.
