

KATITAS Co., Ltd.

Financial Results Presentation

For the First Nine Months of the 47th Fiscal Year Ending March 31, 2025 (FY2024)

February 7, 2025

Before

After

(Securities Code: 8919, Prime Market of TSE)

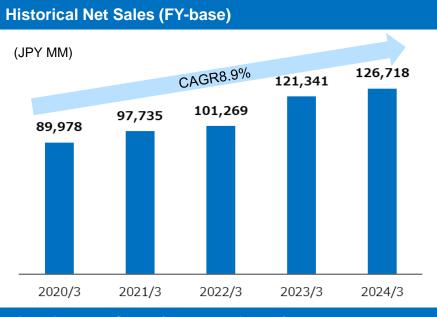

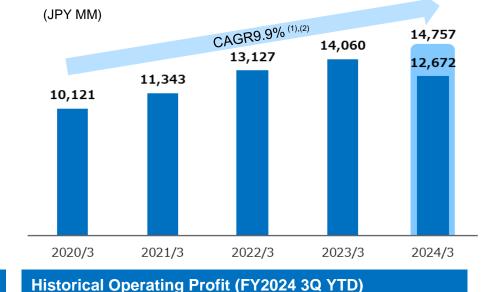

Presentation Highlights

1.	Overview of Financial Results for the First Nine Months of the FY2024 (Ending March 31, 2025)	P3-P12
-		
2.	Management Plan for FY2024 (Ending March 31, 2025)	P14-P22
3.	Overview of Business Model	P24-P44
4.	APPENDIX	P46-P58
4.	ALL LINDIA	T 40-F JO

Sales and Operating Profit Trend

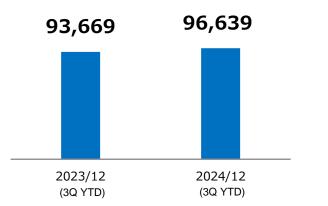

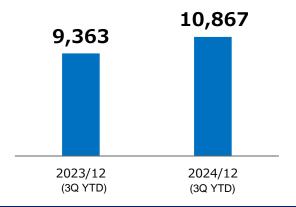

Historical Operating Profit (FY-base)

Historical Net Sales (FY2024 3Q YTD)

(JPY MM)

(JPY MM)

⁽¹⁾ For details on adjusted items, please see the Adjustment Item List on slide 10.

⁽²⁾ When calculating the CAGR for operating profit, impact from FY2023 was measured using adjusted operating profit.

Highlights of Financial Results for 3Q FY2024 (October - December 2024)

ſ	(JPY MM)	3Q FY2023	3Q FY2024	YoY
Sales	Net sales	31,614	32,629	+3.2%
	Number of properties sold	1,788	1,850	+3.5%
	Gross profit margin (%)	22.5%	24.3%	+1.8pt
	SG&A expenses	3,594	3,885	+8.1%
Profit	Operating profit	3,512	4,046	+15.2%
	Operating profit margin (%)	11.1%	12.4%	+ 1.3pt
Key	Inventory real estates	56,235	59,001	+4.9%
Key indicators	ROA (LTM) ⁽¹⁾	18.3%	18.8%	+0.5pt

- Number of properties sold saw only a slight increase due to seasonal growth in purchasing and a small supply of deliverable inventory. Suburban areas showed improvement compared to their challenging performance in the same period of the previous fiscal year
 - KATITAS: Number of properties sold was slightly subdued due to an increase in purchases during 2Q, which led to a higher number of unfinished inventory contracts. The impact of the price hikes ran its course by December, and the number of inquiries (responses) (2) has recovered
 - REPRICE: Continued recovery in market conditions and sales channel strategy contributed to an
 increase in the number of properties sold. Properties that were relatively new and inexpensive were
 favored as alternatives to newly built houses, resulting in strong sales

■ Gross profit margin improved both YoY and QoQ

- KATITAS: Measures to improve gross profit continued to contribute to performance; gross profit margin surpassed the record high marked during the COVID-19 pandemic
- REPRICE: Gross profit margin recovered to normal levels. With no signs of an increase in inventory available in the market for newly built houses, gross profit margin is expected to be maintained and improved from 4Q through the next fiscal year

Operating profit rose 15%. Higher-than-expected gross profit per property sold contributed to the results

- The increase in SG&A expenses was attributable to higher personnel expenses from increased profitlinked incentives and recruitment expenses for hiring expansion
- No particular progress with the consumption tax-related lawsuit; an appeal to the Supreme Court is
 currently pending. Generally, the Supreme Court requires at least one year from its decision to accept
 an appeal before it delivers a ruling. However, if Supreme Court chooses to reject the appeal, this
 decision could come within six months at the earliest. As of the financial results announcement date, no
 notification had been received regarding the acceptance or rejection of the appeal
- Even if the Supreme Court rules against us, there will be no impact on operating profit or lower due to the recording of special losses

Number of properties purchased grew significantly. We have resolved inventory shortages and will focus on preparing properties for market

- Houses purchased in 3Q: 2,436 (+29.4% YoY), a significant increase.
 Inventory real estates increased YoY, and the inventory shortages have been resolved
- We will continue to manage purchase KPIs to secure inventory for the next fiscal year. Our perspective for profitability remains unchanged
- Supply of housing stock in the pre-owned housing market continued to grow, making the purchasing environment favorable
- Purchase prices: As the supply volume of newly built houses declined, we stepped up our efforts to
 purchase relatively new houses that are in high demand; the purchase price downtrend came to a lull
 as a result

Progress Versus Management Plan for FY2024 (Ending March 31, 2025)

- We made steady progress toward achieving the management plan target of ¥14.0 bn for operating profit, which is our most important management indicator. If the management plan target is exceeded, a portion of the excess is planned to be paid as bonuses.
 - ✓ Average price per sale: Lower than projected as low-priced products took root at REPRICE as well. We view this positively as our measures taking root
 - ✓ Properties sold: Lower than expected. Focused on purchasing properties in 3Q due to seasonality, a trend where the number of properties purchased tends to increase each year. In 4Q, we will focus on preparing properties for market rather than sales activities
 - ✓ Gross profit per property sold: Exceeded projections; various measures to improve gross profit continued to bear fruit
 - ✓ Number of properties purchased: Higher than projected. We will secure a sufficient number of properties to ensure stable growth in the next fiscal year. In 4Q, we will focus on preparing properties for market rather than purchasing activities
 - ✓ REPRICE: Number of properties sold and GPM have improved. The supply of newly built houses, which buyers compare with REPRICE's houses, has fallen by roughly 15% from the peak amount reached in FY2023, and the substantially marked-down sales of new houses have also declined ⁽¹⁾. As new housing starts have fallen YoY for 26 consecutive months as well, we expect the risk of a market deterioration to be small for the time being ⁽²⁾. The construction costs of new houses beginning construction after April 2025 will rise as builders face the need to comply with stricter environmental regulations, and the sale prices of newly built houses will likely rise accordingly. As such, we expect REPRICE to be at an advantage on the price front
- The impact of rising construction costs is small, given that pre-owned houses require fewer building materials compared to newly built houses
- The impact of rising interest rates has not surfaced in particular. Even if mortgage interest rates were to rise, we believe the impact would be neutral since we can expect customer inflows from the buyer base of newly built houses

		3Q YTD nber 31, 2024)	FY2024 Plan (ended Mar 31, 2025)						
(JPY MM)	Results	vs sales	Full-year Full-year						
	Results	(%)	Plan	% of plan	vs sales (%)				
Sales	96,639	100.0%	134,500	71.9%	100.0%				
Number of properties sold	5,526	-	7,660	72.1%	-				
Gross profit	22,577	23.4%	30,200	74.8%	22.5%

^{(2) &}quot;Statistical Survey on Construction Starts" issued by the Ministry of Land, Infrastructure, Transport and Tourism

Progress of Measures to Improve Gross Profit

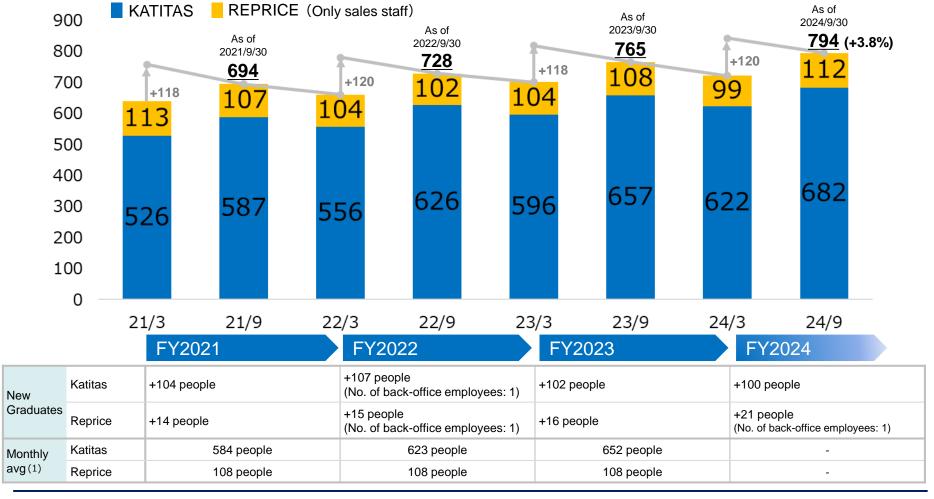

Obj	ective	Measure	Executing organization	Progress					
	Sales staff	New graduate	KATITAS	• On track to recruit 130 new graduates for April 2025 as planned; looking to increase this count by 20 for April 2026					
	expansion	recruitment	REPRICE	 On track to recruit 30 new graduates for April 2025 as planned; looking to increase this count by 5 for April 2026 					
	De Lettin	Brokerage of properties between KATITAS Group companies	KATITAS & REPRICE	 Policy under which KATITAS sales staff broker properties marketed by REPRICE Group brokerage ratio (percentage of REPRICE sales unit brokered by KATITAS) for 3Q was approximately 12% (by number of properties sold), unchanged from 2Q 					
	Productivity growth	Sale of low-priced	KATITAS	Generated about 20% of 3Q sales (by number of properties sold)					
		products	REPRICE	• Generated about 20% of 3Q sales (by number of properties sold)					
		Reassessment of	KATITAS	TV commercials began airing in the Nagoya area					
Increase in operating profit		promotional activities	REPRICE	 In addition to strengthening on-site sales promotions, furnished about 200 properties with Nitori furniture 					
		Price increases on properties held in inventory	KATITAS	 Raised prices of all properties in October 2024. While September saw rush demand and a reactionary decline occurred from October onward, the overall profit remained positive 					
	Increase in operating profit	Revision of incentive system	REPRICE	 Introduced an incentive system in April 2024. The system enhanced profit- consciousness of the sales staff 					
	per property sold	Review of management accounting	KATITAS	 No revisions after July 2023 Average projected gross profit per property at time of purchase has remained high since October 2023 					
		Reduction of	KATITAS	 Curbed renovation costs by obtaining quotes from multiple service/material providers 					
		renovation costs	REPRICE	Curbed costs by separate ordering and reassessing supplies provided by REPRICE to contractors, among other items					

Number of sales staff

(Reposted from FY2024 2Q)

- The number of sales staff as of September 2024 was up 3.8% YoY.
- In April 2025, KATITAS and REPRICE expect to welcome 130 and 30 new graduate hires, respectively.
- At REPRICE, some sales operations were moved to the headquarters. While the number of sales staff did not increase because of the personnel transfer from sales to the headquarters, REPRICE's overall productivity has improved.

Differences in the Views of the Company and Tax Authorities

カチタス
(Prime Market 8919)

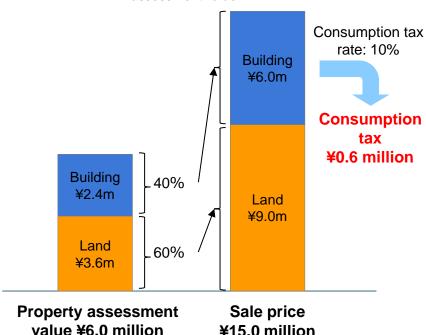

(figures provided here are for illustrative purposes only)

(Reposted from FY2024 1Q)

- While land transactions are exempt from consumption taxes, building transactions are subject to consumption taxes. In transactions involving preowned homes, the Company considers land and building as a single entity, and hence, it is necessary to rationally distinguish between non-taxable and taxable transactions.
- The Company applies a calculation method largely consistent with the "Apportionment based on property assessment value" as prescribed in the Frequently Asked Questions page of the National Tax Agency's website⁽¹⁾. Note that the calculation method based on the "Apportionment based on property assessment value" is commonly used by business operators engaged in the purchase and resale of preowned homes.

Apportion the value of land and building based on property assessment value⁽²⁾

Calculation method advocated by tax authorities

Apportion the value of land and building based on the sum of property assessment value at the time of purchase and cost of renovation

⁽¹⁾ National Tax Agency's Frequently Asked Questions No. 6301: Tax base (https://www.nta.go.jp/taxes/shiraberu/taxanswer/shohi/6301_qa.htm)

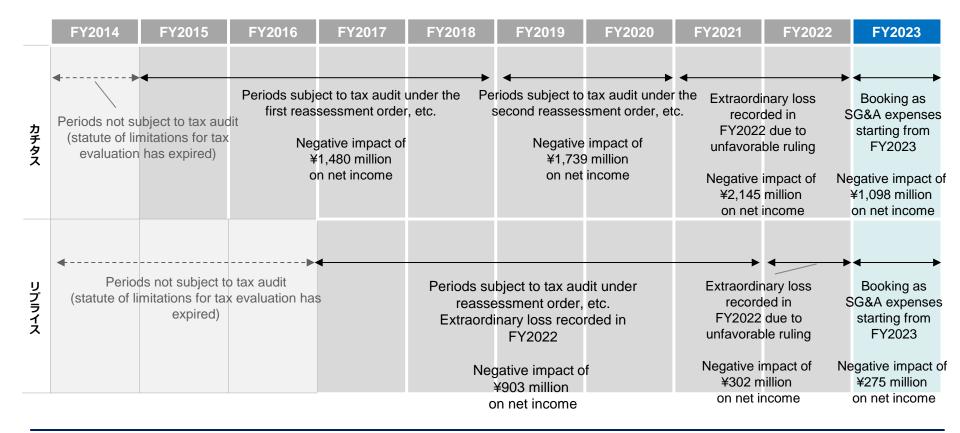

About the Reassessment Penalty, etc. from the Regional Taxation Bureau

(Prime Market 8919)

(Reposted from FY2023 4Q)

- KATITAS has recorded extraordinary losses and paid taxes due to reassessment orders twice since FY2015, while REPRICE has done the same once.
- KATITAS received an unfavorable ruling on its first trial, through which it sought to have reassessment orders revoked. Accordingly, starting from FY2023, the Group will retrospectively calculate differences in results obtained when applying its own calculation method and those obtained when applying the method prescribed by tax authorities. These differences will be recorded as SG&A expenses.
- We will not incur any additional losses in connection with accounting periods occurring prior to periods subject to tax audit under reassessment orders because tax-related statutes of limitation for these earlier periods have already expired.
- Beginning with FY2023, we have applied accounting methods consistent with those prescribed by tax authorities. Even if the Supreme Court rule against us, we will experience no negative earnings impact resulting from extraordinary losses, etc.

4.	APPENDIX	P46-P58

Management Plan for FY2024 (Ending March 31, 2025)

(Reposted from FY2023 4Q)

- We project net sales growth of about 6%, and a rise of about 10% in operating profit.
 - ✓ Average price per sale: Expected to remain level with FY2023 or slightly lower; forecast accounts for expansion in sales of low-priced products and changes in market conditions
 - ✓ Properties sold: Despite strong demand, projected growth limited to about 7% due to initial inventory shortages
 - ✓ Per-unit gross profit: Slight YoY growth projected based on results for second-half FY2023, when gross profit improvement measures began to generate impact
 - ✓ REPRICE: Inventory levels have been optimized. To improve per-unit gross profit, REPRICE will review its management accounting and adjust performance-linked compensation with reference to KATITAS. REPRICE will also aim to expand operating profit while focusing on improving gross profit through adjustments to renovation costs and reducing SG&A expenses through a sales approach that uses KATITAS as an intermediary.
- Inventories of newly built detached houses are expected to gradually reach optimal sizes over the second half of the year, and we also anticipate a decline in heavy discounting.
- Most buyers opt for variable rate mortgages, so impact from fluctuations in long-term interest rates is small. Even if short-term interest rates rise, the impact on KATITAS is neutral, as the increase in monthly payments is relatively small.
- The operating profit target in our mid-term business plan is an adjusted target that excludes impact from unfavorable rulings incurred through consumption tax-related litigation.
- Aiming to accelerate growth in FY2025 and subsequent accounting periods, we will concentrate on recruiting activities aimed at hiring a larger number of new graduates in April 2025.

Dividends

(Reposted from FY2023 4Q)

- For FY2023, we expect to pay a year-end dividend of ¥27.0 per share as originally planned.
- For FY2024, we expect to pay an interim dividend of ¥28.0 per share and a year-end dividend of ¥28.0 per share, for a total annual dividend of ¥56.0 per share. As stipulated in our third and current mid-term business plan, we aim to maintain a payout ratio of at least 40%, and the forecast reflect this objective.
- In addition, we believe that the current financial results with difference in consumption taxes, etc. included in SG&A expenses do not properly represent our actual performance. We determined the dividend amount based on "adjusted net income" excluding the effect of the difference in consumption taxes, etc. and a "payout ratio of at least 40%."
- In the event we receive a favorable ruling through consumption-tax related lawsuit in the future and therefore generate extraordinary profit, we will determine the dividend amounts based on a payout ratio target equivalent to at least 40% of adjusted net income exclusive of anticipated impact from this extraordinary profit.

		023 ch 31, 2024)	Forecast for FY2024 (ending March 31, 2025)

Third Mid-Term Business Plan (FY2022 – FY2024)

Initiatives for the Pre-Owned House Refurbishing Business

(Reposted from FY2023 4Q)

- Aim to supply over 10,000 houses per year in the future while maintaining or raising the quality and value of the houses we provide rather than being focused on rapid growth.
- Aim for Net sales and operating profit CAGR of 10% in the Third Mid-Term Business Plan period.
- ROA (an indicator of asset efficiency) will be an important management indicator to ensure that inventory turnover and operating margin can be improved or kept at a high level.

_	FY2021		FY2024	ļ.
(JPY MM)	Results		Plan	CAGR
Net sales	101,269	•••	134,000	10%
Adjusted Operating profit ⁽¹⁾	13,127	•••	17,500	10%
Adjusted ROA ^{(1),(2)}	22%	•••	20%	-
Dividend payout ratio ⁽¹⁾ (based on adjusted net profit)	37.8% (30.1%)	•••	40%	-

Priority measures

- 1. Conduct recruiting activities centered on new graduates and enhance various systems to continue to strengthen employee retention as well as train and foster personnel at the manager level and above.
- 2. Achieve productivity improvements by optimizing overall operations through BPR and considering system implementation.
- 3. Expand capacity to manage contractors and carpenters, who are our important partners in supplying houses.
- 4. Deliberate further on M&A possibilities to accelerate growth in existing businesses.

⁽¹⁾ For details on adjusted items, please see the Adjustment Item List on slide 10 and 14. (2) ROA = operating profit / average of total assets as of the beginning and end of period

⁽²⁾ NON = operating priority average or total assets as or the beginning and end or period.

Third Mid-Term Business Plan (FY2022 – FY2024)

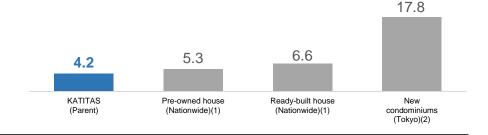

(Reposted from FY2023 4Q)

Sustainability Initiatives

- By expanding our pre-owned house renovation business, we will contribute to solving social problems such as vacant homes and the lack of affordable houses. Through business expansion, we will help solve social issues and contribute to realizing a sustainable society.
- Renovated pre-owned homes consume fewer resources and emits less CO2 than newly built homes. In the new mid-term period, we will further enhance our environmental initiatives including the improvement of insulation performance and reduction of CO2 emissions.

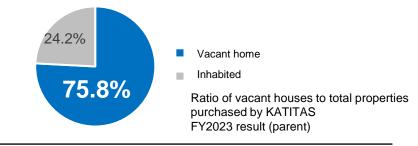

Ratio of mortgage to annual income

- ✓ Housing price "affordability" index
- ✓ Maintain at around 5x.
- Our properties are about half the price of newly built homes in the same area.
 We will continue to handle low-priced properties.

No. of properties sold

- √ Vacant housing problem solution index
- ✓ Aiming to increase proportionate to sales growth, and solve the problems of even more vacant houses.
- ✓ We mainly purchase vacant houses. This means thaat one house we purchase contributes to one less vacant house.

Environmental initiatives

- Improve product quality by considering renovation methods that balance higher insulation performance with cost control.
- ✓ Reduce CO2 emissions (scheduled to disclose reduction targets in disclosures based on the TCFD Framework)

Example of installing double-paned window

Example of installing insulation

Third Mid-Term Business Plan (FY2022 – FY2024) Financial Strategy and Shareholder Returns

(Reposted from FY2023 4Q)

- Place the highest priority on using the cash flow generated to invest in inventory for the growth of our existing business.
- Raise the dividend payout ratio to at least 40% during the Third Mid-Term Business Plan period to maintain ROE at robust levels. (Our policy is not to reduce the total annual dividend except under special circumstances.)
- Converted bank loans to unsecured bank loans in March 2022 in order to utilize debt with low cost of capital for M&A and other large investments.

⁽¹⁾ Operating CF before inventory investment = The amount after adding the change in inventory to operating CF

Growth Strategy at KATITAS (1): Enhance Sales Force (FY2023 Results)

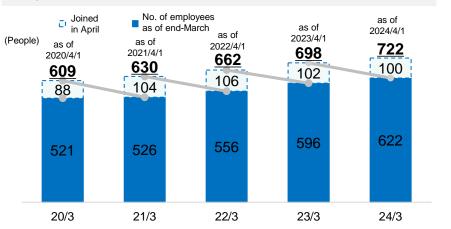

(Reposted from FY2023 4Q)

- There's ample supply of vacant houses in Japan and sufficient demand for low-priced houses. The potential market is sizable both for purchases and sales.
- KATITAS plans to expand through an increase in procured and sold homes by increasing sales staff headcount while maintaining and improving productivity.
- We expanded our capacity to train new graduate employees by continuing our recruitment efforts. We plan to hire a larger number of new graduates in April 2025.

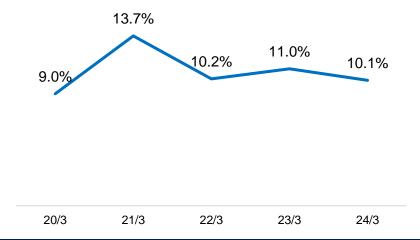

Number of sales staff

- ✓ As of April 1, 2024, our sales force had expanded 3.4% YoY.
- ✓ We continue to focus primarily on recruiting new graduates and recorded 100 new hires in April 2024.
- ✓ Under our next mid-term business plan, we plan to accelerate growth in our headcount. Accordingly, we plan to hire a larger number of new graduates 130 in April 2025.

Turnover rate⁽³⁾

- ✓ Our FY2023 turnover rate was 10.1%, on par with our 10% target. Various retention measures introduced over the past several years are generating positive impact.
- ✓ Maintained an "BBB or better" rating through employee engagement survey results.

⁽¹⁾ Number of sales staff = Number of store staff (incl. contract and part-time) + number of deputy sales managers and section managers

(4) Figures represent historical results of KATITAS (non-consolidated)

⁽²⁾ Earnings presentation materials from the fiscal year ended March 31, 2021, will include properties purchased at auction, retroactively applied in previous fiscal years.

⁽³⁾ Turnover rate = number of employees who resigned or retired during the fiscal year / number of employees at the beginning of the fiscal year

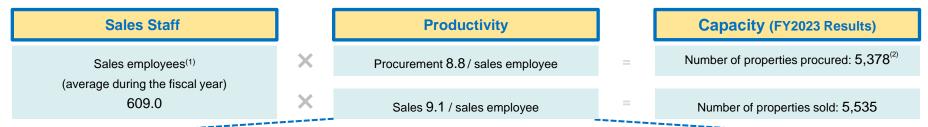

(Reposted from FY2023 4Q)

Growth Strategy at KATITAS (2): Productivity Improvement (FY2023 Results)

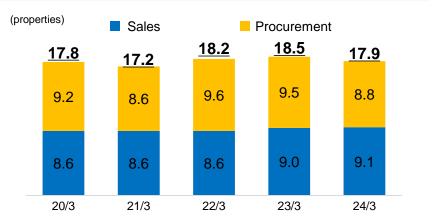

(Prime Market 8919)

- Our productivity is on an uptrend, except for FY2020, when purchases decreased as the number of vacant houses on sale shrank due to COVID-19.
- Sales productivity for FY2023 reached a record high. This result was achieved thanks in part to higher turnover generated through the introduction of low-priced products and the adoption of marketing automation tools.
- In FY2024, we will primarily aim to raise sales productivity through strengthening promotions and through improvements in customer traffic routes associated with our sales website.

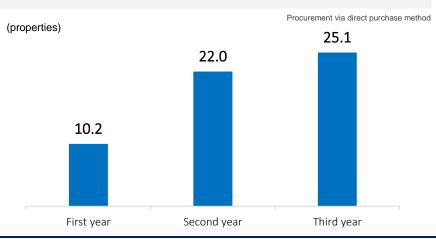

Productivity of sales staff(3)

- ✓ Sales staff productivity is improving due to growth in contracts for which renovations are underway (and also those sold in the present condition) and various operational enhancements.
- ✓ Purchasing productivity in FY2023 declined as we curtailed purchasing in the first-half.

Productivity of new graduate employees⁽⁴⁾

- ✓ By increasing the number of employees at store-manager level, we increased capacity for training and accelerated the time it takes until new employees start contributing to the business.
- ✓ Effective from FY2023, the target productivity of sales employees raised from 24 properties (purchased and sold) to 32 properties sold.

⁽¹⁾ Number of sales staff = Number of store staff (incl. contract and part-time) + number of deputy sales managers and section managers

20

⁽²⁾ Earnings presentation materials from the fiscal year ended March 31, 2021, will include properties purchased at auction, retroactively applied in previous fiscal years.

⁽³⁾ Productivity= sum of the number of homes purchased and the number of homes sold by KATITAS over a period, divided by the average of the number of sales employees of KATITAS at the beginning and end of the period (4) Average calculated from the results of the last three fiscal years (5) Figures represent historical results of KATITAS (non-consolidated)

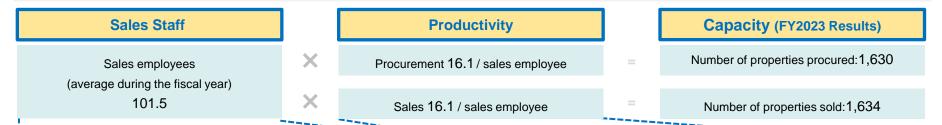

2.

Growth Strategy at REPRICE (FY2023 Results)

(Prime Market 8919)

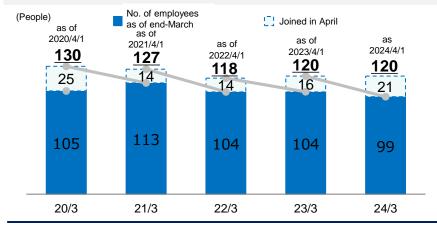

(Reposted from FY2023 4Q)

- Like KATITAS, we plan to drive growth at REPRICE by increasing sales staff and maintaining or raising productivity.
- Productivity decline observed in FY2023 was due to growth in competition stemming from price reductions for newly built houses.
- Key measures for FY2024 include (1) introduction of a compensation system based on profits generated through properties sold, (2) curtailment of renovation costs, and (3) sales utilizing KATITAS as a broker.

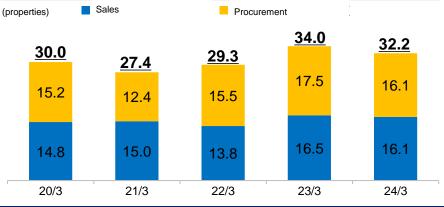

Number of sales staff

- ✓ Hired 21 new graduates in April 2024.
- ✓ In FY2020 and FY2021, we curbed hiring due to capacity issues. Growth in sales staff temporarily stalled due to the transfer of some staff to the sales support department.
- ✓ Changes in our compensation system will encourage our sales staff to adopt more profit-oriented approaches.

Productivity(1)

- ✓ COVID-19-related productivity decline was caused by constrained purchasing and a decrease in target properties available for purchase.
- Anticipate ongoing improvement backed by reinforced headquarters support and increased efficiency of system investments.
- ✓ In FY2024, primary productivity improvement measures will include sales utilizing KATITAS as an intermediary and through guided tours for customers by a broker and a REPRICE employee.

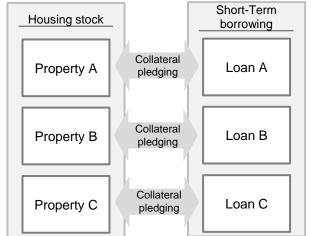

Established a flexible, unsecured funding structure, owing to improved creditworthiness

- Due to improved creditworthiness from financial institutions, we have been able to refinance our bank loans as unsecured loans. This refinancing has allowed us to reduce various costs, such as trust fees and administrative burdens associated with collateral pledging.
- We secure working capital through long-term borrowing and maintain a system that facilitates flexible purchase operations. In addition, we have established a commitment line of ¥8.0bn to address mid-year inventory fluctuations.

KATITAS Stable funding through long-term debt **Housing stock** Short-Term borrowing -All Japan **Commitment Line** -Regional cities ¥0 bn/¥8.0 bn -Small-sized properties **Property Property** Long-Term borrowing No collateral **Property** Property bullet repayment ¥18.5 bn pledging (Repayment deadline:2027/3) **Property** Property bullet repayment ¥8.0 bn **Property Property** (Repayment deadline:2028/11)

Borrowing by taking out individual short-term loans for each property

Strengths of funding structure UPDATE

- We are one of the few companies in the real estate industry to borrow long-term working capital on an unsecured basis by establishing good relationships with financial institutions. This is because we demonstrate high safety and profitability, with an equity ratio of 55.5%, current rate⁽¹⁾ of 210.1%, and ratio of fixed assets to long-term capital⁽²⁾ of 2.7%.
- Because of this unsecured funding, we no longer need administrative work associated with borrowing each time when making purchases, giving us greater flexibility when purchasing properties. We also don't need to pay trust fees or mortgage-related expenses when making purchases, thereby giving us a cost advantage.
- The inventory turnover ratio is 1.73/year indicating a fast inventory cash conversion rate. We use long-term debt to finance our operations and if we decide to halt our cash outflows (for real estate purchases, etc.) we can do so in about a month, meaning that it's not hard for us to increase our cash buffer level during times of sales deceleration.

Presentation Highlights

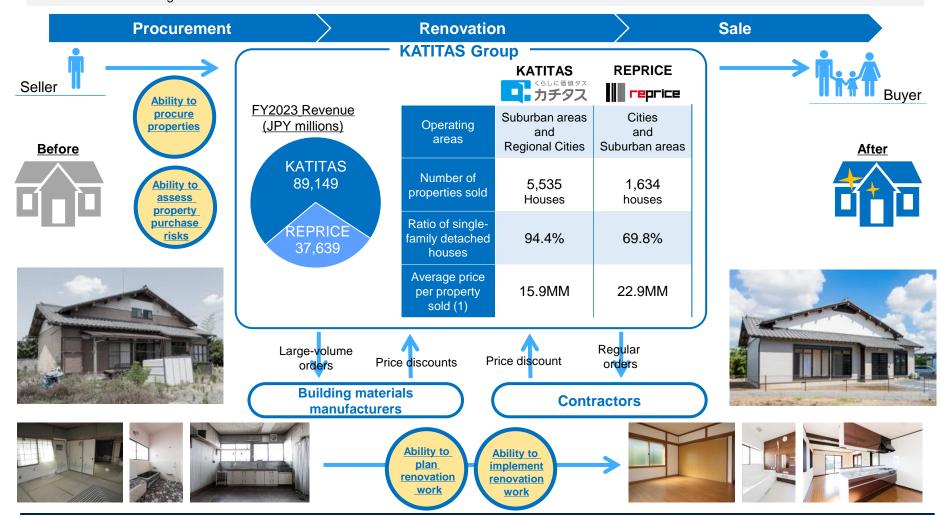

Overview of Financial Results for the First Nine Months of FY2024 (Ending March 31, 2025)	f the P3-P12
O Managara Dian (an EVOCA (English a Manala OA COCE)	D4.4 D00
2. Management Plan for FY2024 (Ending March 31, 2025)	P14-P22
3. Overview of Business Model	P24-P44
4. APPENDIX	P46-P58

Business Model of KATITAS

3.

- KATITAS purchases pre-owned detached houses in regional areas, and renovate them to accommodate today's living styles before selling them at half the price of newly built houses.
- About 80% of properties we purchase are empty, vacant houses. We create social value by resolving the issue of vacant houses and providing affordable housing.

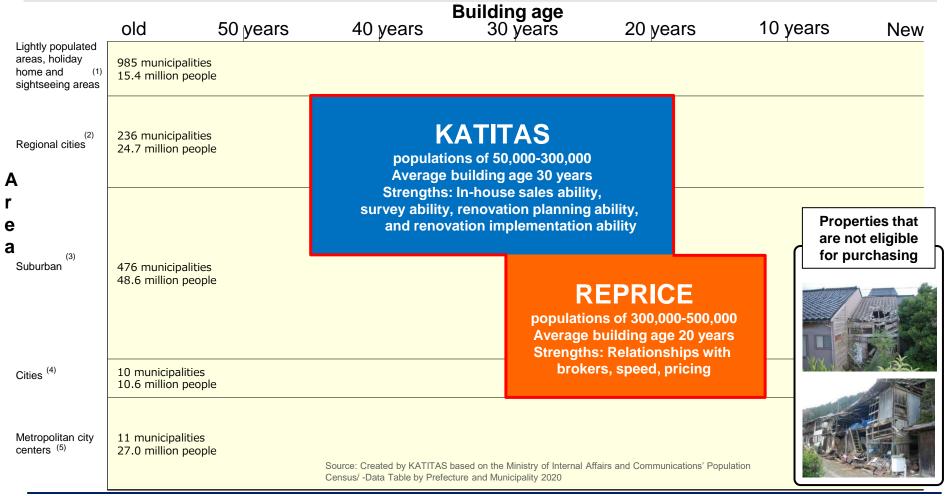

(1) Excluding tax 24

Business Development Areas and Building Ages of the Group

- KATITAS focuses on regional cities (population 50,000-300,000) and buildings with an average 30 years. It has strengths in in-house sales ability, survey ability, renovation planning ability, and renovation implementation ability.
- REPRICE focuses on urban and suburban areas (population 300,000-500,000) and buildings with an average 20 years. It has strengths in its broker network, speed, and pricing accuracy

⁽¹⁾ Lightly populated areas, holiday home and sightseeing areas: Municipalities with populations under 50,000 excluding areas within the three metropolitan areas

⁽²⁾ Regional cities: Municipalities with populations of 50,000-300,000 excluding areas within the three metropolitan areas

⁽³⁾ Suburban areas: Areas within three metropolitan areas excluding Tokyo 23 wards, ordinance-designated cities same as above and municipalities with populations of 300,000-500,000

⁽⁴⁾ Cities: Ordinance-designated cities outside the Tokyo 23 wards and three metropolitan areas (Sapporo-shi, Fukuoka-shi, Hiroshima-shi, Sendai-shi, Kitakyushu-shi, Njigata-shi, Kumamoto-shi, Okayama-shi, Shizuoka-shi)

(5) Metropolitan city centers: Tokyo 23 wards and ordinance-designated cities within three metropolitan areas (Sapporo-shi, Fukuoka-shi, Hiroshima-shi, Sendai-shi, Kitakyushu-shi, Njigata-shi, Kumamoto-shi, Okayama-shi, Solizuoka-shi)

Our Purpose: Bring as Much Joy as Possible to Towns and Cities"

We purchase, renovate, and re-sell vacant houses without buyers: This is how value ("Kati") is added ("tas") to houses that we sell.

- We purchase vacant and old houses that are unmarketable as-is. We then renovate them and make them marketable.
- We operate a value-added reselling business where we "add value (*kati tasu*)" to vacant houses that would otherwise have no value on its own.
- We consider this to be the "fourth option" in addition to newly built, pre-owned, and rental housing. And by offering these houses at reasonable prices, we help create better lives for customers.

Unaffordable
"Newly built houses"

3.

Old and nonrenovated "Pre-owned houses" "Rental houses" which do not meet demand

Value (kati)-added (tas) through renovation High-quality and reasonably priced "KATITAS houses"

Aiming to solve social issues through business: "Adding value (kati- tas)" to society

Supplying affordable housing	Despite slow-to-increase income levels in Japan, we supply decent housing at reasonable prices, which is in shortage.
Solving the social problem of vacant houses	We utilize the existing properties that are no longer in use in Japan where population is declining.
Revitalizing towns and cities	We contribute to stimulating regional economies through the utilization of vacant houses, orders to local construction companies, etc.
Realizing a circular economy	We reuse anything we can in our renovation work in order to save resources and reduce CO2 emissions.

Examples of Value-Added Properties (1): Appearance and Exterior Work (Prime Market 8919)

- Work on appearance is intended to improve endurance and make houses look more attractive
- Expansion of parking spaces is essential in Regional areas; decisions on procuring properties are made depending on whether such expansion is possible or not, and potential acquisition of adjacent land and scaling-down of the size of houses are examined

3.

Renovated one-story house: replaced the damaged eaves and refreshed the dilapidated exterior

House where porch tiles were replaced, a new exit door was installed and the exterior wall was clad with accent tiles

Removed the gate and front yard to create four parallel parking spaces that can comfortably accommodate visitors.

Examples of Value-Added Houses (2): Interior Work

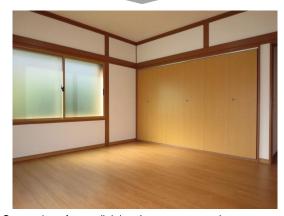

- Not only re-wallpapering and re-flooring, but also a willingness to make floor plan changes helps KATITAS' efforts to "create comfortable dwelling spaces"
- Renovation work is intended to erase traces of former owners completely, while selected parts of houses are left untouched in order to curb costs (and eventually, to rein in selling prices)

New look of an integrated LDK space with replaced flooring and wallpaper, after the floor plan with the living and dining rooms separated was altered by changing the location of the kitchen

Conversion of two adjoining Japanese rooms into two modern Western rooms, by installing a wall and replacing tatami mats with flooring, at a low cost achieved by using the original sash

Renovated entrance, by replacing the carpet with flooring, cladding the entrance foyer with new terracotta-style tiles and installing a new shoe closet

Examples of Value-Added Houses (3): Facilities Work

- New plumbing products are installed to improve usability and cleanliness
- Materials are purchased at lower prices through bulk purchases, which results in large-scale renovation work at about half the price paid in personally-requested renovation work

Newly-installed kitchen unit with a hanging cupboard, replacing the inconvenient unit used for more than 30 years and resulting in drastic improvement in both usability and appearance

A new modular bath system is installed in approx. 90% of houses purchased

A new multi-functional toilet is also installed in approx. 90% of houses purchased

A new washstand is installed in approx. 90% of houses purchased and many requests for locational change are met

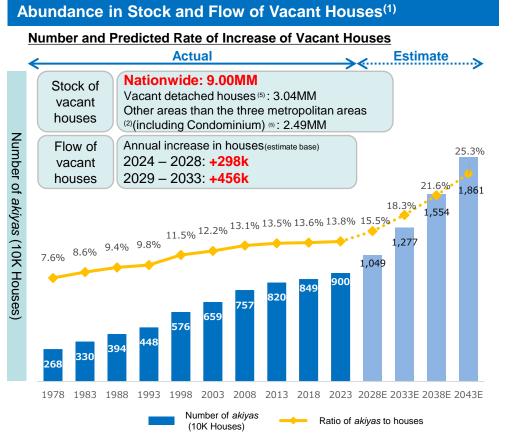

Room doors and other fittings are replaced and repaired as necessary

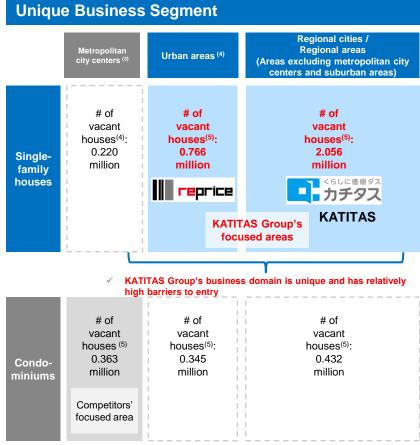

Medium and Long Term Expansion with Opportunities for **Procurement Based on Increased Supply of Vacant Houses**

- There is a large number of vacant houses and the number is expected to increase, which provides KATITAS with procurement opportunities
- Although a large majority of such vacant houses cannot be distributed in the housing market on an "as-is" basis, KATITAS is capable of acquiring such houses with a low level of competition

Source: Ministry of Internal Affairs and Communications, "2023 Housing and Land Survey Approximate Tabulation of Dwellings (Revised Report)" Estimates are prepared by KATITAS based on the news release. "New Housing Starts Expected to Fall to 580,000 in FY2040 and the Ratio of Vacant Houses Expected to Rise to Around 25% in 2043," (June 13, 2024) issued by Nomura Research Institute, Ltd

Source: Ministry of Internal Affairs and Communications, "2023 Housing and Land Survey (Revised Report)"

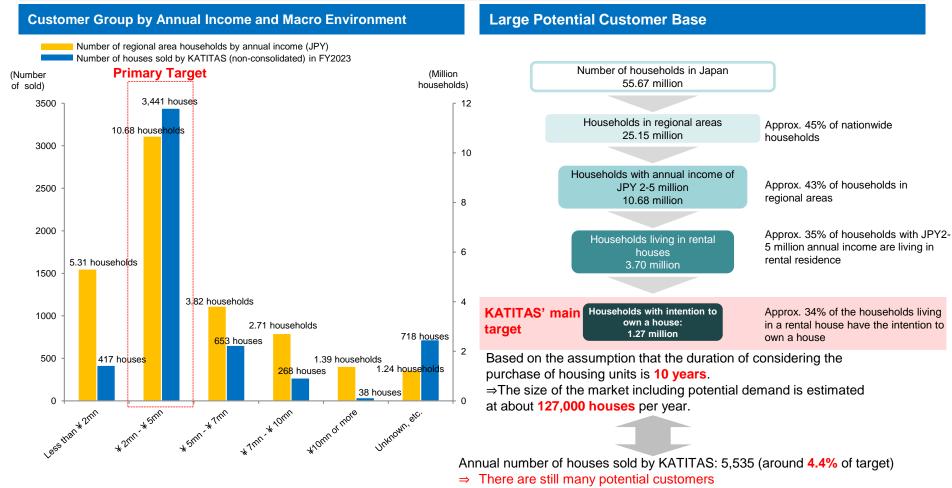

⁽²⁾ Three Metropolitan Areas (defined by the Ministry of Internal Affairs and Communications): Tokyo area (Saitama, Chiba, Kanagawa and Tokyo prefectures), Nagoya area (Gifu, Aichi and Mie prefectures) and Osaka area (Osaka, Hyogo, Nara and Kyoto prefectures).

Fourth Housing Option in Regional Areas: Pre-Owned and Renovated Single-Family Houses

- KATITAS' primary target customer base consists of approximately 1.27 million households currently living in rental houses in regional areas, with annual income of JPY2-5 million and the intention to own a house
- Based on the assumption that there is demand for 127,000 units if the duration of the abovementioned families considering the purchase of housing units is 10 years.
- The number of properties sold by KATITAS in FY2023 was 5,535, which is equivalent to around 4.4% of the estimated market and many potential customers still exist.

Offering High-Quality Renovated Houses at Reasonable Prices

- KATITAS is able to offer renovated houses at roughly half the price of comparable newly built houses, that also offer lower monthly mortgage payments compared to renting
- Customers can purchase a home with a mortgage within their means, in accordance with the growth of their children and other life stages.
- Mortgage repayments will not increase as much as newly built houses even if interest rates were to rise.

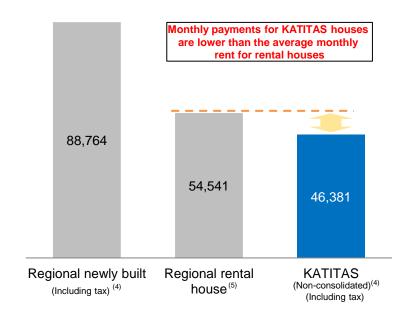

Less Expensive than the Average Selling Price of Newly Built Houses

3.

Regional newly built (Including tax) KATITAS house prices are approximately half of the market prices of newly built houses JPY⁽¹⁾ 31.4Million KATITAS (Non-consolidated) (Including tax)

Timing of transaction	From April 2023 to March 2024
Timing of construction	In January 2023 and after
Туре	Building lot (land and building)
Total floor area (m ²)	Between 50 and 200
Use of building	Housing

Lower Payments than Rental Houses(3)

Monthly repayment amount when mortgage interest rate rise

		Regional newly built	KATITAS
Mortgage interest rates	1.0%	¥ 88,764	¥ 46,381
	1.5%	¥ 96,279	¥ 50,308
	2.0%	¥ 104,165	¥ 54,428

(3) Monthly rent paid by households other than single-person households

⁽¹⁾ Average prices (including tax) of newly built houses are surveyed under the screening method described above, based on the

⁽³⁾ Mountiny ferring and by flouserious order than sangle-person induserious (4) Payment amounts for Regional newly built and KATITAS are calculated based on the premise assuming that a buyer pays the average sale price under a 35-year loan with no initial down payment or other incentive payments at fixed interact rate of 1.0% for the life of the loan (5) Source: Ministry of Internal Affairs and Communications, "2023 Housing and Land Survey (Revised Report)"

[&]quot;Integrated System of Land Information" operated by Ministry of Land, Infrastructure, Transport and Tourism
(2)The average sales price of KATITAS is calculated based on the sale price of properties constructed during the period between April
2023 and March 2024.

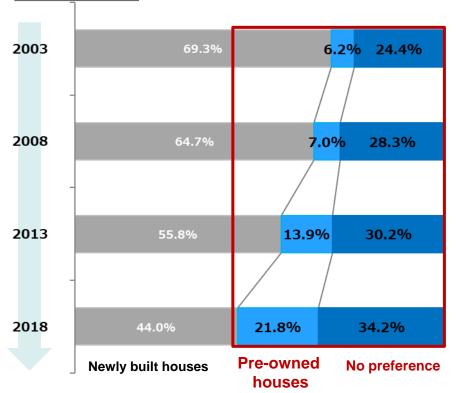

Consumer Preferences Have Shifted Toward Accepting Pre-Owned Houses

- Increasing number of households with less preference for newly built houses and increasing preference for pre-owned houses even in the Japanese market where traditionally people tend to prefer newly built houses
- There is huge potential for more pre-owned houses to be distributed in the market if we can supply enough properties that are "clean and inexpensive."
- The pre-owned housing market has been expanding in recent years and is expected to continue growing in the future.

Mindset Change toward Ownership of Pre-owned Houses

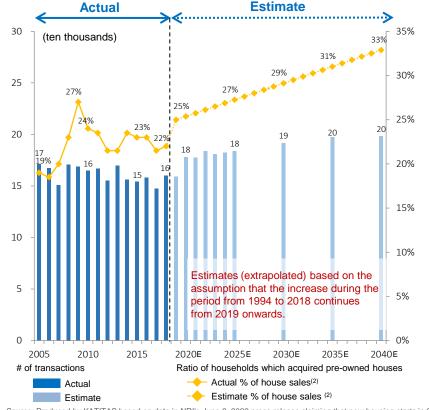

Survey of preference in moving to newly built or pre-owned houses from the current rental houses

Source: Housing Bureau of Ministry of Land, Infrastructure, Transport and Tourism, "Comprehensive Survey on Housing and Living Environments (2018)"

Increase in Transactions of Pre-owned Houses

Actual and estimated figures of transactions of pre-owned houses and ratio of households which acquired pre-owned houses from 2005 to 2018

Source: Produced by KATITAS based on data in NRI's June 9, 2022 press release claiming that new housing starts in 2040 are expected to decline to 490,000 units, while pre-owned houses in transactions will increase to 200,000 houses in 2040

⁽¹⁾ NRI estimates / forecasts based on Census, National Social Security and Population Research Institute "Forecast of number of Japan's households", Ministry of Internal Affairs and Communications, "Housing and Land Survey", and NRI Questionnaire on housing purchasers (2) Questionnaire by NRI: Ratio of households which acquired pre-owned houses (excluding newly built houses) out of households which acquired a house

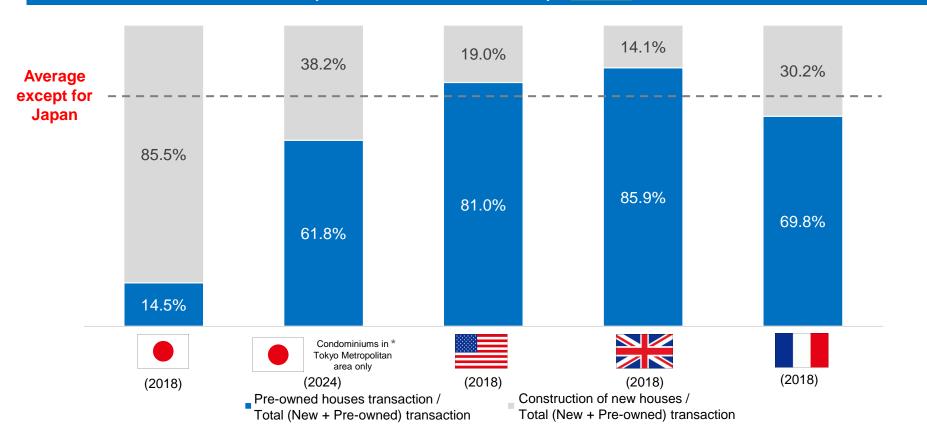

Room for Growth in the Share of Regional Pre-owned Houses in Distribution

- Lower market share of pre-owned houses compared with United States and Europe
- In the Tokyo Metropolitan area, there are many "clean and inexpensive" used condominiums being supplied that their distribution volume has already surpassed that of new condominiums.
- By supplying "clean and inexpensive" detached houses in rural areas, we have a chance of capturing the untapped market for pre-owned houses.

*Ratio of pre-owned condominium units under contract to new condominium units on the market.

The Company's Customer Profile

	Customer profile
Business area	Suburban areas surrounding regional cities (Targeting regions with populations of 50,000 – 300,000)
Properties handled	Mainly pre-owned single-family <u>detached houses</u> which have become vacant due to events such as inheritance
Average selling price	JPY 16.4 million (including tax)
Buyers' needs	Actual demand (our customers purchase the properties to live in rather than for investment)
Buyers' age range	30s-50s (67.6% of the Company's sales results)
Buyers' annual income	JPY 2-5 million (62.2% of the Company's sales results) (home loan to annual income ratio is 4.2) * Households with annual incomes between JPY 2-5 million are the largest volume zones in rural areas, excluding the three major cities.
Type of buyers' loan	<u>Mortgage</u>
Financial institutions with loan transactions	Nationwide regional banks, shinkin banks, credit associations and labor banks, etc.
Source of loan payments	Buyer's flow income

⁽¹⁾ Figures for average selling price, buyers' age range, and buyers' annual income are from cumulative results for the fiscal year ended March 31, 2024.

⁽²⁾ Home loan to annual income ratio = selling price (including tax) / annual income

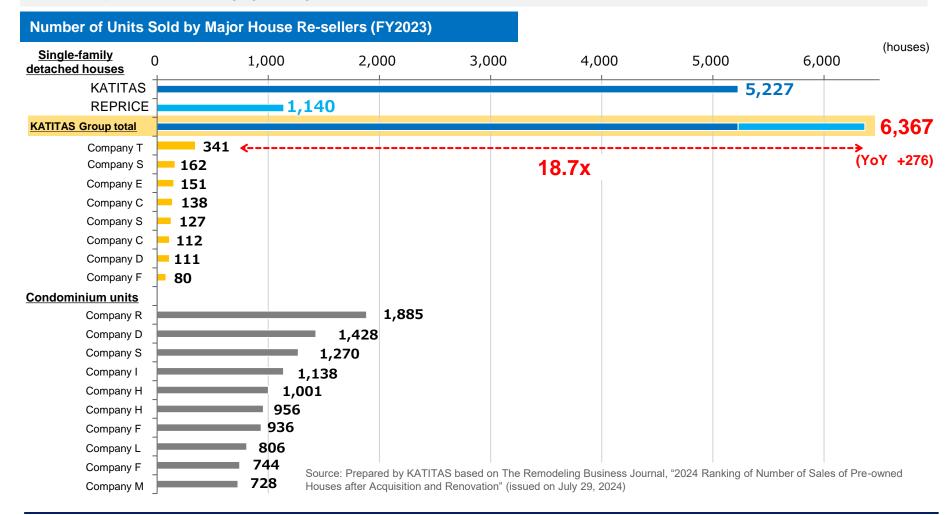

Number of Houses Sold is Over 10 Times that of No.2 Ranked Company

■ No.1 among House Reselling Businesses⁽¹⁾ in terms of number of units sold

3.

■ Established unique positioning by focusing on pre-owned single-family detached houses located in regional cities and Regional areas that competitors find challenging to bring to the market

⁽¹⁾ A "Housing Reselling Business" is defined as one conducted by certified "building lot and transactions" dealers with extensive know-how in renovation so as to efficiently and effectively improve the quality of existing house inventory (Requests for FY2016 Tax Reform (Special Measures Concerning Taxation))

- Our Greatest Strength is the Know-How We Accumulated by Selling a Cumulative Total of 70,000 Houses. We Approach Even the Tedious Details with Persistent Care, While Managing Risks to Minimize Failures.
- KATITAS has accumulated a stock of "failure cases" through purchasing and selling more than 70,000 houses. These cases frequently occur as a result of errors made at the time of purchasing. Failure cases are shared with branches nationwide on a weekly basis.
- Before purchasing, in addition to clarifying the boundaries with adjacent land, KATITAS conducts "three-party on-site meetings" with the renovation contractor and termite exterminator. The three parties will check the entire house to ascertain whether the building has deterioration in the frame, or a history of roof leakage.
- KATITAS will also carry out extensive inspections both during renovation and at the time of completion, in order to minimize failures and problems that may occur after the property has been delivered.

Examples of Pre-purchase Inspections: Inspections concerning Three Major Risks Associated with Older Detached Houses

Termite Risk

3.

The termite exterminator performs an inspection of the underfloor space looking for evidence of termite damage. This avoids unexpected renovation costs, and reduces the risk of procuring a property that is difficult to renovate

Rain Leakage Risk

The renovation contractor will check the entire frame of the building including the roof space looking for evidence of roof leaks and pests. These inspections increase the accuracy of renovation cost estimates.

Risks Associated with Property Rights

A land survey is conducted on every project. This provides comfort to the buyer. Land surveys are unnecessary for preowned condominiums.

Examples of cases which required major repair after purchasing or after sale

Unstable foundations were discovered after purchasing. This needed to be repaired before sale which led to additional costs.

Case in which subsidence under the floor was discovered after purchasing. A major rebuilding of the foundation was necessary.

Case in which the roof leaked after sale. A full repair was carried out under the warranty against defects.

Case in which deterioration in roof materials was noticed after sale. As a partial repair was not possible, the entire roof had to be replaced.

- ◆ KATITAS regards these failure cases as the "assets of the company,". They are shared with the entire company on a weekly basis to prevent recurrences (= minimize risk)
- Nevertheless, unsaleable properties are occasionally procured due to unexpected defects.

Entry Barrier

Barriers to Entry and Competitive Advantages of Our Business Model: (Prime Mar Economies of Scale Do Not Apply Because Renovations Vary From One House to Another

Individual property characteristics

Property conditions are extremely varied

Even with properties built by the same home builder, the deterioration of properties differs based on the location and maintenance.

Economies of scale do not apply

In addition to the individual characteristics of the homes themselves, extreme differences in the levels of deterioration make standardized reforms difficult, and economies of scale do not easily apply.

Regional characteristics

Lifestyles by region

Lifestyles differ throughout Japan with its heavy snowfall regions and hot and humid regions, meaning thorough regional knowledge is required to respond to customer needs.

Differing business environments

The presence of competition as well as the number and level of partner companies such as contractors and other licensed professionals differ by region.

We will create our own unique positioning by properly managing the balance between "standardization" and "individual solutions"

Standardization policies

Preparation and weekly updates of manuals

~Organize individual work processes including purchasing, reforms, and sales in detail.

Create manuals for renovation contractors as well.

Standardization of knowledge

 \sim Collect information on good knowledge and bad knowledge through weekly business condition reports.

Standardize and disseminate solution methods to workplaces through weekly company-wide morning video conferences.

Checking system at headquarters

~Check the contents of contracts and reforms at headquarters from a third-party perspective.

Individual solutions policies

Sales staff oversees every phase of the business flow

 \sim By overseeing every phase from the property acquisition to reform plans to sales, the sales staff takes responsibility for everything from property quality to customer support.

• Hire personnel with ties to each region throughout Japan

~Hire "exceptional students wishing to work for the region" at local universities and establish positioning as a company that works for the region.

Compensation system not reliant on results

~Compensation system based on fixed salaries to allow employees to work for a long time and accumulate the benefits of experience.

- Accumulate "experiences of success and failure" based on the results of more than 70,000 properties
- By focusing on regional cities and the middle-income range, we will build a platform that, unlike metropolitan city center and high-end markets, is resistant to market conditions
- Detailed management by a management class with diverse backgrounds

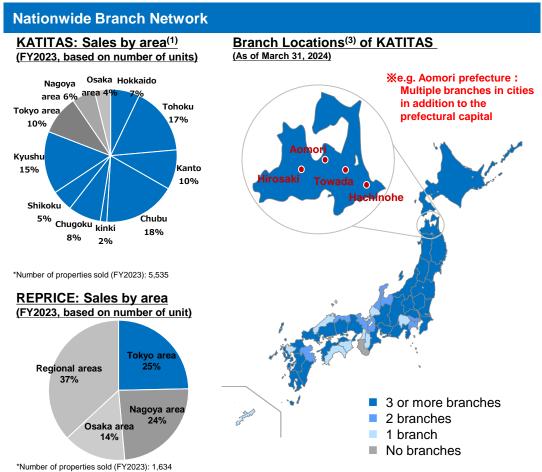

Nationwide Branch Network and High Brand Recognition

- KATITAS maximizes purchasing and sales opportunities by covering geographic areas not or rarely accessed by competitors, including small- and medium-sized cities with populations between 50,000-300,000
- KATITAS has No.1 brand recognition in regional areas

*"Regional areas" are other areas than the "three metropolitan areas"(2)

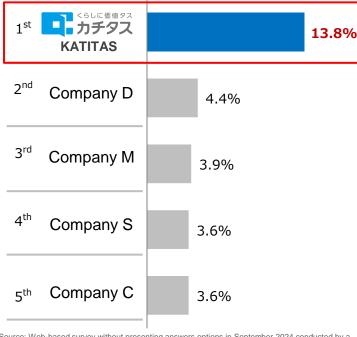

Hyogo prefectures (where no TV commercials were aired)

High Brand Recognition in Regional Areas UPDATE

Survey on Brand Recognition⁽⁴⁾

Q. "Which company comes to mind if you are asked about a company to which one could sell a house?"

Source: Web-based survey without presenting answers options in September 2024 conducted by a third-party research firm requested by KATITAS. The number of samples of each survey was 1,100. 10 prefectures were selected as target survey areas and the surveys were conducted in rotation. The above chart shows aggregated results of prefectures where KATITAS TV commercials were aired

Tohoku: Aomori, Iwate, Miyagi, Akita, Yamagata and Fukushima prefectures. Kanto: Ibaraki, Tochigi and Gunma Prefectures. Chubu: Niigata, Toyama, Ishikawa, Fukui, Yamanashi, Nagano and Shizuoka prefectures. Kinki: Shiga and Wakayama prefectures. Chugoku: Tottori, Shimane, Okayama, Hiroshima and Yamaguchi prefectures. Shikoku: Tokushima, Kagawa, Ehime and Kochi prefectures. Kyushu: Fukuoka, Saga, Nagasaki, Kumamoto, Oita, Miyazaki, Kagoshima and Okinawa prefectures. (2) Three Metropolitan Areas (defined by the Ministry of Internal Affairs and Communications): Tokyo area (Saitama, Chiba, Kanagawa and Tokyo prefectures), Nagoya area (Gifu, Aichi and Mie prefectures) and Osaka area (Osaka, Hyogo, Nara and Kyoto prefectures)

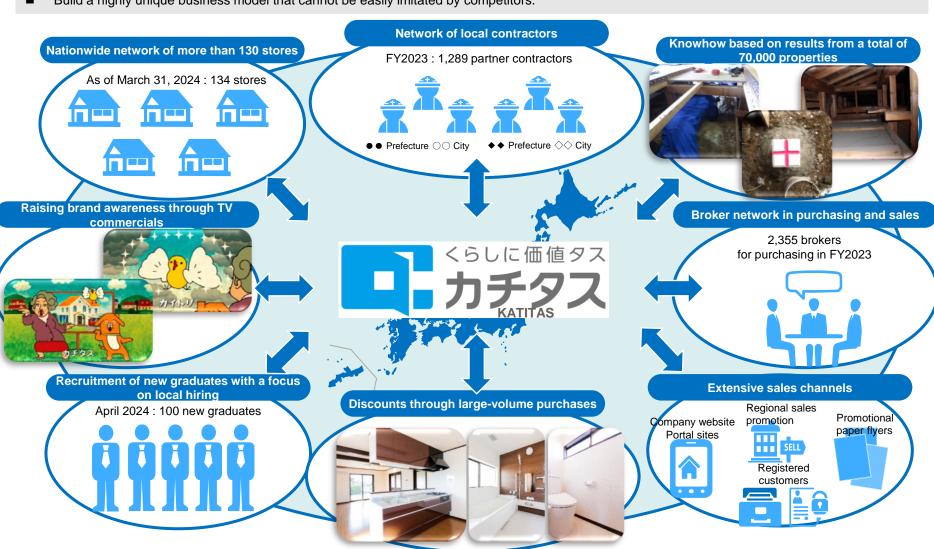

⁽³⁾ Branch list is explained in detail on P.48 (4) Surveyed areas in September 2024 were Hokkaido, Aomori, Iwate, Ishikawa, Tottori, Shirmane, Kochi, Kumamoto, Kagoshirma prefectures (where TV commercials were aired. Tottori and Shirmane prefectures are counted as one prefecture due to their overlapping broadcast coverage), as well as Tochigi and

Our Advantage Over Competitors is an Organic and Integrated Ecosystem

- The strength of KATITAS' business model is as a strong, organically integrated collective, and not in individual, exceptional strengths.
- Build a highly unique business model that cannot be easily imitated by competitors.

3.

KATITAS' Advantages in Supplying High-Quality Renovated Homes at Reasonable Prices

- Track record of dealing over 70,000 pre-owned single-family homes, leading to accumulation of know-how (Management of failure)
- Conducting efficient procurement and renovation by utilizing organized third parties such as builders and intermediaries
- Advantage in ability to procure vacant pre-owned homes that competitors are unable to acquire, utilizing our ability to judge, procure, plan and renovate

Accumulated Knowhow based on Track Record

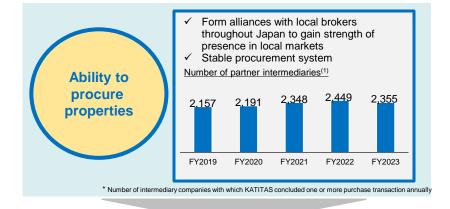

Ability to assess property purchase risks

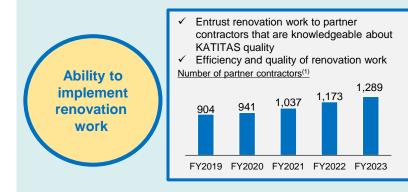

- ✓ Careful inspection and leverage track record to knowledgeably assess properties that on face might seem too risky for competitors to procure
- Purchase price determined with strong awareness of expected renovation costs and likely selling price

Ability to plan renovation work

- Exploit renovation know-how to meet customer needs with a reasonable selling price
- Plan renovation to make purchased properties sellable, by addressing region specific needs
- ✓ Awarded by the Ministry of Economy, Trade and Industry as an Innovative Renovation Company in 2015⁽²⁾

Well-organized Third Parties

⁽¹⁾ The number of contractors and intermediary companies are on a non-consolidated basis

⁽²⁾ Starting in 2014, METI has been granting annual awards to companies that address a variety of needs of consumers with the strengths of their unique business models

KATITAS' ESG and SDGs: Contributing to Acquisition of Affordable Housing for Low- and Middle-Income Households

1 NO POVERTY

There are 9.00 million vacant houses nationwide, a large social problem

17 PARTIMERSHIPS FOR THE GOALS

Renovation contractors

Creating employment

University students wishing to work for the community

Vacant houses spoil the landscape and create concern over public safety

Resolving the vacant house issue by renovating and distributing vacant houses

Affordable houses for people with annual household

newly

built

KATITAS' ESG and SDGs : Company Where Female Employees Can Take an Active Role

- KATITAS actively recruits and promotes women because operations to purchase houses and to remodel them are ones in which women can take an active role.
- KATITAS contributes to the revitalization of local regions through the creation of job opportunities for women, which is an issue in local regions and the suburbs where the Company operates.
- In June 2020, KATITAS was selected as a new constituent of the MSCI Japan Empowering Women Select Index.

Annual sales ranking of sales employees (FY2023 results)

50% (10) of the company's top-ranking sales personnel were women

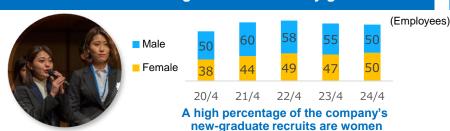

Female employee ratio: 39.9% (As of April 2024)

Many women interested in renovations and housing

Breakdown of new-graduate recruits by gender

Percentage of female managers(As of April 2024)

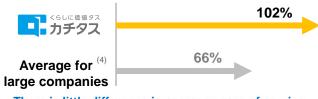

KATITAS also has a high percentage of women in managerial positions*1

Ratio of women and men in terms of average years of service (As of March 31, 2024) (3)

There is little difference in average years of service between men and women.

Selected as a new constituent of the MSCI Japan Empowering Women Select Index

Company Summary

Name	KATITAS Co., Ltd.	
Date of Establishment	September 1, 1978	
Representative	Katsutoshi Arai, President and CEO	
Fiscal Year-End	March 31	
Capitalization	JPY 3,778,871,000	
Number of outstanding shares	78,650,640 shares	
Listed Stock Market	TSE Prime Market (Securities Code: 8919)	
Headquarters	4-2 Mihara-cho, Kiryu-shi, Gunma	
Tokyo office	PMO Hatchobori Shinkawa Bld., 2-9-11, Shinkawa, Chuo-ku, Tokyo	
MSI Management Center	3-12 Kotohira-cho, Kiryu-shi, Gunma	
Subsidiary	REPRICE Co., Ltd.	

Name	REPRICE Co., Ltd.	
Date of Establishment	June 19, 1996	
Representative	Katsutoshi Arai, chairman and executive director Takayuki Ushijima, President	
Fiscal Year-End	March 31	
Capitalization	JPY 75,000,000	
Headquarters	NF Bld., 1-9-16, Sakae, Naka-ku, Nagoya-shi, Aichi	
Parent company	KATITAS Co., Ltd.	

History

Date	Event
Sep. 1978	Established as Yasuragi Co., Ltd., in Kiryu, Gunma Prefecture with ¥10 million in capital to conduct the stone quarrying business
Dec. 1988	Acquired a real estate brokerage license and started the real estate sales and agency business
Aug. 1998	In line with the revised Civil Execution Act, established a business model of purchasing real estate at property auctions and selling refurbished properties
Mar. 1999	Opened the Takasaki Branch (later opened more regional branches, reaching a total of 134 as of March 31, 2024)
Feb. 2004	Listed on the Centrex Market of the Nagoya Stock Exchange
Mar. 2012	Tender offer for the Company's shares by Advantage Partners Inc., a private-equity fund
Jul. 2012	Delisted from the Centrex Market of the Nagoya Stock Exchange
Jul. 2013	Changed company name to KATITAS Co., Ltd.
Feb. 2016	Received the METI Minister Award for "Advanced Rehabilitation Remodeler" from the Ministry of Economy, Trade and Infrastructure
Mar. 2016	Acquired all shares of REPRICE Co., Ltd. (now a consolidated subsidiary)
Apr. 2017	Formed a capital and business alliance with Nitori Holdings Co., Ltd.
Oct. 2017	Received the 17th Porter Prize (sponsored by the School of International Corporate Strategy, Hitotsubashi University Business School)
Dec. 2017	Listed on the First Section of the Tokyo Stock Exchange
Mar. 2020	Due to stable growth post-listing, achieved consolidated operating profit of ¥10.0 billion
May. 2021	Cumulative number of homes sold by REPRICE surpasses 10,000
Apr. 2022	Listed on the Prime Market of the Tokyo Stock Exchange
May. 2023	Cumulative number of homes sold by KATITAS surpasses 70,000

- Suburban areas surrounding regional cities across Japan

(Ref)Shift from Auction Procurement to Direct Purchases (FY2016 Results)

 Shift from procurement by auction to direct purchase has enabled us to alleviate difficulty in procurement, minimize price competition, reduce inventory turnover period, and minimize quality risk

	Residential properties procured mainly through auction	Residential properties procured mainly through direct purchase
Targeted portfolios	 ✓ Residential properties subject to auction due to owners' inability to repay housing loans, etc. ✓ Sold through courts 	Residential properties purchased from house owners directly or through housing brokers
Difficulty in procurement	 ✓ Anyone can participate in auction process ✓ Purchasing team is not required for negotiations with house owners → Entry barrier: Low	 ✓ Purchasing requires relationships with residential brokers and brand power ✓ Proposals and negotiations with house owners are required for sale (a strong purchasing team is essential) → Entry barrier: High
	→ Entry barrier: Low	→ Entry parrier: High
Price competition	 ✓ Supply volume is unstable and sensitive to economic circumstances ✓ Many participants in the market spurs price competition 	 Stable supply volume backed by events such as inheritance and relocation of residence Negotiation-based transactions are less likely to cause price competition
	\rightarrow Gross margin ratio ⁽²⁾ : Low (20.1% ⁽¹⁾)	→ Gross margin ratio ⁽²⁾ : High (25.7% ⁽¹⁾)
Inventory period	✓ Longer time for properties to be delivered after a successful bid	✓ Properties can be delivered shortly after purchase, which enables us to commence renovations promptly
	→ Inventory period ⁽³⁾ : Long (340 days ⁽¹⁾)	→ Inventory period ⁽³⁾ : Short (177 days ⁽¹⁾)
Quality risk	✓ Preliminary inspection of properties prior to a bidding is not possible	 Preliminary inspection of properties prior to purchase is possible
	→ Risk related to quality of residence: High	→ Risk related to quality of residence: Low

⁽¹⁾ Figures in brackets represent historical results of KATITAS on a non-consolidated basis (averages with respect to properties procured through auctions or direct purchases (FY2017/3))

⁽²⁾ Gross margin ratio (Management accounting base): Gross profit ÷ Net sales

⁽³⁾ Inventory period: Simple average number of days from the date procured to the date sold of each property

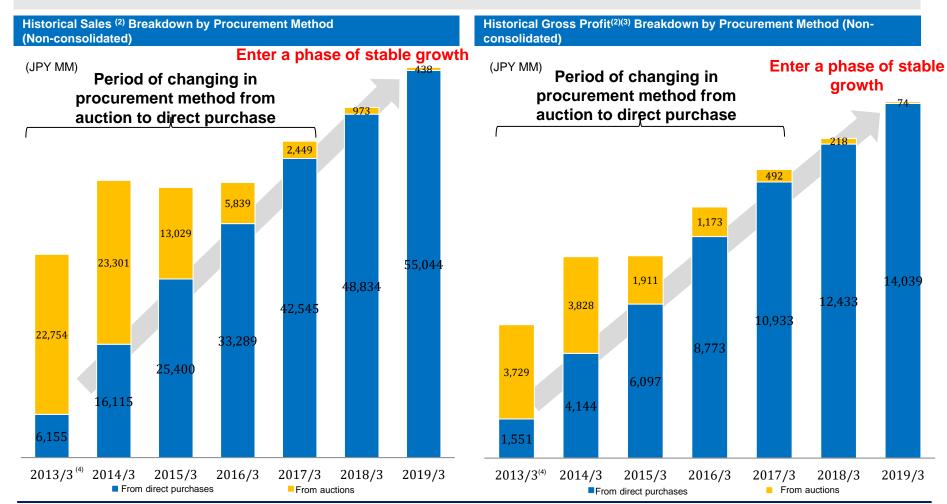

4.

Increased Ratio of Properties Procured Through Direct Purchases as Compared to Auction Purchases Contributed to Rapid Growth in Sales and Gross Profit

(Prime Market 8919)

(Reposted from 4Q FY2018)

- KATITAS has largely shifted its property procurement method from auctions to direct purchases.⁽¹⁾ This drastic reform increased gross profit
- From the fiscal year ended March 31, 2018, KATITAS is likely to enter a phase of stable growth of around 10% annually

⁽¹⁾ Please refer to P.49 regarding the comparison between procurement through auctions and direct purchases

⁽²⁾ Sales and gross profit are based on managerial accounting

⁽³⁾ Gross profit from sales attributed to homes procured through auction and direct purchases is based on the procurement costs and renovation costs of the homes before appraisal loss, loss from lower-of-cost-or-market valuation, impairment loss and other minor adjustments (4) During the fiscal year ended March 31, 2013 covers the approximately 14-month period from January 21, 2012 until March 31, 2013

Merger and Synergies with REPRICE

(Reposted from FY2023 4Q)

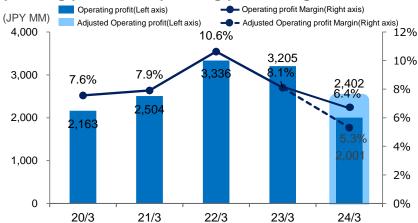

- In March 2016, we conducted a merger with REPRICE by acquiring 100% of its shares and thereby removed funding constraints, which was the biggest hindrance to REPRICE's growth.
- We injected our know-how to REPRICE and have effectively switched their purchase strategy from auction to direct purchase and shifted property types from condominiums to detached houses.
- Both sales and operating profit have increased since the merger. Unlike KATITAS' operations which are centered around rural areas, REPRICE's operations are in the suburbs of the three major metropolitan areas where there are competitors.

Sales and number of properties sold Sales (Left axis) (JPY MM) Number of Homes Sold 2,000 45.000 (Right axis) 1,718 1,634 1.630 40,000 1.496 1.493 35.000 1,500 30,000 25,000 1,000 20,000 39,57 37.639 31,670 31,37 15,000 28.59 500 10.000 5,000 0 20/3 21/3 22/3 23/3 24/3

Operating profit and operating profit margin

Number of sales by detached houses/condominiums

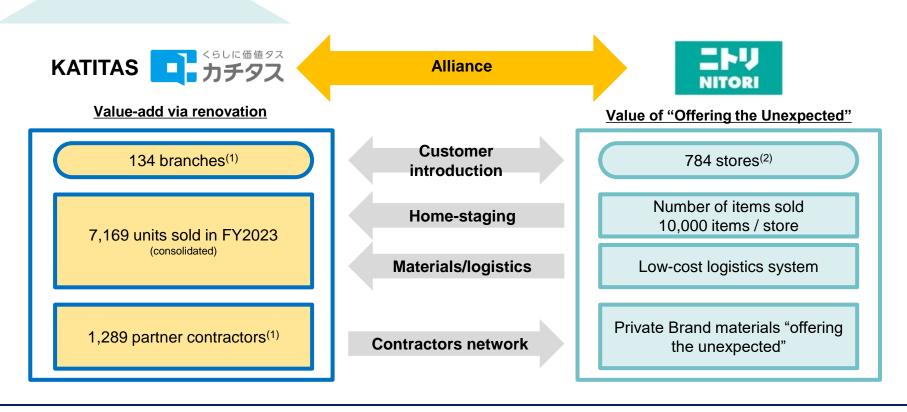

Alliance with Nitori Holdings (Announced on April 28, 2017)

- Advantage Partners transferred 34% of KATITAS' shares to Nitori Holdings for JPY23,300 MM
- KATITAS and Nitori entered into an alliance that aims to utilize their respective strengths to provide enriched and more comfortable living environments to their customers

Expected Synergies

From House Re-seller to Lifestyle Provider

⁽¹⁾ As of March 31, 2024

Progress of Alliance-based Operations(1/2)

- Pre-owned houses fitted with Nitori furniture and interior items not only convey a more concrete image of the post-move lifestyle and living space to those considering purchasing, but also have the advantage to the purchaser of incorporating the expense into the home loan, so that there is no burden associated with the new lifestyle.
- Buyers of KATITAS Group properties will receive two coupons that multiply reward points received through purchases at NITORI by five.

Sales Service

Offering and selling pre-owned houses fitted with Nitori furniture and interior items

Sales Service

Issuing coupons that can be used for purchases of Nitori products

Coupons provided to buyers upon conclusion of property contracts and upon delivery

Website banner announcing that coupons will be given

Progress of Alliance-based Operations(2/2)

- "VHS (Virtual Home Staging)" virtually installs Nitori furniture in KATITAS properties.
- This can be implemented more easily in terms of cost and furniture delivery logistics than showing a "furnished house".
- VHS increases the success rate, so using VHS before revising prices helps to curtail price reductions.

Unique Business Model to Add Value to Vacant Houses

- KATITAS adds value to under-valued vacant houses by renovating them for re-sale
- KATITAS' unique business model and its efforts to solve problems related to vacant houses in regional areas are highly regarded by external parties, as represented by the award given by the Ministry of Economy, Trade and Industry and the Porter Prize

Awarded by the Ministry of Economy, Trade and Industry as an Innovative Renovation Company in FY2015⁽¹⁾

- Contribution made through purchasing/reselling pre-owned houses with a focus on regional single-family houses. Developed a framework to enhance customer satisfaction by minimizing renovation costs
- As an industry leader, not only tackling the empty house problem but also established its own construction quality standard which contributes to the soundness of the industry

Porter Prize in FY2017

The reasons awards were received can be viewed through the following URL or by double-clicking on the above icon.

http://katitas.jp/information/ir/file/2017porter prize Eng.pdf

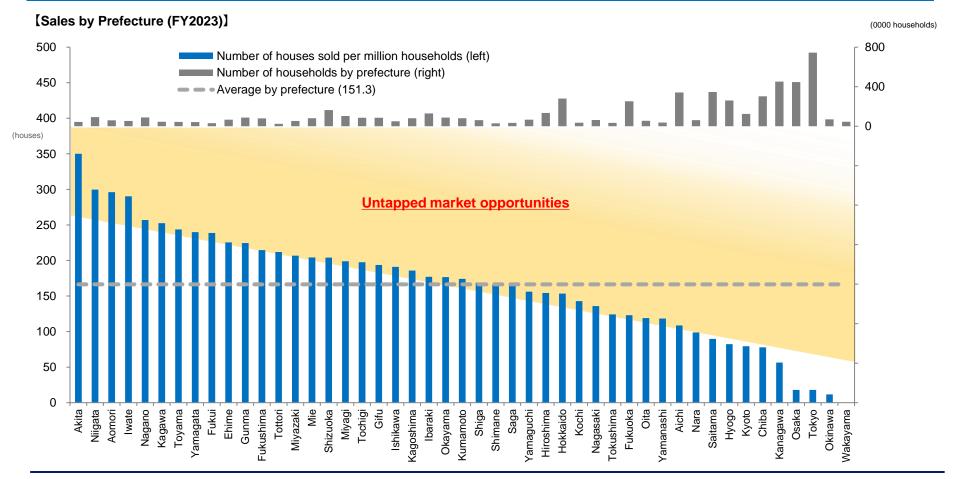

- The prize is intended to recognize outstanding Japanese companies that implement excellent competitive strategies
- The prize bestows recognition on Japanese companies that have <u>achieved and</u> <u>maintained superior profitability</u> by implementing <u>unique strategies</u> based on innovations in products, processes, and ways of managing
- Reason for the award; (1) KATITAS renovates pre-owned houses in regional areas and sells them at price levels that make mortgage payments competitive with renting. (2) KATITAS continues its growth by providing high quality houses in regional areas where population is decreasing with limited supply of newly built houses

Untapped Market Opportunities

- Rural areas where the population is declining are more likely to see power builders* and new homebuilders pull out. Hence, the more rural a region is, the more attention our homes are getting.
- Prospective homebuyers in rural areas tend to have a lower income than those in the three major metropolitan areas, making it difficult for them to purchase expensive new homes.

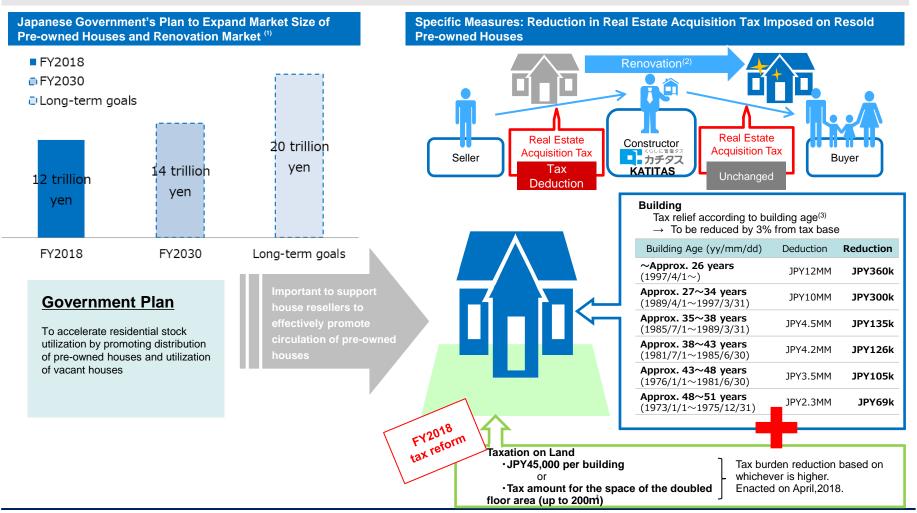

Gap in Market Share by Region

Market Revitalization Backed by Governmental Policies

- The Government of Japan is making efforts to build a society in which real estate stock is efficiently used by expanding the market of preowned houses and renovation projects, with an aim to solve problems related to the rapidly proliferating number of vacant houses
- Specifically, reduction in the real estate acquisition tax has decreased procurement costs (on a scaled basis according to building age)

Trends in Land Prices - Regional Areas vs Three Metropolitan Areas

- As land prices in regional areas fluctuate based on actual demand, the level of volatility is lower than that in urban areas.
- In addition, with the trend of stable and low land prices, fluctuations in land prices have a limited influence on prices of residential properties in regional areas.
- As a result, buying and re-selling residential properties in regional areas is less subject to market volatility.

Trends in land prices of residential districts in regional areas, compared to the previous year

Throughout this presentation, unless otherwise specified, FY refers to the fiscal year ended March 31 of the following year (for example, FY2020 refers to the fiscal year ended March 31, 2021).

In this presentation, unless otherwise specified, references to our "homes" include single-family detached houses and condominium units that KATITAS acquires, renovates and resells as part of its business. Data presented for "homes" is on a gross basis, excluding home returns.

This is a partial English translations of the original Japanese version prepared only for the convenience of shareholders residing outside Japan. Should there be any inconsistency between the translation and the official Japanese text, the latter shall prevail.

On March 30, 2016, KATITAS completed the acquisition of REPRICE Co., Ltd. ("REPRICE") and its two wholly owned subsidiaries (Comprehensive Urban Development Corporation and Arctive Co., Ltd.), and REPRICE became a wholly owned subsidiary of KATITAS as of the same date. Because the date of the acquisition of REPRICE was deemed to be March 31, 2016 for accounting purposes, the consolidated balance sheet of KATITAS as of March 31, 2016 reflects the consolidation of REPRICE but the consolidated results of operations of REPRICE for the period from March 30, 2016 to March 31, 2016 are not reflected in KATITAS' consolidated statements of income, comprehensive income, changes in equity and cash flows for the fiscal year ended March 31, 2016. On September 2, 2016, KATITAS sold all of the shares of Comprehensive Urban Development Corporation, and on September 30, 2016, KATITAS sold all of the shares of Arctive Co., Ltd. to third parties. Due to the consolidation of the results of operations of REPRICE and its subsidiaries in KATITAS' results of operations for the fiscal year ended March 31, 2017, KATITAS' results of operations for that fiscal year are not directly comparable to the results of operations for prior fiscal years. Further, prior to the completion of the acquisition of REPRICE on March 30, 2016, KATITAS did not have any subsidiaries.
