^{*} The average occupancy period is rounded to the first decimal place.

^{* &}quot;All" includes retail and office and excludes vacant units.

Building a Portfolio That Responds to Various Fluctuation Risks

Characteristics of Rental Housing in Which SPI Primarily Invests

Setting as the primary investment target single, family and other rental housing for average-income households that have the most stable demand, we aim to build a portfolio that can respond to the fluctuations of market rent, resident demand, etc. as much as possible and to carry out stable management over the medium to long term.

^{*}The aggregation period is from May to April of the following year.

Reduction of CO₂ emissions from electricity at common areas to zero

For 87 properties (84.2% of the total floor area) of the 107 properties we own, we have changed the electric power contracts for common areas to the power plan using 100% renewable energy provided by Mitsuuroko Green Energy Co., Ltd.

Through this initiative, we will realize virtually zero CO2 emissions from used electricity (common areas) at the introduced properties. This initiative contributes to the "reduction of greenhouse gas emission and energy consumption" among the materiality identified by SPI.

*Please refer to the following website for the ESG policy and materiality of SPI.

^{*}For energy consumption, GHG (CO2) emissions and water consumption, the actual figures only for the common areas of properties operated throughout the year and having management authorities (excluding properties under sectional ownership) are aggregated.

^{*}GHG (CO2) emissions are calculated by the Asset Management Company based on the adjusted emission factors, etc. by electric utility announced by the Ministry of the Environment.
