Notice Concerning the Impact of the Heavy Rainfall in Chiba Prefecture

We would like to extend our deepest condolences to those who lost their lives as a result of the damage caused by the heavy rainfall that began in Chiba Prefecture on the afternoon of August 13, and to their bereaved families. We also extend our heartfelt sympathies to all those affected by the disaster and sincerely hope for the earliest possible recovery in the affected areas.

Canadian Solar Infrastructure Fund, Inc. (hereinafter referred to as “CSIF”) announces that it has conducted a review of the impact upon power generation facilities in connection with the rainfall.

According to the report from the service providers engaged by CSIF to perform operation and maintenance (“O&M”) services, a power outage has been confirmed at the CS Sakura-shi Power Plant, owned by CSIF in Chiba Prefecture, since this morning. As of 3:00 p.m. today, no damage attributable to the heavy rainfall has been identified at any other power plant owned by CSIF that would affect its power generation facilities or generation operations.

CSIF will continue to monitor the situation, and additional disclosure will be made should there be any material developments.

Since the CS Sakura-shi Power Plant accounts for 0.49% (1.21 MW) of the total panel output (247.57 MW) of CSIF’s 35 power plants, and also because the CS Sakura-shi Power Plant is entitled to receive a basic rent (equivalent to 70% of the monthly rent forecast) from the lessee, the impact of the suspension of power generation on the rent income of CSIF as a whole is expected to be limited and there will be no revision to the forecasts for the fiscal period ending December 2026 and the fiscal period ending June 2027.

End
